

Contents

1	Importance and Uses of Cryogenic Fluid Properties	1
1.1	Thermodynamic Property Information	2
1.2	Thermodynamic Property Formulations	3
1.3	Special Considerations for Modeling Cryogenic Fluids	6
1.4	Computer Programs for Thermodynamic Property Calculation	8
	References	9
2	Equation of State Development and Use	11
2.1	Fundamental Equations of State	11
2.2	Development of Thermodynamic Property Formulations	13
2.2.1	Thermodynamic Property Data Correlation	13
2.2.2	Least-Squares Regression	14
2.2.3	Non-linear Least-Squares Regression	15
2.2.4	Criteria for Equations of State	16
2.2.5	Critical Region Behavior	17
2.3	Use of Fundamental Equations of State for Cryogenic Fluids	18
2.4	Ancillary Functions	18
	References	20
3	Helium	23
3.1	Formulation for Helium	24
3.2	Property Plots for Helium	26
3.3	Thermodynamic Data Tables for Helium	29
	References	39
4	Hydrogen	41
4.1	Formulation for Parahydrogen	43
4.2	Property Plots for Parahydrogen	45
4.3	Thermodynamic Data Tables for Parahydrogen	48

- 4.4 Formulation for Normal Hydrogen 57
- 4.5 Property Plots for Normal Hydrogen 58
- 4.6 Thermodynamic Property Tables for Normal Hydrogen 61
- 4.7 Formulation for Orthohydrogen 70
- References 71
- 5 Deuterium 73**
 - 5.1 Formulation for Deuterium 75
 - 5.2 Property Plots for Deuterium 76
 - 5.3 Thermodynamic Data Tables for Deuterium 79
 - References 87
- 6 Neon 89**
 - 6.1 Formulation for Neon 89
 - 6.2 Property Plots for Neon 91
 - 6.3 Thermodynamic Data Tables for Neon 94
 - Reference 102
- 7 Nitrogen 103**
 - 7.1 Formulation for Nitrogen 103
 - 7.2 Property Plots for Nitrogen 105
 - 7.3 Thermodynamic Data Tables for Nitrogen 108
 - Reference 116
- 8 Air 117**
 - 8.1 Formulation for Air 117
 - 8.2 Property Plots for Air 119
 - 8.3 Thermodynamic Data Tables for Air 122
 - Reference 130
- 9 Carbon Monoxide 131**
 - 9.1 Formulation for Carbon Monoxide 131
 - 9.2 Property Plots for Carbon Monoxide 133
 - 9.3 Thermodynamic Data Tables for Carbon Monoxide 136
 - Reference 143
- 10 Fluorine 145**
 - 10.1 Formulation for Fluorine 145
 - 10.2 Property Plots for Fluorine 147
 - 10.3 Thermodynamic Data Tables for Fluorine 150
 - Reference 156
- 11 Argon 157**
 - 11.1 Formulation for Argon 157
 - 11.2 Property Plots for Argon 159
 - 11.3 Thermodynamic Data Tables for Argon 162
 - Reference 169

- 12 Oxygen** 171
 - 12.1 Formulation for Oxygen..... 171
 - 12.2 Property Plots for Oxygen 173
 - 12.3 Thermodynamic Data Tables for Oxygen..... 176
 - Reference 183

- 13 Methane** 185
 - 13.1 Formulation for Methane 185
 - 13.2 Property Plots for Methane 187
 - 13.3 Thermodynamic Data Tables for Methane 190
 - Reference 197

- 14 Krypton** 199
 - 14.1 Formulation for Krypton 199
 - 14.2 Property Plots for Krypton..... 201
 - 14.3 Thermodynamic Data Tables for Krypton 204
 - Reference 210

- Index** 211

Thermodynamic Properties of Cryogenic Fluids

Leachman, J.; Jacobsen, R.T.; Lemmon, E.; Penoncello, S.

2017, XVI, 213 p. 6 illus., Hardcover

ISBN: 978-3-319-57833-0
