

# Contents

- 1 Introduction** ..... 1
  - 1.1 Full-Duplex Wireless Systems ..... 1
  - 1.2 SI-Cancellation Techniques ..... 3
    - 1.2.1 Antenna SI-Cancellation Techniques ..... 4
    - 1.2.2 RF SI-Cancellation Techniques ..... 4
    - 1.2.3 Baseband SI-Cancellation Techniques ..... 5
  - 1.3 Applications of Full-Duplex Communications ..... 6
  - 1.4 Book Organization ..... 8
  - References ..... 10
- 2 Self-Interference-Cancellation in Full-Duplex Systems** ..... 13
  - 2.1 SI Channel Modelling ..... 13
  - 2.2 Analog RF Cancellation Stage ..... 14
  - 2.3 Digital SI-Cancellation ..... 15
  - 2.4 Channel Estimation in Full-Duplex Systems ..... 16
  - 2.5 Effect of Transmitter Impairments in SI-Cancellation ..... 18
  - 2.6 Cancellation of Nonlinear Distortions ..... 19
  - 2.7 Spatial Cancellation ..... 21
  - 2.8 Chapter Summary ..... 23
  - References ..... 23
- 3 Limiting Factors in Self-Interference Cancellation** ..... 27
  - 3.1 System Model and SI-Cancellation Architectures ..... 28
    - 3.1.1 Complex-Baseband Signal Representation ..... 31
    - 3.1.2 Residual SI Due to Phase Noise ..... 34
    - 3.1.3 Quantization and Clipping Noise from ADC ..... 34
    - 3.1.4 Transceiver Impairments and Noise ..... 36
    - 3.1.5 Auxiliary Component-Induced Impairments ..... 37
    - 3.1.6 Baseband SI-Cancellation ..... 38
  - 3.2 Performance Evaluation: Illustrative Results ..... 39
    - 3.2.1 System Specifications ..... 39

3.2.2	Residual Self-Interference After RF Cancellation Stage.....	40
3.2.3	Residual SI After the Baseband SI-Cancellation Stage .....	45
3.3	Conclusion .....	48
	Appendix .....	48
	References .....	49
<b>4</b>	<b>Self-Interference Channel Estimation and Cancellation Using Compressed-Sensing and Subspace Approaches .....</b>	<b>51</b>
4.1	Full-Duplex System Model .....	52
4.2	Compressed-Sensing-Based RF Cancellation Stage .....	56
4.3	Subspace-Based Baseband Cancellation Stage .....	60
4.3.1	Subspace-Based Technique .....	62
4.3.2	Resolving the Ambiguity Matrix $\mathbf{C}$ .....	65
4.4	Illustrative Results .....	69
4.5	Chapter Summary .....	75
	Appendix: Proof of (4.60) .....	76
	References .....	78
<b>5</b>	<b>Widely-Linear Subspace-Based Self-Interference-Cancellation .....</b>	<b>81</b>
5.1	Widely-Linear Channel Estimator.....	82
5.1.1	Real-Modulated Symbols .....	83
5.1.2	Complex-Modulated Symbols .....	85
5.1.3	Subspace-Based Algorithm .....	86
5.2	Resolving the Ambiguity Term.....	89
5.3	Simulation Results .....	94
5.4	Chapter Summary .....	102
	References .....	102
<b>6</b>	<b>Maximum Likelihood Self-Interference Cancellation .....</b>	<b>105</b>
6.1	System Model .....	106
6.2	ML Estimator .....	108
6.2.1	Closed-Form Solution .....	109
6.2.2	Iterative ML Estimator .....	111
6.3	Phase Noise Suppression .....	113
6.4	Simulation Results .....	117
6.4.1	Performance in the Absence of Phase Noise .....	117
6.4.2	Performance in the Presence of Phase Noise .....	122
6.4.3	Simulink Platform .....	123
6.5	Chapter Summary .....	124
	Appendix 1: Proof of $\lim_{T \rightarrow \infty} \widetilde{\mathbf{R}} = \mathbf{R}$ .....	125
	Appendix 2: Covariance Matrix $\widetilde{\mathbf{R}}_{pn}$ .....	129
	Appendix 3: Proof of Convergence.....	131
	Appendix 4: Stochastic CRB .....	132
	References .....	133

<b>7 Active Signal Injection for Self-Interference-Cancellation .....</b>	<b>135</b>
7.1 Novel Active Signal Injection for SI-Cancellation .....	137
7.2 Tone Reservation for SI-Cancellation .....	138
7.3 Constellation Relaxation for SI-Cancellation .....	143
7.4 Combination of Both Methods .....	148
7.5 Simulation Results .....	148
7.6 Chapter Summary .....	155
Appendix 1: Development of the Cost Function for the Tone Reservation Method .....	156
Appendix 2: On the Invertibility of the Matrix $M$ .....	158
References .....	159
<b>8 Conclusions and Future Work .....</b>	<b>161</b>
8.1 Concluding Remarks .....	161
8.2 Future Work .....	163

Full-Duplex Wireless Communications Systems

Self-Interference Cancellation

Le-Ngoc, T.; Masmoudi, A.

2017, XII, 164 p. 59 illus., 51 illus. in color., Hardcover

ISBN: 978-3-319-57689-3
