

Contents

In Vitro Modeling of Complex Neurological Diseases	1
Frank Soldner and Rudolf Jaenisch	
Aquatic Model Organisms in Neurosciences: The Genome-Editing Revolution	21
Jean-Stéphane Joly	
Genome-Wide Genetic Screening in the Mammalian CNS	31
Mary H. Wertz and Myriam Heiman	
CRISPR/Cas9-Mediated Knockin and Knockout in Zebrafish	41
Shahad Albadri, Flavia De Santis, Vincenzo Di Donato, and Filippo Del Bene	
Dissecting the Role of Synaptic Proteins with CRISPR	51
Salvatore Incontro, Cedric S. Asensio, and Roger A. Nicoll	
Recurrently Breaking Genes in Neural Progenitors: Potential Roles of DNA Breaks in Neuronal Function, Degeneration and Cancer	63
Frederick W. Alt, Pei-Chi Wei, and Bjoern Schwer	
Neuroscience Research Using Non-human Primate Models and Genome Editing	73
Noriyuki Kishi and Hideyuki Okano	
Multiscale Genome Engineering: Genome-Wide Screens and Targeted Approaches	83
Neville E. Sanjana	

Using Genome Engineering to Understand Huntington’s Disease 87
Barbara Bailus, Ningzhe Zhang, and Lisa M. Ellerby

Therapeutic Gene Editing in Muscles and Muscle Stem Cells 103
Mohammadsharif Tabebordbar, Jason Cheng, and Amy J. Wagers

Genome Editing in Neurosciences

Jaenisch, R.; Zhang, F.; Gage, F. (Eds.)

2017, XI, 123 p. 16 illus. in color., Hardcover

ISBN: 978-3-319-60191-5
