Part I Present and Future of Smart Cities

1	Introduction to Smart Cities and a Vision of Cyber-Human Cities . . .	3
1.1	Architecture of Values	4
1.2	Smart City Platform	7
1.3	Stakeholders	9
1.4	Complex Coordinated Activities	9
1.5	Incentives as a Soft Controllability Principle	10
1.6	Citizen Informedness	11
1.7	Provisioning and Governing Infrastructure as a Utility	13
1.8	Summary & Organization of the Book	14

Part II Provisioning and Governing Smart City Systems

2	State Of The Art & Related Work	21
2.1	Overview of Development Support for IoT Cloud Applications	21
2.2	Provisioning Approaches in the IoT Cloud	23
2.3	IoT Cloud Governance Approaches	25
3	Provisioning Smart City Infrastructure	27
3.1	Research Context	29
3.1.1	Scenarios	29
3.1.2	Provisioning BMS	30
3.1.3	Research Challenges	31
3.2	Main Building Blocks of Software-Defined IoT Systems	32
3.2.1	Design Principles of Software-Defined IoT Cloud Systems .	32
3.2.2	Conceptual Model of Software-Defined IoT Units	34
3.2.3	Unit Classification	36
3.3	Main Techniques for Provisioning Software-Defined IoT Cloud Systems	38
3.3.1	Automated Composition of Software-Defined IoT Units	38

3.3.2	Centrally Managed Configuration Models	40
3.4	Prototype Implementation & Evaluation	41
3.4.1	Preliminary Implementation of Provisioning Controller	41
3.4.2	Experiments	42
3.5	Summary	46
4	Middleware for Utility-based Provisioning of Smart City	
	Infrastructure	47
4.1	Research Context	48
4.1.1	Research Challenges	50
4.2	IoT Cloud Provisioning Middleware	51
4.2.1	Software-Defined Gateways	51
4.2.2	Edge Device Middleware Support	55
4.2.3	Cloud-Based Provisioning Controller	57
4.3	Runtime Mechanisms for Multi-level Provisioning in the IoT Cloud	58
4.3.1	Runtime Execution of Provisioning Workflows	58
4.3.2	Evaluating Composite Predicates	60
4.3.3	Artifacts and SDGs Prototypes Runtime Validation	61
4.3.4	Provisioning Models	62
4.4	Prototype Implementation & Evaluation	63
4.5	Summary	70
5	Governing Smart City Systems	71
5.1	Research Context	73
5.2	GovOps – A Novel Methodology for Governance and Operations in IoT Cloud Systems	75
5.2.1	Governance Aspects	76
5.2.2	Operations Management Aspects	77
5.2.3	Integrating Governance Objectives with Operations Processes	77
5.2.4	Main Principles of GovOps in IoT Cloud Systems	79
5.3	A Reference Model for GovOps Methodology	79
5.3.1	Overview of the GovOps Model for IoT Cloud Systems	79
5.3.2	Design Process of GovOps Strategies	81
5.4	rtGovOps – A Runtime Framework for GovOps in Large-Scale IoT Cloud Systems	82
5.4.1	Operational Governance Capabilities	83
5.4.2	Operational Governance Processes and Governance Scopes .	85
5.4.3	Governance Controller and rtGovOps Agents	85
5.5	Main Runtime Mechanism of the rtGovOps Framework	87
5.5.1	Automated Provisioning of Governance Capabilities	88
5.5.2	rtGovOps APIs and Invocation of Governance Capabilities .	91
5.6	Prototype Implementation & Evaluation	93
5.6.1	Prototype Implementation	93
5.6.2	Setup of the Experiments	93
5.6.3	Governing FMS at Runtime	94

5.6.4	Results of the Experiments	96
5.6.5	Discussion and Lessons Learned	98
5.7	Summary	99

Part III Managing Smart City Social Infrastructure

6	State of the Art & Related Work	103
6.1	Overview of Existing Social-Computing Platforms	103
6.2	Theories of Motivation and Incentives	105
6.3	Incentive Management in Computer Science	109
7	Programmatic Management of Human Coordination and Collaboration Activities	113
7.1	Research Context	114
7.1.1	The SmartSociety Platform	114
7.2	Communication and Virtualization Middleware	121
7.2.1	Architecture	121
7.2.2	Messaging and Routing	122
7.2.3	Message Adapters	126
7.2.4	Privacy Functionalities	127
7.2.5	Implementation & Evaluation	128
7.3	Programming Model	130
7.3.1	Collective-Based Tasks (CBT)	131
7.3.2	Execution Model	135
7.3.3	Collectives	137
7.3.4	Application Context & Initialization	139
7.4	Language Constructs	142
7.4.1	Context Initialization Constructs	142
7.4.2	CBT Instantiation	143
7.4.3	CBT Lifecycle Operations	143
7.4.4	CBT Collective-Fetching Operations	145
7.4.5	Collective Manipulation Constructs	145
7.4.6	Collective-Level Communication	147
7.4.7	Examples	148
8	Incentive Management	153
8.1	Research Context	154
8.2	Existing Incentive and Rewarding Practices	157
8.2.1	Classification of Incentive Mechanisms	157
8.2.2	Composition of Incentive Mechanisms	163
8.2.3	Identifying Constituent Parts of Incentive Mechanisms	164
8.2.4	Incentive Mechanisms in Real-World Social Computing Platforms	172
8.3	Modeling Incentives for Use in Socio-Technical Systems	179
8.3.1	Comprehensive Incentive Model	180
8.3.2	Rewarding Model (The PRINC Framework)	183

8.3.3	Evaluating RMod Through Simulation	186
8.4	PRINGL – A Programming Framework for Incentive Management .	198
8.4.1	Overview	199
8.4.2	Programming Model	202
8.4.3	Execution Model	218
8.4.4	Evaluation	220
8.4.5	Implementation	233
8.4.6	Summary	235

Part IV Towards the Smart City of the Future

9	A Road Map to the Cyber-Human Smart City	239
9.1	Going Beyond the Contemporary Smart City – Horizontal Integration as a Value Generator	239
9.1.1	Managing and Exploiting Diversity	240
9.1.2	Making Citizens Active Smart City Stakeholders	242
9.1.3	Smart City Infrastructure Maintenance	244
9.2	Towards the Smart Cities of the Future	245
9.2.1	Utility-Based Consumption of Smart City Infrastructure and Services	247
9.2.2	Data Analytics in Smart City Facilities and Urban Processes	249
9.2.3	Social Orchestration & Activity Coordination – Supporting Complex Coordinated Activities	251
9.2.4	Incentive Management	253
9.2.5	Citizen Informedness	255
9.2.6	Infrastructural and Social Governance	256
9.3	Conclusion	257
	References	259
