

Contents

1	Background: Nuclear Materials and Their Analysis Needs	1
1.1	Materials	1
1.2	Nuclear Materials	5
1.2.1	Generation 0 Reactors Materials	6
1.2.2	From Generation I to II Reactor Materials	7
1.2.3	Generation III Reactor Materials	9
1.2.4	Generation IV Reactor Materials	10
1.2.5	Materials from Generation V Reactors and Accelerators	12
1.2.6	Military Nuclear Materials	13
1.2.7	Nuclear Waste Management	16
1.2.8	Contaminated Materials	18
1.3	Analysis Needs and Limitations	19
1.3.1	Required Analyses and Analysis Requirement	19
1.3.2	Analytical Limitations	20
1.3.3	Analysis Modes and Combinations	22
	References	23
2	Sampling, Handling, Treatment and Separation	25
2.1	Sample Collection and Analysis Mode	25
2.1.1	Sample Selection and Collection	25
2.1.2	Sampling from Analysis Mode	27
2.2	Sub-sampling	28
2.2.1	Fluid Samples	29
2.2.2	Solid Samples	29
2.3	Reference Materials and Calibration	32
2.3.1	Reference Materials	32
2.3.2	Calibration with Internal or External Standards	33
	References	33

3	Characterization Using Passive or Interactive Techniques	35
3.1	Material Characterization by Field-Free Passive Techniques	38
3.1.1	Techniques with Phonon Detection	38
3.1.2	Techniques with Photon Detection	39
3.1.3	Techniques with Lepton Detection	47
3.1.4	Techniques with Neutron Detection	57
3.1.5	Techniques with Atom or Ion Detection	58
3.2	Material Characterization by Field-Free Interactive Techniques	62
3.2.1	Techniques with Phonon Interaction and Phonon Detection	63
3.2.2	Techniques with Photon Interaction and Phonon Detection	71
3.2.3	Techniques with Photon Interaction and Photon Detection	74
3.2.4	Techniques with Photon Interaction and Lepton Detection	126
3.2.5	Techniques with Photon Interaction and Ion or Neutron Detection	127
3.2.6	Techniques with Lepton Interaction and Phonon Detection	133
3.2.7	Techniques with Lepton Interaction and Photon Detection	134
3.2.8	Techniques with Lepton Interaction and Lepton Detection	141
3.2.9	Techniques with Lepton Interaction and Neutron Detection	152
3.2.10	Techniques with Lepton Interaction and Ion Detection	152
3.2.11	Techniques with Neutron Interaction and Photon Detection	153
3.2.12	Techniques with Neutron Interaction and Lepton Detection	157
3.2.13	Techniques with Neutron Interaction and Neutron Detection	160
3.2.14	Techniques with Neutron Interaction and Ion Detection	165
3.2.15	Techniques with Ion or Atom Interaction and Phonon Detection	168
3.2.16	Techniques with Ion or Atom Interaction and Photon Detection	169

3.2.17	Techniques with Ion Interaction and Neutron Detection	173
3.2.18	Techniques with Ion or Atom Interaction and Ion Detection	174
3.3	Material Characterization by Techniques Under Specific Field	199
3.3.1	Techniques with Field or Phonon Detection	199
3.3.2	Techniques with Photon Detection	201
3.3.3	Techniques with Atom/Ion Detection	201
3.3.4	Techniques with Photon Interaction and Photon Detection	203
3.3.5	Techniques with Photon Interaction and Lepton Detection	213
3.3.6	Techniques with Lepton Interaction and Photon Detection	213
3.3.7	Techniques with Lepton Interaction and Lepton Detection	216
3.3.8	Techniques with Lepton Interaction and Ion Detection	217
	References	234
4	Comparing and Combining Analytical Techniques	257
4.1	Comparing Analytical Techniques	257
4.1.1	Comparing Passive Techniques	258
4.1.2	Comparing Interactive Techniques	259
4.1.3	Comparing Passive and Interactive Methods	262
4.1.4	Comparing the Detection Limits and Relevant Issues	267
4.2	Combining Techniques	269
4.2.1	Combining Passive Techniques	269
4.2.2	Combining Interactive Techniques	270
4.2.3	Combining All Analytical Techniques	274
	References	276
5	Concluding Summary	279
	Index	285

The Analysis of Nuclear Materials and Their
Environments

Degueldre, C.A.

2017, XXIV, 288 p. 109 illus., 83 illus. in color.,
Hardcover

ISBN: 978-3-319-58004-3
