1	Introduction	1
1.1	Background	1
1.2	Why Fresh Water Facility has Shrunk Day by Day?	2
1.3	Can We Tackle the Water Pollution?	3
1.4	Carbon Nanotube: an Enchant Nanomaterial	4
1.4.1	Carbon Nanotube Synthesis	9
1.4.2	Carbon Nanotube Growth Mechanisms	10
1.5	Enzyme: an Unsung Hero for Water Purification	12
1.5.1	Protocatechuate 3,4-dioxygenase: an Enzyme for Water Treatment	13
1.5.2	Protocatechuate 3,4-dioxygenase Immobilized on Carbon Nanotube	13
1.6	What are the Problems that We Fixed Here?	15
1.6.1	Purification of Pristine Carbon Nanotube	15
1.6.2	Solubilization of Carbon Nanotube	16
1.6.3	Development and Characterizations of Nanobiohybrid Catalyst	16
1.6.4	Nanobiohybrid Catalyst for Pollutant Removal	17
1.7	Conclusions	18
	References and Future Readings	18
2	Carbon Nanotube in Water Treatment	23
2.1	Background	23
2.2	Water Scarcity and Its Consequences	25
2.3	Threats to Conventional Water Treatment Technologies	30
2.4	Carbon Nanotube Scaffold Functions in Water Purifications	31
2.4.1	Adsorption	31
2.4.2	Hybrid Catalysis	33
2.4.3	Desalination	41
2.4.4	Disinfection	42

2.4.5	Sensing and Monitoring	43
2.4.6	Research Gaps and Challenges	44
2.5	Conclusions	46
	References and Future Readings	47
3	Carbon Nanotube Purification	55
3.1	Background	55
3.2	Literature Review	56
3.2.1	What are the Impurities Commonly Associated with the Pristine CNT?	56
3.2.2	What Kinds of Characterization Methods are Commonly Used for CNT Impurities Detection?	57
3.2.3	What are the Methods Necessary for CNT Purification?	57
3.2.4	What Challenges Does Exist with CNT Purification?	58
3.3	Materials and Methods	60
3.3.1	Materials and Reagents	60
3.3.2	Instrumentation	60
3.3.3	Wet Chemical Treatments of MWCNT	60
3.4	Results	61
3.4.1	Predicted Chemical Reactions of HCl, H ₂ O ₂ , and KOH with MWCNT	61
3.4.2	TEM Analysis	63
3.4.3	EDX Analysis	64
3.4.4	ATR-IR Analysis	65
3.4.5	Raman Spectroscopy Analysis	66
3.4.6	TGA Analysis	66
3.4.7	Colloidal Stability Measurement	68
3.5	Discussion	68
3.6	Conclusions	70
	References and Future Readings	71
4	Carbon Nanotube Functionalizations	75
4.1	Background	75
4.2	Literature Review	76
4.2.1	Is CNT Hydrophobic in Nature?	76
4.2.2	What are the Strategies Commonly Used for CNT Solubilization?	77
4.2.3	Non-covalent Modification of CNT	79
4.3	Materials and Methods	82
4.3.1	Materials and Reagents	82
4.3.2	Instrumentation	83
4.3.3	Wet Chemical Oxidations of MWCNT	83

4.4	Results	84
4.4.1	Predicted Chemical Reactions of $\text{HNO}_3/\text{H}_2\text{O}_2$ and KMnO_4 with MWCNT	84
4.4.2	XPS Analysis of MWCNT	86
4.4.3	Titration Analysis	87
4.4.4	TEM Analysis	90
4.4.5	Raman Spectroscopy Analysis	91
4.4.6	TGA Analysis	92
4.4.7	Colloidal Stability of MWCNT	93
4.5	Discussion	95
4.6	Conclusions	100
	References and Future Readings	100
5	Nanobiohybrid Preparation	105
5.1	Background	105
5.2	Literature Review	107
5.2.1	Enzyme Immobilization onto CNT Using Non-covalent Approach	108
5.2.2	Enzyme Immobilization onto CNT Using Covalent Approach	111
5.2.3	Target Enzyme for Attachment with the CNT	112
5.3	Materials and Methods	113
5.3.1	Materials and Reagents	113
5.3.2	Instrumentation	114
5.3.3	Preparation of F-MWCNT	114
5.3.4	Preparation of Nanobiohybrid	115
5.4	Results	116
5.4.1	Characterization of F-MWCNT	116
5.4.2	Characterization of Nanobiohybrid	117
5.4.3	Optimization of Nanobiohybrid	120
5.5	Discussion	121
5.6	Conclusions	124
	References and Future Readings	124
6	Nanobiohybrid for Water Treatment	129
6.1	Background	129
6.2	Literature Review	130
6.3	Materials and Methods	133
6.3.1	Materials and Reagents	133
6.3.2	Free 3,4-POD and Nanobiohybrid Activity Assays	133
6.3.3	Free 3,4-POD and Nanobiohybrid Stability Assays	134
6.3.4	Removal of 3,4-DHBA	134
6.3.5	Data Analysis	135

6.4	Results	135
6.4.1	Effects of pH and Temperature on Free 3,4-POD and Nanobiohybrid Activities	135
6.4.2	Kinetic Analyses of Free 3,4-POD and Nanobiohybrid.	136
6.4.3	Stability Studies of Free 3,4-POD and Nanobiohybrid	137
6.4.4	Degradation Kinetics of 3,4-DHBA	137
6.5	Discussion	139
6.6	Conclusions	141
	References and Future Readings	141

Nanohybrid Catalyst based on Carbon Nanotube
A Step-By-Step Guideline from Preparation to
Demonstration

Das, R.

2017, XVIII, 143 p. 70 illus., 60 illus. in color., Hardcover

ISBN: 978-3-319-58150-7
