## Carbon Nutrient Removal and Recovery

<b>The Impact of High Mixed Liquor Concentration (3-13 gVSS/<math>\ell</math>) on the Kinetic Rates of the N and P Removal Bioprocesses in Membrane Biological Nutrient Removal Activated Sludge Systems . . . . .</b>	<b>3</b>
V. Parco, G.J.G. du Toit, and G.A. Ekama	

<b>Recovery of Ammonia and Production of High-Grade Phosphates from Side-Stream Digester Effluents Using Gas-Permeable Membranes . . . . .</b>	<b>13</b>
M.B. Vanotti, P.J. Dube, and A.A. Szogi	

<b>The Start-up of Mainstream Anammox Process Is Limited Only by Nitrite Supply . . . . .</b>	<b>18</b>
Y. Law, S. Swa Thi, X.M. Chen, T.Q.N. Nguyen, T.W. Seviour, R.B.H. Williams, B. Ni, and S. Wuertz	

<b>Phosphorus Recovery from Sewage in a Pilot-Scale UASB-DHS System . . . . .</b>	<b>22</b>
A. Nurmiyanto, H. Kodera, T. Kindaichi, N. Ozaki, and A. Ohashi	

<b>An Empirical Model for Carbon Recovery in a Rotating Belt Filter and Its Application in the Frame of Plantwide Evaluation . . . . .</b>	<b>30</b>
Chitta Ranjan Behera, Farnaz Daynouri-Pancino, Domenico Santoro, Krist V. Gernaey, and Gürkan Sin	

<b>Thermodynamic Modelling Is Needed to Describe the Effect of High Temperature on Microbial Nitrogen Removal Processes . . . . .</b>	<b>37</b>
K.A. Ismail, M. Patón, and J. Rodríguez	

<b>Application of DHS-USB System and Ozone in Recirculating Freshwater Aquaria Towards Zero Water Exchange Aquaria . . . . .</b>	<b>43</b>
N. Adlin, M. Hatamoto, Y. Hirakata, T. Watari, N. Matsuura, and T. Yamaguchi	

<b>Short and Long Term Effect of Decreasing Temperature on Anammox Activity and Enrichment in Mainstream Granular Sludge Process. . . . .</b>	<b>50</b>
P. De Cocker, Y. Bessiere, G. Hernandez-Raquet, S. Dubos, M. Mercade, X.Y. Sun, I. Mozo, B. Barillon, G. Gaval, M. Caligaris, S. Martin Ruel, S.E. Vlaeminck, and M. Sperandio	
<b>Phosphorus Recovery from Waste Activated Sludge: Microwave Treatment and Ozonation with Acid &amp; Alkaline Pre-treatments. . . . .</b>	<b>55</b>
S. Cosgun and N. Semerci	
<b>Respirometric Evaluation of Toxicity of 2,4-Dichlorophenol Towards Activated Sludge and the Ability of Biomass Acclimation . . . . .</b>	<b>60</b>
P. Van Aken, N. Lambert, R. Van den Broeck, J. Degrève, and R. Dewil	
<b>Differential Expression of Genes Involved in Utilization of Benzo(a)Pyrene in <i>Burkholderia vietnamiensis</i> G4 Strain. . . . .</b>	<b>68</b>
G.P. Cauduro, T. Falcon, A.L. Leal, and V.H. Valiati	
<b>Biokinetic Behaviour of Autochthonous Halophilic Biomass at Different Salinity: Comparison Between Activated Sludge and Granular Sludge Systems . . . . .</b>	<b>73</b>
S.F. Corsino, M. Capodici, M. Torregrossa, and G. Viviani	
<b>Instrumentation and Control and Automation (ICA) &amp; Benchmarking</b>	
<b>The Benchmark Simulation Modelling Platform – Areas of Recent Development and Extension . . . . .</b>	<b>81</b>
U. Jeppsson	
<b>Automating the Raw Data to Model Input Process Using Flexible Open Source Tools . . . . .</b>	<b>92</b>
C. De Mulder, T. Flameling, J. Langeveld, Y. Amerlinck, S. Weijers, and I. Nopens	
<b>Modeling of N<sub>2</sub>O Emissions in a Full-Scale Activated Sludge Sequencing Batch Reactor . . . . .</b>	<b>98</b>
T.M. Massara, E. Katsou, A. Guisasola, A. Rodriguez-Caballero, M. Pijuan, and J.A. Baeza	
<b>Comprehensive Evaluation of a Sewage Treatment Plant as a Base for Recirculation of Materials and Energy in the Region . . . . .</b>	<b>105</b>
T. Fukushima	
<b>Development of an in-House Lattice-Boltzmann Simulator Towards Bioreactors for Wastewater Treatment: Underlying Concepts . . . . .</b>	<b>113</b>
V.A. Fortunato, F.L. Caneppele, R. Ribeiro, and J.A. Rabi
