

Contents

Linear Barycentric Rational Interpolation with Guaranteed Degree of Exactness	1
Jean-Paul Berrut	
Approximation by C^1 Splines on Piecewise Conic Domains	21
Oleg Davydov and Wee Ping Yeo	
A Rescaled Method for RBF Approximation	39
Stefano De Marchi, Andrea Idda and Gabriele Santin	
Flavors of Compressive Sensing	61
Simon Foucart	
Computing with Functions on Domains with Arbitrary Shapes	105
Daan Huybrechs and Roel Matthysen	
A Polygonal Spline Method for General Second-Order Elliptic Equations and Its Applications	119
Ming-Jun Lai and James Lanterman	
An Adaptive Triangulation Method for Bivariate Spline Solutions of PDEs	155
Ming-Jun Lai and Clayton Mersmann	
Refinable Functions with PV Dilations	177
Wayne Lawton	
Polyhyperbolic Cardinal Splines	189
Jeff Ledford	
Adaptive Computation with Splines on Triangulations with Hanging Vertices	197
Shiying Li and Larry L. Schumaker	

Scaling Limits of Polynomials and Entire Functions of Exponential Type	219
D.S. Lubinsky	
Generalized B-Splines in Isogeometric Analysis	239
Carla Manni, Fabio Roman and Hendrik Speleers	
On Polynomials with Vanishing Hessians and Some Density Problems	269
Tom McKinley and Boris Shekhtman	
Batched Stochastic Gradient Descent with Weighted Sampling	279
Deanna Needell and Rachel Ward	
A Fractional Spline Collocation Method for the Fractional-order Logistic Equation	307
Francesca Pitolli and Laura Pezza	
The Complete Length Twelve Parametrized Wavelets	319
David W. Roach	
Potential Theoretic Approach to Design of Accurate Numerical Integration Formulas in Weighted Hardy Spaces	335
Ken'ichiro Tanaka, Tomoaki Okayama and Masaaki Sugihara	
A Class of Intrinsic Trigonometric Mode Polynomials	361
Vesselin Vatchev	
Kernel-Based Approximation Methods for Partial Differential Equations: Deterministic or Stochastic Problems?	375
Qi Ye	

Approximation Theory XV: San Antonio 2016

Fasshauer, G.E.; Schumaker, L. (Eds.)

2017, X, 398 p. 86 illus., 67 illus. in color., Hardcover

ISBN: 978-3-319-59911-3
