1	Introduction	1
2	The Standard Model	3
2.1	Fundamental Particles and Forces	3
2.2	Quantum ElectroDynamics	5
2.3	Quantum ChromoDynamics	6
2.4	Electroweak Interactions	6
2.5	The Higgs–Brout–Englert Mechanism	8
	References	11
3	Beyond the Standard Model	13
3.1	Few Standard Model Limitations	13
3.2	Supersymmetry	14
3.2.1	Compressed Scenarios	16
3.3	Extra Spatial Dimensions	17
	References	20
4	The Dark Matter Paradigm	21
4.1	The Λ CDM Model	21
4.2	Relic Density	25
4.3	Cosmological Observations	27
4.4	Dark Matter Candidates	31
4.5	WIMP Searches	33
4.5.1	Direct Detection	33
4.5.2	Indirect Detection	36
4.5.3	Run-1 Mono-jet Results	38
4.6	Effective Field Theory	40
4.7	Simplified Models	43
4.7.1	Vector and Axial-Vector Mediators	45
4.7.2	Scalar and Pseudo-scalar Mediators	48
	References	52

6.1	Electrons	75
6.2	Photons	78
6.3	Muons	79
6.4	Jets.	81
6.5	Overlap Removal.	87
6.6	Missing Transverse Momentum	87
	References	91
7	The Mono-jet Analysis	93
7.1	Data and MC Samples	93
7.1.1	2015 Data Sample	93
7.1.2	MC Simulations	94
7.2	Event Selection	98
7.3	Trigger.	99
7.4	Background Estimation	101
7.4.1	Electroweak Background	101
7.4.2	Diboson and Top Backgrounds	105
7.4.3	Multi-jet Background	106
7.4.4	Non-collision Background	108
7.5	Fit Strategy	112
7.6	Systematic Uncertainties	116
7.6.1	Background Systematics.	116
7.6.2	Signal Systematics	123
7.7	Background-Only Fit	127
7.7.1	Impact of Systematic Uncertainties.	128
7.8	Validation of the Background Estimation Technique	133
7.9	Results and Interpretations.	136
7.9.1	ADD Limits	140
7.9.2	SUSY Limits	144
7.9.3	Dark Matter Limits.	147
	References	153

8	Mono-jet Versus All	157
8.1	Mono-jet Versus Direct Detection	157
8.2	Mono-jet Versus Di-jet Search	159
8.2.1	Di-jet Analysis	160
8.2.2	Trigger Level Di-jet Analysis	163
8.2.3	Di-jet Plus ISR Analysis	166
8.2.4	Comparison of Results	168
8.2.5	Coupling Rescaling	169
	References	173
9	Mono-jet Analysis Improvements	175
9.1	Data Sample	175
9.2	Background Knowledge	177
9.2.1	$Z(\nu\nu) + \text{jets}$ Estimation	177
9.2.2	Top Estimation	180
9.3	Multi-dimensional Fitting Strategy	183
9.3.1	N_{jet} Versus $E_{\text{T}}^{\text{miss}}$	183
9.3.2	Boosted-Decision-Tree Versus $E_{\text{T}}^{\text{miss}}$	185
	References	190
10	Conclusions	191
	Appendix A: Signal Cross-Sections	195
	Appendix B: Signal Region Results	199
	Appendix C: Signal Expected Yields in the Signal Region	211
	Appendix D: Signal Limits	225
	Curriculum Vitae	231

Search for New Physics in Mono-jet Final States in pp
Collisions

at $\sqrt{s}=13$ TeV with the ATLAS Experiment at the LHC

Gustavino, G.

2017, XV, 236 p. 132 illus., 42 illus. in color., Hardcover

ISBN: 978-3-319-58870-4
