

Preface

The primary objective of this book is to present skills that a surgeon may find helpful in day-to-day workplace practice and in career progression. The inspiration for this book came from personal experiences at various stages of my surgical career and through the observations of similar challenges that other surgeons faced.

The aim of this book is to present information in an easily read, succinct way and break down a vast subject into small, manageable sections. An attempt is made to provide the reader with knowledge and information, but also stimulate lateral thinking though repeated, often rhetoric, questioning.

I would like to thank Liz Pope, Associate Editor at Springer, and Vignesh Iyyadurai Suresh, Project Coordinator at Springer Nature, for their invaluable help and advice in the preparation and presentation of this book.
