
Contents

1	Methods of Proof	1
1.1	Argument by Contradiction	1
1.2	Mathematical Induction	3
1.3	The Pigeonhole Principle	11
1.4	Ordered Sets and Extremal Elements	14
1.5	Invariants and Semi-Invariants	18
2	Algebra	25
2.1	Identities and Inequalities	25
2.1.1	Algebraic Identities	25
2.1.2	$x^2 \geq 0$	28
2.1.3	The Cauchy-Schwarz Inequality	32
2.1.4	The Triangle Inequality	35
2.1.5	The Arithmetic Mean-Geometric Mean Inequality	38
2.1.6	Sturm's Principle	43
2.1.7	Other Inequalities	46
2.2	Polynomials	47
2.2.1	A Warmup in One-Variable Polynomials	47
2.2.2	Polynomials in Several Variables	50
2.2.3	Quadratic Polynomials	52
2.2.4	Viète's Relations	56
2.2.5	The Derivative of a Polynomial	61
2.2.6	The Location of the Zeros of a Polynomial	64
2.2.7	Irreducible Polynomials	66
2.2.8	Chebyshev Polynomials	68
2.3	Linear Algebra	71
2.3.1	Operations with Matrices	71
2.3.2	Determinants	72
2.3.3	The Inverse of a Matrix	78
2.3.4	Systems of Linear Equations	82
2.3.5	Vector Spaces, Linear Combinations of Vectors, Bases	86
2.3.6	Linear Transformations, Eigenvalues, Eigenvectors	88
2.3.7	The Cayley-Hamilton and Perron-Frobenius Theorems	91

2.4	Abstract Algebra	96
2.4.1	Binary Operations	96
2.4.2	Groups.	98
2.4.3	Rings.	103
3	Real Analysis	107
3.1	Sequences and Series	108
3.1.1	Search for a Pattern	108
3.1.2	Linear Recursive Sequences	110
3.1.3	Limits of Sequences	114
3.1.4	More About Limits of Sequences	120
3.1.5	Series	126
3.1.6	Telescopic Series and Products	131
3.2	Continuity, Derivatives, and Integrals	136
3.2.1	Functions	136
3.2.2	Limits of Functions	138
3.2.3	Continuous Functions	140
3.2.4	The Intermediate Value Property	143
3.2.5	Derivatives and Their Applications	146
3.2.6	The Mean Value Theorem	151
3.2.7	Convex Functions	154
3.2.8	Indefinite Integrals.	160
3.2.9	Definite Integrals.	163
3.2.10	Riemann Sums	166
3.2.11	Inequalities for Integrals.	168
3.2.12	Taylor and Fourier Series	172
3.3	Multivariable Differential and Integral Calculus	180
3.3.1	Partial Derivatives and Their Applications	180
3.3.2	Multivariable Integrals	186
3.3.3	The Many Versions of Stokes' Theorem	190
3.4	Equations with Functions as Unknowns	195
3.4.1	Functional Equations	195
3.4.2	Ordinary Differential Equations of the First Order	201
3.4.3	Ordinary Differential Equations of Higher Order	204
3.4.4	Problems Solved with Techniques of Differential Equations	207
4	Geometry and Trigonometry	211
4.1	Geometry	211
4.1.1	Vectors	211
4.1.2	The Coordinate Geometry of Lines and Circles.	216
4.1.3	Quadratic and Cubic Curves in the Plane	221
4.1.4	Some Famous Curves in the Plane	230
4.1.5	Coordinate Geometry in Three and More Dimensions	232
4.1.6	Integrals in Geometry	237
4.1.7	Other Geometry Problems	240

4.2	Trigonometry	243
4.2.1	Trigonometric Identities	243
4.2.2	Euler's Formula	246
4.2.3	Trigonometric Substitutions	249
4.2.4	Telescopic Sums and Products in Trigonometry	253
5	Number Theory	257
5.1	Integer-Valued Sequences and Functions.	257
5.1.1	Some General Problems	257
5.1.2	Fermat's Infinite Descent Principle	260
5.1.3	The Greatest Integer Function	261
5.2	Arithmetic.	264
5.2.1	Factorization and Divisibility	264
5.2.2	Prime Numbers	265
5.2.3	Modular Arithmetic	269
5.2.4	Fermat's Little Theorem.	271
5.2.5	Wilson's Theorem	274
5.2.6	Euler's Totient Function.	275
5.2.7	The Chinese Remainder Theorem	278
5.2.8	Quadratic Integer Rings	280
5.3	Diophantine Equations	282
5.3.1	Linear Diophantine Equations	282
5.3.2	The Equation of Pythagoras	285
5.3.3	Pell's Equation	287
5.3.4	Other Diophantine Equations	289
6	Combinatorics and Probability	291
6.1	Combinatorial Arguments in Set Theory	291
6.1.1	Combinatorics of Sets	291
6.1.2	Combinatorics of Numbers	293
6.1.3	Permutations.	295
6.2	Combinatorial Geometry	298
6.2.1	Tessellations	298
6.2.2	Miscellaneous Combinatorial Geometry Problems	302
6.3	Graphs	305
6.3.1	Some Basic Graph Theory	305
6.3.2	Euler's Formula for Planar Graphs	309
6.3.3	Ramsey Theory.	311
6.4	Binomial Coefficients and Counting Methods	313
6.4.1	Combinatorial Identities	313
6.4.2	Generating Functions	318
6.4.3	Counting Strategies	321
6.4.4	The Inclusion-Exclusion Principle	327
6.5	Probability	330
6.5.1	Equally Likely Cases	330
6.5.2	Establishing Relations Among Probabilities	333
6.5.3	Geometric Probabilities	337

Methods of Proof.	341
Algebra.	375
Real Analysis	493
Geometry and Trigonometry	643
Number Theory.	717
Combinatorics and Probability	771
Index of Notation	845
Index	847

Putnam and Beyond

Gelca, R.; Andreescu, T.

2017, XVIII, 850 p. 297 illus., Softcover

ISBN: 978-3-319-58986-2
