

# Contents

<b>1</b>	<b>Introduction . . . . .</b>	<b>1</b>
1.1	Nonlinear Optimization Modeling . . . . .	2
1.2	Constrained Nonlinear Optimization Methods: A Critical Review . . . . .	3
1.2.1	Convergence Tests . . . . .	4
1.2.2	Infeasible Points . . . . .	5
1.2.3	Approximate Sub-problem: Local Models and Their Solving . . . . .	5
1.2.4	Globalization Strategy: Convergence from Remote Starting Points . . . . .	11
1.2.5	Refining the Local Model . . . . .	14
1.3	Structure of the Book . . . . .	16
<b>2</b>	<b>Mathematical Modeling Using Algebraic Oriented Languages for Nonlinear Optimization . . . . .</b>	<b>19</b>
2.1	Linguistic Models Versus Mathematical Models . . . . .	19
2.2	Mathematical Modeling and Computational Sciences . . . . .	21
2.3	Modeling Scheme . . . . .	22
2.4	Algebraic Oriented Modeling Languages . . . . .	24
<b>3</b>	<b>Introduction to GAMS Technology . . . . .</b>	<b>29</b>
3.1	Basics of Modeling . . . . .	29
3.2	Structure of a GAMS Model . . . . .	31
3.3	Sets . . . . .	31
3.4	Data . . . . .	32
3.5	Variables . . . . .	33
3.6	Equations . . . . .	34
3.7	Model Declarations . . . . .	36
3.8	The SOLVE Statement and Model Types . . . . .	37
3.9	DISPLAY and PUT Statements . . . . .	40
3.10	GAMS Output . . . . .	41

3.11	Basic Solver Usage . . . . .	43
3.12	Running a Job . . . . .	44
3.13	Program Development . . . . .	44
<b>4</b>	<b>Applications of Continuous Nonlinear Optimization . . . . .</b>	<b>47</b>
4.1	Chemical Equilibrium (ELCH) . . . . .	48
4.2	Optimization of an Alkilation Process (ALKI) . . . . .	50
4.3	Optimal Design of a Reactor as a Geometric Programming Problem (PREC) . . . . .	52
4.4	Cost Minimization of a Transformer Design (TRAFO) . . . . .	54
4.5	Optimization of a Multi-spindle Automatic Lathe (LATHE) . . . . .	56
4.6	Static Power Scheduling (PPSE) . . . . .	58
4.7	Optimization of a Separation Process in a Membrane with three Stages (MSP3) . . . . .	60
4.8	Optimization of a Separation Process in a Membrane with five Stages (MSP5) . . . . .	63
4.9	Blending/Pooling with Five Feeds and Two Products (POOL) (Andrei, 1999, pp. 808; Andrei, 2003, pp. 382) . . . .	67
4.10	Distribution of Electrons on a Sphere (DES) . . . . .	71
4.11	Hanging Chain (HANG) . . . . .	73
4.12	Determine the Optimal Mixing Policy of Two Catalysts Along the Length of a Tubular Plug Flow Reactor Involving Several Reactions (CAT) . . . . .	75
4.13	Optimal Control of a Continuous Stirred-Tank Chemical Reactor (CSTC) . . . . .	77
4.14	Optimal Temperature Field in a Rectangular Area (DIFF) . . . . .	81
4.15	Stationary Flow of an Incompressible Fluid in a Rectangular Area (FLOW/FLOWO) . . . . .	91
4.16	Fed-Batch Fermenter for Penicillin Production (PENICI) . . .	103
4.17	A Standard Linear Lumped Parameter System (CONT) . . . .	109
4.18	Van der Pol Oscillator (POL) . . . . .	114
<b>5</b>	<b>Optimality Conditions for Continuous Nonlinear Optimization . . . . .</b>	<b>119</b>
5.1	General Concepts in Nonlinear Optimization . . . . .	120
5.2	Optimality Conditions for Unconstrained Optimization . . . .	123
5.3	Optimality Conditions for Problems with Inequality Constraints . . . . .	126
5.4	Optimality Conditions for Problems with Equality Constraints . . . . .	130
5.5	Optimality Conditions for General Problems . . . . .	139

<b>6</b>	<b>Simple Bound Constraints Optimization</b>	147
6.1	Necessary Conditions for Optimality	148
6.2	Sufficient Conditions for Optimality	150
6.3	Methods for Solving Simple Bound Optimization Problems	151
6.4	Spectral Projected Gradient Method (SPG)	154
6.5	L-BFGS with Simple Bounds (L-BFGS-B)	160
6.6	Truncated Newton with Simple Bounds (TNBC)	169
6.7	Applications	171
<b>7</b>	<b>Penalty and Augmented Lagrangian Methods</b>	185
7.1	The Quadratic Penalty Method	186
7.2	Nonsmooth Penalty Method	190
7.3	Augmented Lagrangian Method	193
7.4	Criticism of the Penalty and Augmented Lagrangian Methods	198
<b>8</b>	<b>A Penalty-Barrier Algorithm: SPENBAR</b>	203
8.1	The Penalty-Barrier Method	206
8.2	Global Convergence	211
<b>9</b>	<b>Linearly Constrained Augmented Lagrangian: MINOS</b>	223
9.1	MINOS for Linear Constraints	224
9.2	MINOS for Nonlinear Constraints	231
<b>10</b>	<b>Quadratic Programming</b>	243
10.1	Equality-Constrained Quadratic Programming	243
10.2	Inequality-Constrained Quadratic Programming	251
<b>11</b>	<b>Sequential Quadratic Programming (SQP)</b>	269
11.1	Reduced Hessian Quasi-Newton Approximations	274
11.2	Merit Functions	275
11.3	Second-Order Correction (Maratos Effect)	278
11.4	Line-Search SQP Algorithm	280
11.5	Trust-Region SQP Method	282
11.6	Sequential Linear-Quadratic Programming (SLQP)	285
<b>12</b>	<b>A SQP Method Using Only Equality-Constrained Sub-problems: DONLP</b>	289
<b>13</b>	<b>A SQP Algorithm with Successive Error Restoration: NLPQLP</b>	297
<b>14</b>	<b>Active-set Sequential Linear-Quadratic Programming: KNITRO/ACTIVE</b>	305
14.1	KNITRO/ACTIVE Algorithm	306
14.2	Strategy for Penalty Parameter Update	309
14.3	Iteration of Projected Conjugate Gradient Algorithm	310
14.4	Hessian Options	312

<b>15</b>	<b>A SQP Algorithm for Large-Scale Constrained Optimization: SNOPT</b>	317
15.1	Infeasible Constraints	318
15.2	The SQP Iteration for General Inequality Nonlinear Optimization	319
15.3	The Quadratic Programming Solver SQOPT	325
<b>16</b>	<b>Generalized Reduced Gradient with Sequential Linearization: CONOPT</b>	331
<b>17</b>	<b>Interior Point Methods</b>	343
17.1	Prototype of Interior Point Algorithm	346
17.2	Aspects of Algorithmic Development	349
17.3	Line-Search Interior Point Algorithm	355
17.4	A Variant of Line-Search Interior Point Algorithm	356
17.5	Trust-Region Interior Point Algorithm	374
<b>18</b>	<b>Filter Methods</b>	381
18.1	Sequential Linear Programming Filter Algorithm	383
18.2	Sequential Quadratic Programming Filter Algorithm	387
<b>19</b>	<b>Interior Point Sequential Linear-Quadratic Programming: KNITRO/INTERIOR</b>	397
19.1	KNITRO/INTERIOR-DIRECT Algorithm	399
19.2	KNITRO/INTERIOR-CG Algorithm	402
<b>20</b>	<b>Interior Point Filter Line Search: IPOPT</b>	415
20.1	Basic Algorithm IPOPT	416
20.2	Implementation Details	426
<b>21</b>	<b>Numerical Studies: Comparisons</b>	437
	<b>Appendix A: Mathematical Review</b>	449
	<b>Appendix B: Solving Linear Equation Systems</b>	461

	<b>Subject Index</b>	501

Continuous Nonlinear Optimization for Engineering  
Applications in GAMS Technology

Andrei, N.

2017, XXIV, 506 p. 68 illus., 66 illus. in color., Hardcover

ISBN: 978-3-319-58355-6
