

Contents

Algorithms

Pattern Classification with Rejection Using Cellular Automata-Based Filtering.	3
<i>Agnieszka Jastrzebska and Rafael Toro Sluzhenko</i>	
Distributed NVRAM Cache – Optimization and Evaluation with Power of Adjacency Matrix.	15
<i>Artur Malinowski and Paweł Czarnul</i>	
Optimal Controlled Random Tests.	27
<i>Ireneusz Mrozek and Vyacheslav Yarmolik</i>	
Tabu Search and Greedy Algorithm Adaptation to Logistic Task.	39
<i>Kamil Musiał, Joanna Kotowska, Dagmara Górnicka, and Anna Burduk</i>	
Evolutionary Algorithm for the Time-Dependent Orienteering Problem	50
<i>Krzysztof Ostrowski</i>	
Optimalization of Parallel GNG by Neurons Assigned to Processes.	63
<i>Lukáš Vojáček, Pavla Dráždilová, and Jiří Dvorský</i>	
Methodology for the Development of Accessible User Interfaces Based on Meta-Model Transformations: The Case of Blind Users.	73
<i>Lamia Zouhaier, Yousra Bendaly Hlaoui, and Leila Jemni Ben Ayed</i>	

Biometrics and Pattern Recognition Applications

SVM Kernel Configuration and Optimization for the Handwritten Digit Recognition	87
<i>Monika Drewnik and Zbigniew Pasternak-Winiarski</i>	
Object Classification Using Sequences of Zernike Moments.	99
<i>Aneta Górniak and Ewa Skubalska-Rafajłowicz</i>	
New Year's Day Speeches of Czech Presidents: Phonetic Analysis and Text Analysis.	110
<i>Milan Jičínský and Jaroslav Marek</i>	
Classifier Selection for Motor Imagery Brain Computer Interface	122
<i>Izabela Rejer and Robert Burduk</i>	

A Multimodal Face and Fingerprint Recognition Biometrics System	131
<i>Maciej Szymbkowski and Khalid Saeed</i>	

Keystroke Dynamics and Finger Knuckle Imaging Fusion for Continuous User Verification.	141
<i>Tomasz Emanuel Wesołowski, Rafał Doroz, Krzysztof Wrobel, and Hossein Safaverdi</i>	

Data Analysis and Information Retrieval

NMF in Screening Some Spirometric Data, an Insight into 12-Dimensional Data Space.	155
<i>Anna M. Bartkowiak and Jerzy Liebhart</i>	

Gesture Recognition in 3D Space Using Dimensionally Reduced Set of Features	167
<i>Łukasz Gadomer and Marcin Skoczylas</i>	

Using Cluster–Context Fuzzy Decision Trees in Fuzzy Random Forest	180
<i>Łukasz Gadomer and Zenon A. Sosnowski</i>	

Split-and-merge Tweak in Cross Entropy Clustering	193
<i>Krzysztof Hajto, Konrad Kamieniecki, Krzysztof Misztal, and Przemysław Spurek</i>	

Evaluation of Chord and Chroma Features and Dynamic Time Warping Scores on Cover Song Identification Task	205
<i>Ladislav Maršík, Martin Rusek, Kateřina Slaninová, Jan Martinovič, and Jaroslav Pokorný</i>	

Algorithms for Automatic Selection of Allophones to the Acoustic Units Database	218
<i>Janusz Rafalko</i>	

Engineering of Enterprise Software Products

Blockchain Transaction Analysis Using Dominant Sets	229
<i>Malik Khurram Awan and Agostino Cortesi</i>	

Ontology Driven Conceptualization of Context-Dependent Data Streams and Streaming Databases	240
<i>Shreya Banerjee and Anirban Sarkar</i>	

Towards the Exploitation of Statistical Language Models for Sentiment Analysis of Twitter Posts	253
<i>Sukriti Bhattacharya and Prasun Banerjee</i>	

POMSec: Pseudo-Opportunistic, Multipath Secured Routing Protocol for Communications in Smart Grid	264
<i>Manali Chakraborty, Novarun Deb, and Nabendu Chaki</i>	
Context Driven Approach for Enterprise Architecture Framework	277
<i>Priyanka Chakraborty and Anirban Sarkar</i>	
Localization based Anti-Void Clustering Approach (LAVCA) for Energy Efficient Routing in Wireless Sensor Network	290
<i>Ayan Kumar Das and Rituparna Chaki</i>	
Expressing and Applying C++ Code Transformations for the HDF5 API Through a DSL.	303
<i>Martin Golasowski, João Bispo, Jan Martinovič, Kateřina Slaninová, and João M.P. Cardoso</i>	
Clustering of Mobile Subscriber's Location Statistics for Travel Demand Zones Diversity	315
<i>Marcin Luckner, Aneta Roslan, Izabela Krzemińska, Jarosław Legierski, and Robert Kunicki</i>	
Share Market Sectoral Indices Movement Forecast with Lagged Correlation and Association Rule Mining	327
<i>Giridhar Maji, Soumya Sen, and Amitrajit Sarkar</i>	
Task Allocation Strategies for FPGA Based Heterogeneous System on Chip	341
<i>Atanu Majumder, Sangeet Saha, and Amlan Chakrabarti</i>	
Productivity Oriented Cooperative Approach to Scheduling IT Project Tasks	354
<i>Tadeusz Nowicki and Robert Waszkowski</i>	
Sequential Purchase Recommendation System for E-Commerce Sites	366
<i>Shivani Saini, Sunil Saumya, and Jyoti Prakash Singh</i>	

Industrial Management and Other Applications

Risk Assessment in a Parallel Production System with the Use of FMEA Method and Linguistic Variables.	379
<i>Anna Burduk and Damian Krenczyk</i>	
The Multi Depot One-to-One Pickup and Delivery Problem with Distance Constraints: Real World Application and Heuristic Solution Approach.	391
<i>Olfa Chebbi and Ezzeddine Fatnassi</i>	

Detection of ‘Orange Skin’ Type Surface Defects in Furniture Elements with the Use of Textural Features	402
<i>Michał Kruk, Bartosz Świderski, Katarzyna Śmiałowska, Jarosław Kurek, Leszek J. Chmielewski, Jarosław Górski, and Arkadiusz Orłowski</i>	
Smart Building Climate Control Considering Indoor and Outdoor Parameters	412
<i>Batyrkhan Omarov, Aigerim Altayeva, and Young Im Cho</i>	
Service Strategies in Two-Server Tandem Configurations – Modeling and Investigation.	423
<i>Walenty Oniszczyk</i>	
Image-Driven Decision Making with Application to Control Gas Burners . . .	436
<i>Ewaryst Rafajłowicz and Wojciech Rafajłowicz</i>	
Sparse Random Projections of Camera Images for Monitoring of a Combustion Process in a Gas Burner	447
<i>Ewa Skubalska-Rafajłowicz</i>	
Modelling and Optimization	
Rough Sets in Imbalanced Data Problem: Improving Re-sampling Process	459
<i>Katarzyna Borowska and Jarosław Stepaniuk</i>	
A Model of Machine Learning Based Interactive E-business Website	470
<i>Germanas Budnikas</i>	
Towards Golden Rule of Capital Accumulation: A Genetic Algorithm Approach	481
<i>Sankhadeep Chatterjee, Rhitaban Nag, Soumya Sen, and Amitrajit Sarkar</i>	
A Multi-agent System Model for the Personal Rapid Transit System	492
<i>Ezzeddine Fatnassi and Hadhami Kaabi</i>	
Fractional-Order Linear Systems Modeling in Time and Frequency Domains.	502
<i>Wiktor Jakowluk</i>	
Maximization of Attractiveness EV Tourist Routes	514
<i>Joanna Karbowska-Chilinska and Pawel Zabielski</i>	
Synthesis Method of Finite State Machines Based on State Minimization for Low Power Design.	526
<i>Adam Klimowicz</i>	

Self-organizing Traffic Signal Control with Prioritization Strategy Aided by Vehicular Sensor Network	536
<i>Marcin Lewandowski, Bartłomiej Placzek, and Marcin Bernas</i>	
Infinite Impulse Response Approximations to the Non-integer Order Integrator Using Cuckoo Search Algorithm	548
<i>Shibendu Mahata, Suman Kumar Saha, Rajib Kar, and Durbadal Mandal</i>	
Designing Moore FSM with Transformation of State Codes	557
<i>Kamil Mielcarek, Alexander Barkalov, and Larisa Titarenko</i>	
Efficient Simulation of Interacting Particle Systems in Continuous Space and Time	569
<i>Tomasz Ożański</i>	
Sampling Method for the Flow Shop with Uncertain Parameters	580
<i>Paweł Rajba and Mieczysław Wodecki</i>	
State Assignment of Finite-State Machines by Using the Values of Input Variables	592
<i>Valery Salauyou and Michal Ostapczuk</i>	
Nonnegative Matrix Factorization Based Decomposition for Time Series Modelling	604
<i>Tatjana Sidekerskienė, Marcin Woźniak, and Robertas Damaševičius</i>	
Various Aspects of Computer Security	
Evil-AP - Mobile Man-in-the-Middle Threat	617
<i>Kamil Breński, Maciej Chohuj, and Marcin Luckner</i>	
Intention to Adopt the Cash on Delivery (COD) Payment Model for E-commerce Transactions: An Empirical Study	628
<i>Mohanad Halaweh</i>	
A Signature Scheme Based on Implicit and Explicit Certificates Against k -Traitors Collusion Attack	638
<i>Tomasz Hyla and Jerzy Pejaś</i>	
Netflow-Based Malware Detection and Data Visualisation System.	652
<i>Rafał Kozik, Robert Młodzikowski, and Michał Choraś</i>	
Application of XGBoost Algorithm in Fingerprinting Localisation Task	661
<i>Marcin Luckner, Bartosz Topolski, and Magdalena Mazurek</i>	

Developing Countermeasures against Cloning of Identity Tokens in Legacy Systems	672
<i>Pavel Moravec and Michal Krumnikl</i>	
Analysis of Specific Personal Information Protection Assessment in the Social Security and Tax Number System of Local Governments in Japan. . . .	685
<i>Sanggyu Shin, Yoichi Seto, Mayumi Sasaki, and Kei Sakamoto</i>	
The Implementation of Electronic Document in Transaction Execution	697
<i>Gerard Wawrzyniak and Imed El Fray</i>	
Author Index	709

Computer Information Systems and Industrial
Management

16th IFIP TC8 International Conference, CISIM 2017,
Bialystok, Poland, June 16-18, 2017, Proceedings
Saeed, K.; Homenda, W.; Chaki, R. (Eds.)

2017, XXII, 710 p. 251 illus., Softcover

ISBN: 978-3-319-59104-9
