# Contents

<b>1</b>	<b>The Fourier Transforms</b>	1
1.1	Introduction	1
1.2	The Fourier Transform in $L^1(\mathbb{R})$	3
1.3	The Fourier Transform in $L^2(\mathbb{R})$	17
1.4	The Discrete Fourier Transform	25
1.5	The Fast Fourier Transform	31
1.6	The Fractional Fourier Transform	34
1.7	The Uncertainty Principle	50
1.8	Exercises	53
<b>2</b>	<b>The Time-Frequency Analysis</b>	55
2.1	Introduction	55
2.2	The Time-Frequency Localization	56
2.3	The Gabor Transforms	61
2.4	The Zak Transform	71
2.5	The Windowed Linear Canonical Transform	79
2.6	Exercises	90
<b>3</b>	<b>The Wavelet Transforms</b>	93
3.1	Introduction	93
3.2	The Continuous Wavelet Transform	95
3.3	The Discrete Wavelet Transform	106
3.4	Orthonormal Wavelets	109
3.5	The Fractional Wavelet Transform	111
3.6	Exercises	120
<b>4</b>	<b>Construction of Wavelets via MRA</b>	123
4.1	Introduction	123
4.2	Multiresolution Analysis in $L^2(\mathbb{R})$	124
4.3	Construction of Mother Wavelet	128
4.4	The Fast Wavelet Transform	149
4.5	Exercises	151

---

<b>5</b>	<b>Elongations of MRA-Based Wavelets</b> .....	155
5.1	Introduction .....	155
5.2	The Spline Wavelets .....	156
5.3	The Daubechies Wavelets.....	166
5.4	The Harmonic Wavelets .....	184
5.5	The Nonuniform Wavelets.....	195
5.6	Exercises.....	206
	<b>Bibliography</b> .....	211
	<b>Index</b> .....	217

Lecture Notes on Wavelet Transforms

Debnath, L.; Shah, F.

2017, XII, 220 p. 32 illus., 3 illus. in color., Softcover

ISBN: 978-3-319-59432-3

A product of Birkhäuser Basel
