1	Introduction	1
2	District Heating and Cogeneration in the EU-28: Current Situation, Potential and Proposed Energy Strategy for Its Generalisation	7
2.1	Introduction	8
2.2	Materials and Methods	11
2.3	Theoretical Background	14
2.4	Results	16
2.5	Discussion	24
2.6	Conclusions	27
	References	27
3	Cogeneration and District Heating Networks: Measures to Remove Institutional and Financial Barriers that Restrict Their Joint Use in the EU-28	31
3.1	Introduction	31
3.2	Methods	35
3.3	Institutional and Financial Barriers Identified	37
3.3.1	Distinctive Competence and Business Model Effect	37
3.3.2	Fuel and Electricity Price Volatility	38
3.3.3	Other Reasons	38
3.4	Measures Aimed at Eliminating Existing Institutional and Financial Barriers	40
3.5	Discussion	42
3.6	Conclusions and Policy Implications	47
	References	48

4	Reconciliation of Social Discount Rate and Private Finance Initiative: Application to District Heating Networks in the EU-28	55
4.1	Introduction	56
4.2	Theoretical Background	57
4.2.1	Cost Benefit Analysis	58
4.2.2	Net Present Value Method	58
4.2.3	Social Versus Private Discount Rates	58
4.3	Proposed Measures	60
4.4	Role of Government in the Selection of the SDR	63
4.5	Conclusions	66
	References	67
5	Evaluation of the Cost of Using Power Plant Reject Heat in Low-Temperature District Heating and Cooling Networks	71
5.1	Introduction	71
5.2	Materials and Methods	74
5.2.1	Annual Costs	75
5.2.2	Conversion and Emission Factors	77
5.3	Calculation	78
5.3.1	Power Plants and District Heating and Cooling Networks	81
5.3.2	Demand	84
5.4	Results	86
5.4.1	Oldenburg-Wilhelmshaven	87
5.4.2	Bristol	89
5.4.3	Cartagena	90
5.5	Discussion	91
5.6	Conclusions	93
	References	94
