Part I Overview of Spatial Big Data Science

1 Spatial Big Data	3
1.1 What Is Spatial Big Data?	3
1.2 Societal Applications	6
1.3 Challenges	8
1.3.1 Implicit Spatial Relationships	8
1.3.2 Spatial Autocorrelation	9
1.3.3 Spatial Anisotropy	9
1.3.4 Spatial Heterogeneity	9
1.3.5 Multiple Scales and Resolutions	10
1.4 Organization of the Book	11
References	13
2 Spatial and Spatiotemporal Big Data Science	15
2.1 Input: Spatial and Spatiotemporal Data	16
2.1.1 Types of Spatial and Spatiotemporal Data	16
2.1.2 Data Attributes and Relationships	17
2.2 Statistical Foundations	18
2.2.1 Spatial Statistics for Different Types of Spatial Data	18
2.2.2 Spatiotemporal Statistics	20
2.3 Output Pattern Families	21
2.3.1 Spatial and Spatiotemporal Outlier Detection	21
2.3.2 Spatial and Spatiotemporal Associations, Tele- Connections	22
2.3.3 Spatial and Spatiotemporal Prediction	24
2.3.4 Spatial and Spatiotemporal Partitioning (Clustering) and Summarization	29
2.3.5 Spatial and Spatiotemporal Hotspot Detection	32

- 2.3.6 Spatiotemporal Change 34
- 2.4 Research Trend and Future Research Needs 35
- 2.5 Summary 37
- References 37

Part II Classification of Earth Observation Imagery Big Data

- 3 Overview of Earth Imagery Classification 47**
 - 3.1 Earth Observation Imagery Big Data 47
 - 3.2 Societal Applications 48
 - 3.3 Earth Imagery Classification Algorithms 50
 - 3.4 Generating Derived Features (Indices) 52
 - 3.5 Remaining Computational Challenges 53
 - References 55
- 4 Spatial Information Gain-Based Spatial Decision Tree 57**
 - 4.1 Introduction 57
 - 4.1.1 Societal Application 57
 - 4.1.2 Challenges 59
 - 4.1.3 Related Work Summary 60
 - 4.2 Problem Formulation 60
 - 4.3 Proposed Approach 63
 - 4.3.1 Basic Concepts 63
 - 4.3.2 Spatial Decision Tree Learning Algorithm 68
 - 4.3.3 An Example Execution Trace 69
 - 4.4 Evaluation 71
 - 4.4.1 Dataset and Settings 71
 - 4.4.2 Does Incorporating Spatial Autocorrelation Improve Classification Accuracy? 73
 - 4.4.3 Does Incorporating Spatial Autocorrelation Reduce Salt-and-Pepper Noise? 73
 - 4.4.4 How May One Choose α , the Balancing Parameter for SIG Interestingness Measure? 74
 - 4.5 Summary 75
 - References 76
- 5 Focal-Test-Based Spatial Decision Tree 77**
 - 5.1 Introduction 77
 - 5.2 Basic Concepts and Problem Formulation 80
 - 5.2.1 Basic Concepts 80
 - 5.2.2 Problem Definition 83
 - 5.3 FTSDT Learning Algorithms 83
 - 5.3.1 Training Phase 84
 - 5.3.2 Prediction Phase 88

- 5.4 Computational Optimization: A Refined Algorithm 89
 - 5.4.1 Computational Bottleneck Analysis 89
 - 5.4.2 A Refined Algorithm 90
 - 5.4.3 Theoretical Analysis 93
- 5.5 Experimental Evaluation 95
 - 5.5.1 Experiment Setup 95
 - 5.5.2 Classification Performance 96
 - 5.5.3 Computational Performance 98
- 5.6 Discussion 102
- 5.7 Summary 103
- References 103
- 6 Spatial Ensemble Learning 105**
 - 6.1 Introduction 105
 - 6.2 Problem Statement 107
 - 6.2.1 Basic Concepts 107
 - 6.2.2 Problem Definition 111
 - 6.3 Proposed Approach 112
 - 6.3.1 Preprocessing: Homogeneous Patches 112
 - 6.3.2 Approximate Per Zone Class Ambiguity 114
 - 6.3.3 Group Homogeneous Patches into Zones 115
 - 6.3.4 Theoretical Analysis 116
 - 6.4 Experimental Evaluation 118
 - 6.4.1 Experiment Setup 118
 - 6.4.2 Classification Performance Comparison 119
 - 6.4.3 Effect of Adding Spatial Coordinate Features 121
 - 6.4.4 Case Studies 122
 - 6.5 Summary 124
 - References 125
- Part III Future Research Needs**
- 7 Future Research Needs 129**
 - 7.1 Future Research Needs 129
 - 7.2 Summary 131
 - Reference 131
