

Contents

1	Moments and Combinations of Positive Linear Operators	1
1.1	Introduction	1
1.2	Some Kind of Operators	2
1.2.1	Discretely Defined Operators	2
1.2.2	Kantorovich Variants	5
1.2.3	Durrmeyer Variants	6
1.3	Integral Type Operators	9
1.3.1	Phillips Operators	9
1.3.2	Szász–Mirakjan–Baskakov Operators	10
1.3.3	Szász–Mirakjan–Laguerre Operators	12
2	Direct Estimates for Approximation by Linear Combinations	15
2.1	Direct Estimates in L_p -Norm	15
2.2	Direct Results for Linear Combinations	18
2.2.1	Post–Widder Operators	18
2.2.2	Durrmeyer Type Operators: $\bar{B}_n, \bar{S}_n, \bar{V}_n$	20
2.2.3	Phillips Operators	21
2.2.4	Szász–Mirakjan–Baskakov Operators	22
3	Inverse Estimates and Saturation Results for Linear Combinations	25
3.1	Inverse Estimates for Linear Combinations	25
3.1.1	Operators of Type: $B_n, S_n, V_n, \hat{B}_n, \hat{S}_n, \hat{V}_n$	25
3.1.2	Durrmeyer Type Operators	26
3.1.3	Phillips Operators	29
3.2	Saturation Results for Linear Combinations	31
4	Voronovskaja-Type Estimates	37
4.1	New Quantitative Estimates of Voronovskaja Type	37
4.2	Voronovskaja-Type Estimates	43
4.2.1	In Terms of $\omega_\varphi(f'', \delta)$	43
4.2.2	In Terms of $\omega_{\varphi^\lambda}(f'', \delta), 0 \leq \lambda \leq 1$	45

4.2.3	For $f \in C^3[0, 1]$	46
4.2.4	For Higher Order Derivatives	48
4.3	Asymptotic Expansion for Some Positive Linear Operators	52
4.4	Voronovskaja-Type Estimate for Schoenberg Operators	54
4.5	Voronovskaja-Type Estimates for Linear Combinations	57
4.5.1	Phillips Operators	57
4.5.2	Durrmeyer Modification	62
4.5.3	Simultaneous Approximation	63
5	Pointwise Estimates for Linear Combinations	67
5.1	Approximation by Linear Combinations	67
5.1.1	Discrete Operators	67
5.1.2	Szász–Mirakjan–Durrmeyer Operators	68
5.1.3	Bernstein Polynomials	70
5.2	Simultaneous Pointwise Approximation by $B_{n,r}$	75
5.3	Pointwise Estimates for Combinations	76
5.3.1	Bernstein–Kantorovich Operators	76
5.3.2	Phillips Operators	77
5.4	Linear Combinations of Complex Phillips Operators	82
6	Voronovskaja’s Theorem in Terms of Weighted Modulus of Continuity	89
6.1	Quantitative Estimates	89
6.2	General Form of Voronovskaja’s Theorem	90
6.3	Applications of General Form	94
6.3.1	Szász–Mirakjan Operators	94
6.3.2	Baskakov Operators	96
6.3.3	Phillips Operators	98
6.4	Voronovskaja’s Estimate for Functions with Exponential Growth ...	99
6.5	Applications of Voronovskaja’s Estimate for Functions with Exponential Growth	102
6.5.1	Baskakov Operators	102
6.5.2	Szász–Mirakjan Operators	103
6.5.3	Phillips Operators	104
6.5.4	Lupaş–Szász Operators	105
6.6	Voronovskaja-Type Theorems	108
6.6.1	Derivatives of Szász–Mirakjan Operators	108
6.6.2	For Linear Combinations	109
7	Direct Estimates for Some New Operators	117
7.1	Lupaş–Durrmeyer Operators	117
7.1.1	Direct Estimates	118
7.1.2	Rate of Convergence	122
7.1.3	Genuine Integral Modification	123
7.1.4	Complex Case	124
7.2	Modified Baskakov–Durrmeyer Operators	134

7.3	Jain Generalization of Szász–Mirakjan–Durrmeyer Operators	137
7.3.1	Moments Estimation.....	138
7.3.2	Direct Estimates	143
7.3.3	Quantitative Asymptotic Formula.....	143
7.4	Generalized Baskakov–Szász Operators	145
7.4.1	Baskakov–Jain Type Operators	145
7.4.2	Baskakov–Szász operators Based on IPED.....	148
7.5	Lupaş Type Integral Operators	152
8	Convergence for Operators Based on Păltănea Basis	157
8.1	Genuine Durrmeyer Type Operators	157
8.1.1	Genuine Bernstein–Durrmeyer Operators	157
8.1.2	Genuine Hybrid Operators	160
8.2	Modified Phillips Operators	161
8.3	Some New Hybrid Durrmeyer Type Operators	164
8.3.1	General Lupaş Type Operators	164
8.3.2	Modified Baskakov–Szász Operators	165
8.4	Jakimovski–Leviatan–Păltănea Operators	167
8.5	Some Other Linking Operators	169
	References.....	175
	Index.....	185

Approximation with Positive Linear Operators and Linear
Combinations

Gupta, V.; Tachev, G.

2017, XIII, 186 p. 2 illus. in color., Hardcover

ISBN: 978-3-319-58794-3
