<b>1</b>	<b>General Concepts in the Theory of Measurements . . . . .</b>	<b>1</b>
1.1	Basic Concepts and Terms . . . . .	1
1.2	The Basic Metrological Problems . . . . .	4
1.3	New Forms of International Cooperation in Metrology . . . . .	10
1.4	Postulates of the Theory of Measurements . . . . .	12
1.5	Classification of Measurements . . . . .	18
1.6	Classification of Measurement Errors . . . . .	23
1.7	General Approach to Evaluation of Measurement Inaccuracy . . . . .	25
1.8	Presentation of Measurement Results . . . . .	27
<b>2</b>	<b>Measuring Instruments and Their Properties . . . . .</b>	<b>31</b>
2.1	Types of Measuring Instruments . . . . .	31
2.2	Metrological Characteristics of Measuring Instruments . . . . .	33
2.3	Rating of the Errors of Measuring Instruments . . . . .	36
2.4	Dynamic Characteristics of Measuring Instruments . . . . .	49
2.5	Calibration and Verification of Measuring Instruments . . . . .	54
2.6	Designing a Calibration Scheme . . . . .	59
2.7	Statistical Analysis of Measuring Instrument Errors . . . . .	66
<b>3</b>	<b>Statistical Methods for Experimental Data Processing . . . . .</b>	<b>71</b>
3.1	Methods for Describing Random Quantities . . . . .	71
3.2	Requirements for Statistical Estimates . . . . .	75
3.3	Evaluation of the Parameters of the Normal Distribution . . . . .	77
3.4	Elimination of Outlying Data . . . . .	81
3.5	Construction of Confidence Intervals . . . . .	83
3.6	Reliability of Estimation of the Variance of a Sample from a Normal Distribution . . . . .	88
3.7	Reliability of Estimation of the Standard Deviation of the Mean of a Sample from a Normal Distribution . . . . .	89

3.8	Testing Hypotheses About the Form of the Distribution Function . . . . .	91
3.9	Testing for Homogeneity of Samples . . . . .	93
3.10	Robust Estimates . . . . .	100
3.11	Bootstrap Construction of Confidence Intervals . . . . .	103
3.12	Application of the Bayes' Theorem . . . . .	104
<b>4</b>	<b>Direct Measurements . . . . .</b>	<b>107</b>
4.1	Relation Between Single and Multiple Measurements . . . . .	107
4.2	Classification of Elementary Errors . . . . .	110
4.3	Modeling of Elementary Errors . . . . .	115
4.3.1	Absolutely Constant Errors . . . . .	115
4.3.2	Conditionally Constant Errors . . . . .	117
4.3.3	Purely Random Errors . . . . .	118
4.3.4	Quasirandom Errors . . . . .	118
4.4	Composition of Uniform Distributions . . . . .	119
4.5	Methods for Precise Measurements . . . . .	125
4.6	Accuracy of Single Measurements Using a Measuring Instrument Under Reference Conditions . . . . .	127
4.7	Accuracy of Single Measurements Using a Measuring Instrument Under Rated Conditions . . . . .	130
4.8	Comparison of Standard Deviation and Confidence Interval as Measurement Accuracy Indicators . . . . .	136
4.9	Accuracy of Multiple Direct Measurements . . . . .	139
4.10	Universal Method for Summation of Random and Systematic Errors . . . . .	143
4.11	Analysis of the Accuracy of the Universal Method for Summation of Systematic and Random Errors . . . . .	146
4.12	Comparison of Different Methods for Combining Systematic and Random Errors . . . . .	149
<b>5</b>	<b>Indirect Measurements . . . . .</b>	<b>155</b>
5.1	Terminology and Classification . . . . .	155
5.2	Correlation Coefficient and Its Calculation . . . . .	157
5.3	Constructing the Composition of Histograms . . . . .	159
5.4	Traditional Method of Measurement Data Processing . . . . .	168
5.5	Shortcomings of the Traditional Method . . . . .	173
5.6	Method of Reduction . . . . .	176
5.7	Method of Enumeration . . . . .	179
5.8	Accuracy of Single Indirect Measurements Under Reference Conditions for Instruments Involved . . . . .	183
5.9	Accuracy of Single Indirect Measurements Under Rated Conditions for Instruments Involved . . . . .	185
5.10	Accuracy of a Single Measurement with a Chain of Instruments . . . . .	186
5.11	The Monte Carlo Method . . . . .	188

<b>6</b>	<b>Combined and Simultaneous Measurements . . . . .</b>	<b>191</b>
6.1	General Remarks About the Method of Least Squares . . . . .	191
6.2	Measurements with Linear Equally Accurate Conditional Equations . . . . .	193
6.3	Measurements with Linear Unequally Accurate Conditional Equations . . . . .	196
6.4	Linearization of Nonlinear Conditional Equations . . . . .	198
6.5	Examples of the Application of the Method of Least Squares . . . . .	200
6.6	General Remarks on Determination of the Parameters in Formulas From Empirical Data . . . . .	205
6.7	Construction of Transfer Functions of Measuring Transducers . . . . .	207
<b>7</b>	<b>Combining the Results of Measurements . . . . .</b>	<b>213</b>
7.1	Introductory Remarks . . . . .	213
7.2	Theoretical Principles . . . . .	214
7.3	Effect of the Error of the Weights on the Error of the Weighted Mean . . . . .	218
7.4	Combining the Results of Measurements with Predominately Random Errors . . . . .	220
7.5	Combining the Results of Measurements Containing Both Systematic and Random Errors . . . . .	222
<b>8</b>	<b>Examples of Measurements and Measurement Data Processing . . .</b>	<b>227</b>
8.1	Voltage Measurement with a Pointer-Type Voltmeter . . . . .	227
8.1.1	Single Measurement Under Reference Condition of the Voltmeter . . . . .	228
8.1.2	Single Measurement Under Rated Condition of the Voltmeter . . . . .	230
8.2	Voltage Measurement with a Potentiometer and a Voltage Divider . . . . .	231
8.3	Comparison of Mass Measures . . . . .	236
8.4	Measurement of Electric Power at High Frequency . . . . .	238
8.5	An Indirect Measurement of the Electrical Resistance of a Resistor . . . . .	239
8.5.1	Application of the Traditional Method . . . . .	239
8.5.2	Application of the Method of Reduction . . . . .	242
8.6	Measurement of the Density of a Solid Body . . . . .	244
8.6.1	Application of the Traditional Method . . . . .	244
8.6.2	Application of Method of Enumeration . . . . .	247
8.7	Measurement of Ionization Current . . . . .	250
8.8	Measurement of the Activity of a Radioactive Source . . . . .	253

<b>9</b>	<b>The International Vocabulary of Metrology and the Guide to the Expression of Uncertainty in Measurement: Analysis, Criticism, and Recommendations . . . . .</b>	<b>257</b>
9.1	Introduction . . . . .	257
9.2	Critique of the “International Vocabulary of Metrology” . . . . .	259
9.3	Critique of the “Guide to the Expression of Uncertainty in Measurement” . . . . .	263
9.3.1	Scope of GUM . . . . .	263
9.3.2	Philosophy of GUM . . . . .	264
9.3.3	Terminology of the GUM . . . . .	264
9.3.4	Evaluation of the Uncertainty in the GUM . . . . .	266
9.4	Roots of the Drawbacks of GUM and VIM . . . . .	267
9.5	Perspectives on Fixing GUM and VIM . . . . .	269
<b>10</b>	<b>Step-by-Step Guide to the Evaluating of Measurement Accuracy . . . . .</b>	<b>271</b>
10.1	Introduction . . . . .	271
10.2	Conventions for Expressing Accuracy of Measuring Instruments . . . . .	271
10.2.1	Analog Instruments . . . . .	272
10.2.2	Digital Instruments . . . . .	272
10.3	Single Measurements . . . . .	274
10.3.1	Direct Single Measurements Under Reference Conditions . . . . .	274
10.3.2	Direct Single Measurements Under Rated Conditions . . . . .	277
10.3.3	Indirect Single Measurements Under Reference Conditions . . . . .	279
10.3.4	Indirect Single Measurements Under Rated Conditions . . . . .	282
10.4	Multiple Measurements . . . . .	284
10.4.1	Universal Method of Summation of Systematic and Random Errors . . . . .	284
10.4.2	Direct Multiple Measurements . . . . .	287
10.4.3	Linear Independent Indirect Multiple Measurements . . . . .	288
10.4.4	Nonlinear Independent Indirect Multiple Measurements: Method of Linearization . . . . .	290
10.4.5	Dependent Multiple Indirect Measurements: Method of Reduction . . . . .	293
10.4.6	Independent Indirect Multiple Measurements: Method of Enumeration . . . . .	295
