<b>1</b>	<b>On a Continuous Energy Monte Carlo Simulator for Neutron Transport: Optimisation with Fission, Intermediate and Thermal Distributions</b>	<b>1</b>
	L.F.F. Chaves Barcellos, B.E.J. Bodmann, S.Q. Bogado Leite, and M.T. Vilhena	
1.1	Introduction	1
1.2	Neutron Transport by a Monte Carlo Method	2
1.3	Program Description	2
1.4	Nuclear Reactions	4
1.5	Coupled Distributions	7
1.6	Results	7
1.7	Conclusions and Future Work	9
	References	10
<b>2</b>	<b>The Use of Similarity Indices in the Analysis of Temporal Distribution of Mammals</b>	<b>11</b>
	M. Belmaker	
2.1	Introduction	11
2.2	The Case Study	12
2.3	The Statistical Model	14
2.4	Results	17
2.5	Discussion and Conclusion	17
	References	19
<b>3</b>	<b>The Method of Superposition for Near-Field Acoustic Holography in a Semi-anechoic Chamber</b>	<b>21</b>
	D.J. Chappell and N.M. Abusag	
3.1	Introduction	21
3.2	Method of Superposition	21
3.3	Near-Field Acoustic Holography in a Half-Space	23
3.4	Regularisation and Sparse Reconstruction	23

3.5	Numerical Results .....	24
3.6	Conclusions .....	29
	References .....	29
<b>4</b>	<b>Application of Stochastic Dynamic Programming in Demand Dispatch-Based Optimal Operation of a Microgrid .....</b>	<b>31</b>
	F. Daburi Farimani and H. Rajabi Mashhadi	
4.1	Introduction .....	31
4.2	Problem Description .....	33
4.3	Stochastic Dynamic Programming .....	35
4.4	Inventory Control Model .....	35
4.5	Problem Formulation by SDP (Inventory Control Model) .....	35
4.6	Lemma .....	37
4.7	Solution Approach: Step by Step .....	38
4.8	Summary and Conclusion .....	41
	References .....	42
<b>5</b>	<b>Spectral Boundary Element Algorithms for Multi-Length Interfacial Dynamics .....</b>	<b>43</b>
	P. Dimitrakopoulos	
5.1	Introduction .....	43
5.2	Mathematical Formulation .....	43
5.3	Interfacial Spectral Boundary Element Algorithms .....	46
5.4	Multi-Length Interfacial Dynamics Problems .....	48
	References .....	51
<b>6</b>	<b>Kinect Depth Recovery Based on Local Filters and Plane Primitives .....</b>	<b>53</b>
	M.A. Esfahani and H. Pourreza	
6.1	Introduction .....	53
6.2	Proposed Method .....	56
6.3	Experimental Results .....	58
6.4	Conclusion .....	61
	References .....	62
<b>7</b>	<b>On the Neutron Point Kinetic Equation with Reactivity Decomposition Based on Two Time Scales .....</b>	<b>65</b>
	C.E. Espinosa, B.E.J. Bodmann, and M.T. Vilhena	
7.1	Introduction .....	65
7.2	Neutron Poisons .....	66
7.3	Point Kinetics with Poisons .....	66
7.4	Solution by Decomposition .....	67
7.5	Numerical Results .....	68
7.6	Algorithm Stability .....	70
7.7	Conclusions .....	72
	References .....	75

<b>8</b>	<b>Iterated Kantorovich vs Kulkarni Method for Fredholm Integral Equations</b> .....	77
	R. Fernandes and F.D. d' Almeida	
8.1	Introduction .....	77
8.2	Details of Implementation in the Case of Weakly Singular Kernels .....	79
8.3	Numerical Results .....	82
8.4	Conclusion .....	83
	References .....	84
<b>9</b>	<b>Infiltration Simulation in Porous Media: A Universal Functional Solution for Unsaturated Media</b> .....	85
	I.C. Furtado, B.E.J. Bodmann, and M.T. Vilhena	
9.1	Introduction .....	85
9.2	Modelling Infiltration by the Richards Equation .....	86
9.3	The Parametrised Solution .....	88
9.4	Comparison to Benchmark Simulations (HYDRUS) and Self-Consistency Test .....	90
9.5	Conclusions .....	91
	References .....	95
<b>10</b>	<b>Mathematical Models of Cell Clustering Due to Chemotaxis</b> .....	97
	P.J. Harris	
10.1	Introduction .....	97
10.2	Simple Model .....	98
10.3	Boundary Integral Model .....	99
10.4	Numerical Results .....	101
10.5	Conclusions .....	104
	References .....	104
<b>11</b>	<b>An Acceleration Approach for Fracture Problems in the Extended Boundary Element Method (XBEM) Framework</b> .....	105
	G. Hattori, S.H. Kettle, L. Campos, J. Trevelyan, and E.L. Albuquerque	
11.1	Introduction .....	105
11.2	Extended Boundary Element Method .....	106
11.3	Adaptive Cross Approximation .....	107
11.4	Results .....	110
11.5	Conclusions .....	112
	References .....	112
<b>12</b>	<b>Flux Characterization in Heterogeneous Transport Problems by the Boundary Integral Method</b> .....	115
	R.D. Hazlett	
12.1	Introduction .....	115
12.2	Boundary Integral Method for Coupled Analytic Solutions .....	116
12.3	Numerical Boundary Integral Evaluation .....	117

12.4	Piecewise Continuous Solutions .....	120
12.5	Parametric Methods .....	120
12.6	Prolongation .....	120
12.7	Conclusions.....	121
	References.....	124
<b>13</b>	<b>GPU Based Mixed Precision PWR Depletion Calculation .....</b>	<b>127</b>
	A. Heimlich, A.C.A. Alvim, F.C. Silva, and A.S. Martinez	
13.1	Introduction.....	127
13.2	Theory .....	128
13.3	Exponential Matrix.....	130
13.4	Runge-Kutta Methods.....	131
	13.4.1 Runge-Kutta-Fehlberg.....	131
13.5	Adams-Moulton-Bashford Method.....	133
13.6	Results .....	135
13.7	Conclusions and Further Developments.....	136
	References.....	136
<b>14</b>	<b>2D Gauss-Hermite Quadrature Method for Jump-Diffusion PIDE Option Pricing Models .....</b>	<b>137</b>
	L. Jódar, M. Fakharany, and R. Company	
14.1	Introduction.....	137
14.2	Mixed Derivative Elimination .....	139
14.3	Numerical Scheme Construction and Properties.....	140
14.4	Numerical Example .....	144
	References.....	145
<b>15</b>	<b>Online Traffic Prediction Using Time Series: A Case study .....</b>	<b>147</b>
	M. Karimpour, A. Karimpour, K. Kompany, and Ali Karimpour	
15.1	Introduction.....	147
15.2	Traffic Modeling by Mixed Logic Dynamic .....	148
15.3	In-Flow Rate Prediction.....	152
15.4	Experimental Results.....	153
15.5	Conclusion and Discussion .....	155
	References.....	156
<b>16</b>	<b>Mathematical Modeling of One-Dimensional Oil Displacement by Combined Solvent-Thermal Flooding .....</b>	<b>157</b>
	T. Marotto, A. Pires, and F. Forouzanfar	
16.1	Introduction.....	157
16.2	Physical and Mathematical Model .....	158
16.3	Example of Solution .....	162
16.4	Conclusions.....	165
	References.....	167

<b>17 Collocation Methods for Solving Two-Dimensional Neural Field Models on Complex Triangulated Domains.....</b>	<b>169</b>
R. Martin, D.J. Chappell, N. Chuzhanova, and J.J. Crofts	
17.1 Introduction.....	169
17.2 A Two-Dimensional Neural Field Model .....	170
17.3 The Collocation Method .....	171
17.4 Results .....	173
17.5 Conclusions.....	175
References.....	177
<b>18 Kulkarni Method for the Generalized Airfoil Equation.....</b>	<b>179</b>
A. Mennouni	
18.1 Mathematical Background .....	179
18.2 Description of the Method .....	181
18.3 Convergence Analysis.....	182
18.4 Numerical Example .....	185
References.....	185
<b>19 Droplet Deposition and Coalescence in Curved Pipes .....</b>	<b>187</b>
H. Nguyen, R. Mohan, O. Shoham, and G. Kouba	
19.1 Introduction.....	187
19.2 Experimental Program .....	188
19.2.1 Test Facility .....	188
19.2.2 Experimental Results .....	190
19.3 Modeling and Results .....	194
19.3.1 Physical Model .....	194
19.3.2 Conservation of Angular Momentum.....	195
19.3.3 Droplet Size Distribution.....	196
19.3.4 Droplet Deposition Criterion.....	197
19.3.5 Results and Discussion .....	198
References.....	199
<b>20 Shifting Strategy in the Spectral Analysis for the Spectral Green's Function Nodal Method for Slab-Geometry Adjoint Transport Problems in the Discrete Ordinates Formulation .....</b>	<b>201</b>
J.P. Curbelo, O.P. da Silva, C.R. García, and R.C. Barros	
20.1 Introduction.....	201
20.2 The Adjoint $S_N$ Problem .....	202
20.2.1 Detector Response for Adjoint Problems.....	203
20.3 Spectral Analysis .....	203
20.4 The Adjoint Spectral Green's Function Method (Adjoint-SGF) ...	204
20.5 The Partial One-Node Block Inversion Iterative Scheme .....	206
20.6 Numerical Examples .....	208
20.7 Conclusions and Perspectives.....	209
References.....	210

<b>21</b>	<b>A Metaheuristic Approach for an Optimized Design of a Silicon Carbide Operational Amplifier .....</b>	<b>211</b>
	M. Pourreza and S. Kargarrazi	
21.1	Introduction.....	211
21.2	Circuit Design .....	212
21.3	Metaheuristic Optimization .....	214
21.4	Results .....	216
21.5	Conclusions.....	217
