

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	General	1
1.2	Methods and Objects	3
	References	5
<b>2</b>	<b>Mineral-Concentrators of Nanogold</b>	7
2.1	Sulfides	7
2.2	Gold	13
2.2.1	Ensembles of Micro- and Nanoparticles	14
2.2.2	The Morphology of Gold Nanoparticles	14
2.2.3	The Generations of Nanoparticles	15
2.2.4	Regularities of Nanogold Location on the Surface of the Matrix Gold	17
2.2.5	The Density of Gold Nanoparticles on the Surface	21
2.2.6	The Chemical Composition of Gold Nanoparticles	21
2.2.7	Nanoscale Particles in the Internal Structure of Gold	22
2.3	Platinum Group Metals	23
2.4	Goethite	28
2.5	Quartz	29
2.6	Halides	30
2.7	Clay Minerals	30
2.8	Magnetite	31
2.9	Carbonates	33
2.10	Feldspars	33
	References	34
<b>3</b>	<b>Aggregates of Gold Nanoparticles</b>	41
3.1	Some Theoretical Basis	41
3.2	Previous Studies	42
3.3	Morphological Types of Nanogold Aggregates	42

3.4	Taxonomy of Aggregates by Their Size and Number of Nanoparticles . . . . .	50
3.5	Division of Aggregates on the Dimensions of Nanoparticles . . . .	53
3.6	Division of Aggregates on the Density of Space Filling . . . . .	53
3.7	Multi-level Structure of Aggregates . . . . .	55
3.8	Regularities of the Location of Aggregates on the Metal Surface . . . . .	57
3.9	Taxonomy of Aggregates on the Chemical Composition of Gold Nanoparticles . . . . .	58
	References . . . . .	65
<b>4</b>	<b>“Aggregate” Gold on the Nanoscale . . . . .</b>	<b>69</b>
4.1	Preface . . . . .	69
4.2	The Morphological Features of “Aggregate” Gold . . . . .	70
4.3	The Structure of Globules in “Aggregate” Gold . . . . .	75
4.4	Structural Features of Interglobular Space . . . . .	78
4.5	Massive Gold with Growths of Authigenic Metal on the Surface . . . . .	81
4.6	Intergrowths of “Aggregate” and Crystal Gold . . . . .	84
4.7	Features of Object Testing on “Aggregate” Gold . . . . .	85
	References . . . . .	86
<b>5</b>	<b>Genesis of Natural Nanogold . . . . .</b>	<b>87</b>
5.1	Nanolayering as a Reflection of the Laws of Crystal Growth . . .	87
5.2	The Origin Processes of Natural Gold Nanoparticles . . . . .	89
5.2.1	Crystallization from a Magmatic Melt . . . . .	90
5.2.2	Nanoparticles of Gold in Hydrothermal Ore Bodies . . . .	91
5.2.3	Metamorphic and Metasomatic Transformation of Rocks with the Release of Nanogold . . . . .	91
5.2.4	The Release of Nanogold from Sulfides in the Weathered Rocks . . . . .	92
5.2.5	Ultra-Dispersive Weathering Processes of Gold-Bearing Rocks . . . . .	93
5.2.6	Mechanical Abrasion of Gold During Migration . . . . .	94
5.2.7	Metacolloidal Mineral Formation in Aqueous Systems . . . . .	96
5.2.8	Deposition of Nanogold by Ferruginous Substance . . . .	97
5.2.9	Deposition of Nanogold from Chloride Solutions . . . . .	97
5.2.10	Sorption of Gold by Carbonaceous Matter . . . . .	98
5.2.11	Concentration of Nanogold in the Life Cycle of Organisms . . . . .	101
5.3	The Mechanisms of Nanogold Aggregation . . . . .	109
5.3.1	Aggregation Under the Influence of High Surface Energy of Nanoparticles . . . . .	109
5.3.2	Natural Amalgamation . . . . .	111

5.3.3	The Activity of Organisms . . . . .	116
5.3.4	Flotation Mechanism. . . . .	117
5.3.5	“Growing Old” of Colloids. . . . .	118
5.4	Geological Formations Conducive to Concentration of Nanogold. . . . .	118
	References . . . . .	121
<b>6</b>	<b>The Problems of Nanogold Development . . . . .</b>	<b>127</b>
6.1	The State of the Theoretical Basis of Gold Nanomineralogy . . . .	127
6.2	Perspective Objects . . . . .	129
6.3	On the Methods of Studying of Objects with Nanogold . . . . .	130
6.4	Prospecting Value of Nanogold . . . . .	133
6.5	Industrial Technologies of Nanogold Extraction. . . . .	134
	References . . . . .	138
<b>7</b>	<b>Conclusion. . . . .</b>	<b>143</b>

Natural Nanogold

Osovetsky, B.

2017, VII, 145 p. 93 illus., 1 illus. in color., Hardcover

ISBN: 978-3-319-59158-2
