Contents

1 Introduction 1
References 4

2 Biomaterials: Characteristics and Properties 5
2.1 Properties of Biomaterials 7
2.1.1 Physical Properties 8
2.1.2 Chemical Properties 10
2.1.3 Mechanical Properties 10
2.2 Surface Modification—Biomaterial–Tissue Interactions 12
References 14

3 Metallic Biomaterials 17
3.1 Development of Metallic Biomaterials 17
3.2 Characteristics of Metallic Biomaterials 18
3.2.1 Biocompatibility 19
3.2.2 Mechanical Properties 19
3.2.3 Corrosion Resistance 22
3.2.4 Wear Resistance 23
3.2.5 Osseointegration 23
3.3 Metallic Biomaterials 24
3.3.1 Stainless Steel 24
3.3.2 Titanium and Titanium Alloys 25
3.3.3 Cobalt-Chrome-Based Alloys 26
3.3.4 Magnesium-Based Alloys 26
3.3.5 Tantalum 26
3.3.6 Zirconium-Based Alloys 27
References 27

4 Ceramic Biomaterials 29
4.1 Obtention, Processing, and Application of Bioceramics 29
4.2 Properties of Bioceramics 29

4.3 Types of Bioceramics 32
4.3.1 Alumina (Al_2O_3) 32
4.3.2 Zirconia (ZrO_2) 33
4.3.3 Calcium Phosphate Ceramics 33
4.3.4 Calcium Phosphate Cements (CPC) 34
4.3.5 Bioglasses and Vitroceramics 35
References 37

5 Polymeric Biomaterials 39
5.1 Fundamental Concepts of Polymers 39
5.1.1 Synthetic Polymers Used as Biomaterials 41
5.1.2 Concepts of Degradation, Biodegradation, Bioabsorption and Bioreabsorption 41
5.1.3 Main Polymers Biodegradable, Bioreabsorbable, Bioerodible Utilized as Biomaterials 46
5.2 Polymeric Hydrogels 46
5.2.1 Polymers Used as Hydrogels and Applications of Same as Biomaterials 48
References 49

6 Composite Biomaterials 51
6.1 Types and Properties of Discontinuous Phases 54
6.2 Polymeric Phases for Biomaterials 55
6.3 Metallic Phases for Biomaterials 56
6.4 Ceramic Phases for Biomaterials 56
6.5 Selection of Properties Between Materials and Tissues 57
References 59

7 Biomaterials Sterilization Methods 61
7.1 Sterilization Methods 62
7.1.1 Ethylene Oxide 63
7.1.2 Hydrogen Peroxide Plasma 64
7.1.3 Autoclave 65
7.1.4 Irradiation Sterilization 66
References 72

8 Biomaterials: Degradation and Effects on Living Tissue 75
8.1 Biomaterial-Receptor and Receptor-Biomaterial Interactions 76
8.2 Behavior of the Material in the in Vivo Condition, Applications, and Requirements—Case Studies 78
8.2.1 Metallic Materials 78
8.2.2 Ceramic Materials 81
8.2.3 Polymeric Materials 82
References 85
