

Contents

Evolutionary Computation, Genetic Algorithms and Applications

Scale-Free Networks Out of Multifractal Chaos.	3
<i>Marcello A. Budroni and Romualdo Pastor-Satorras</i>	
GPU-Based Parallel Search of Relevant Variable Sets in Complex Systems . . .	14
<i>Emilio Vicari, Michele Amoretti, Laura Sani, Monica Mordonini, Riccardo Pecori, Andrea Roli, Marco Villani, Stefano Cagnoni, and Roberto Serra</i>	
Complexity Science for Sustainable Smart Water Grids	26
<i>Angelo Facchini, Antonio Scala, Nicola Lattanzi, Guido Caldarelli, Giovanni Liberatore, Lorenzo Dal Maso, and Armando Di Nardo</i>	
New Paths for the Application of DCI in Social Sciences: Theoretical Issues Regarding an Empirical Analysis	42
<i>Riccardo Righi, Andrea Roli, Margherita Russo, Roberto Serra, and Marco Villani</i>	
MapReduce in Computational Biology - A Synopsis	53
<i>Giuseppe Cattaneo, Raffaele Giancarlo, Stefano Piotto, Umberto Ferraro Petrillo, Gianluca Roscigno, and Luigi Di Biasi</i>	
Photogrammetric Meshes and 3D Points Cloud Reconstruction: A Genetic Algorithm Optimization Procedure	65
<i>Vitoantonio Bevilacqua, Gianpaolo Francesco Trotta, Antonio Brunetti, Giuseppe Buonamassa, Martino Bruni, Giancarlo Delfine, Marco Riezzo, Michele Amodio, Giuseppe Bellantuono, Domenico Magaletti, Luca Verrino, and Andrea Guerriero</i>	
Benchmarking Spark Distributed Data Structures: A Sequence Analysis Case Study	77
<i>Umberto Ferraro Petrillo and Roberto Vitali</i>	

Modelling and Simulation of Artificial and Biological Systems

Automatic Design of Boolean Networks for Cell Differentiation	91
<i>Michele Braccini, Andrea Roli, Marco Villani, and Roberto Serra</i>	
Model-Based Lead Molecule Design	103
<i>Alessandro Giovannelli, Debora Slanzi, Marina Khoroshiltseva, and Irene Poli</i>	

Reducing Dimensionality in Molecular Systems: A Bayesian Non-parametric Approach	114
<i>Valentina Mameli, Nicola Lunardon, Marina Khoroshiltseva, Debora Slanzi, and Irene Poli</i>	
Constraint-Based Modeling and Simulation of Cell Populations	126
<i>Marzia Di Filippo, Chiara Damiani, Riccardo Colombo, Dario Pescini, and Giancarlo Mauri</i>	
Linking Alterations in Metabolic Fluxes with Shifts in Metabolite Levels by Means of Kinetic Modeling	138
<i>Chiara Damiani, Riccardo Colombo, Marzia Di Filippo, Dario Pescini, and Giancarlo Mauri</i>	
Systems Chemistry and Biology	
A Strategy to Face Complexity: The Development of Chemical Artificial Intelligence	151
<i>Pier Luigi Gentili</i>	
Mathematical Modeling in Systems Biology	161
<i>Olli Yli-Harja, Frank Emmert-Streib, and Jari Yli-Hietanen</i>	
Synchronization in Near-Membrane Reaction Models of Protocells	167
<i>Giordano Calvanese, Marco Villani, and Roberto Serra</i>	
On the Employ of Time Series in the Numerical Treatment of Differential Equations Modeling Oscillatory Phenomena	179
<i>Raffaele D'Ambrosio, Martina Moccaldi, Beatrice Paternoster, and Federico Rossi</i>	
A Program for the Solution of Chemical Equilibria Among Multiple Phases	188
<i>Fulvio Ciriaco, Massimo Trotta, and Francesco Milano</i>	
Author Index	199

Advances in Artificial Life, Evolutionary Computation,
and Systems Chemistry

11th Italian Workshop, WIVACE 2016, Fisciano, Italy,
October 4-6, 2016, Revised Selected Papers

Rossi, F.; Piotto, S.; Concilio, S. (Eds.)

2017, XII, 199 p. 53 illus., Softcover

ISBN: 978-3-319-57710-4
