1	Introduction	1
1.1	Controlling PDEs: Why Point Controls and Sensors?	1
1.2	Observability and Controllability: Methodology of Duality	2
1.2.1	Controllability Problem	2
1.2.2	Observability Problem	4
1.3	Degenerate Sensors and Controls: Challenges and Proposed Methodology to Address Them	5
1.3.1	Observability Problem with Static Point Sensors: Principal Difficulties	6
 Part I Observability and Controllability of Linear Parabolic Equations by Means of Degenerate Sensors and Controls		
2	Continuous Observability of the Heat Equation Under a Single Mobile Point Sensor	13
2.1	Introduction	13
2.2	Auxiliary Results	15
2.3	$C[\varepsilon, \theta]$ -Continuous Observability in Finite-Dimensional Subspaces	16
2.4	Proof of Theorem 2.1 and Some Corollaries	21
2.5	Explicit Observation Curves in 1- D Case	24
2.6	Observability with Mobile Discrete-Time Point Sensors	25
2.7	Dual Approximate Controllability	26
3	Continuous Observability of Second-Order Parabolic Equations Under Degenerate Mobile Sensors	29
3.1	Introduction	29
3.2	Preliminary Results	30
3.3	Mobile Point Estimate	31
3.4	Nonsmooth Case	35
3.5	Observability and Controllability	37

Part II Observability and Controllability of Semilinear Parabolic Equations by Means of Degenerate Sensors and Controls

4	Behavior of Solutions of the Semilinear Heat Equation in Vanishing Time and Controllability	41
4.1	Introduction	41
4.2	Auxiliary A Priori Estimates	44
4.3	Approximate Controllability Results	48
4.4	A Priori Estimates for $\ u\ _{L^\infty(Q_T)}$ and Further Results	50
4.5	Examples	54
4.5.1	Discussion of Examples	58
5	Controllability of the Semilinear Heat Equation with a Sublinear Term and a Degenerate Actuator	63
5.1	Introduction	63
5.2	Proof of Theorem 5.1	65
5.3	Proof of Theorem 5.2	73
5.4	The Case of Several Spatial Dimensions	75
6	Controllability of the Semilinear Reaction–Diffusion Equation with a Degenerate Actuator	77
6.1	Introduction	77
6.2	Main Results	79
6.2.1	The Case of $f = f(u)$	79
6.2.2	The Case of $f = f(x, t, u)$	80
6.2.3	Controllability in $C_0[0, 1]$ and $L^\infty(0, 1)$	83
6.2.4	An Example of Superlinear f	84
6.3	Some Auxiliary Formulas	85
6.4	Proofs of Theorems 6.1 and 6.2	87
6.5	Proof of Theorem 2.3	92
6.6	Proof of Theorem 6.5	95
7	Semilinear Parabolic Equations: Mobile Point Controls Versus Locally Distributed Ones	97
7.1	Introduction	97
7.2	The Linear Case: Duality	102
7.3	Continuous Observability Estimate for Mobile Point Sensors	110
7.4	Continuous Observability Estimate for Locally Distributed Sensors	112
7.5	The Semilinear Case	113
7.6	Examples	114
7.7	Possible Extensions of the Main Results	115

Part III Source Localization and Sensor Placement in Environmental Monitoring

8 Degenerate Sensors in Source Localization and Sensor Placement Problems	123
8.1 Introduction	123
8.2 A Model with Single-Point Source and Single-Point Sensor	124
8.3 1- <i>D</i> Reaction–Diffusion–Convection Model	129
8.4 Source Localization and Related Controllability and Observability Problems	134
8.5 Sources Acting Continuously in Time	137
8.6 Models in Several Spatial Dimensions	139

Part IV Observability and Controllability of Hyperbolic Equations by Means of Degenerate Sensors and Actuators

9 Continuous Observability of Hyperbolic Equations under Degenerate Sensors	147
9.1 Introduction	147
9.2 Main Results	149
9.3 Mobile Point Sensors: Proofs	152
9.4 Spatially Averaged Sensors	156
9.5 Proof of Theorem 9.4	158
10 Controllability of the Wave Equation Governed by Mobile Point Controls	163
10.1 Introduction	163
10.2 Main Results	166
10.3 Auxiliary Results	171
10.4 Proof of Theorem 10.4	176
10.5 Proofs of Theorems 10.1–10.2	179
10.6 Proof of Theorem 10.3	181

Part V Observability and Stabilizability of a Vibrating String by Means of Degenerate Sensors and Damping

11 Exponential Decay for the Wave Equation Equipped with a Point Damping Device	185
11.1 Introduction and the Main Results	185
11.2 The Open-Loop Problem: Well-Posedness	189
11.3 The Closed-Loop Problem: Well-Posedness	194
11.4 Proof of Theorem 11.1	197
11.5 Chains of Coupled Strings: Asymptotic Stabilizability	199

12 A Vibrating String with Shuttle-Like Point Dampers and Related Observability Properties	203
12.1 Observability with Bouncing Point Sensors	203
12.2 Stabilization	205
12.3 Observability: Proof of Theorem 12.1	208
12.4 Stabilization: Well-Posedness of Solutions to (12.3)–(12.4) in $C(0, T; E)$	213
12.5 Stabilization: Proof of Theorem 12.3.....	219
12.6 Stabilization: Proofs of Lemma 12.1 and of Theorem 12.4	221
References	223
Index	229

Mobile Point Sensors and Actuators in the
Controllability Theory of Partial Differential Equations

Khapalov, A.

2017, XVI, 233 p. 11 illus., Hardcover

ISBN: 978-3-319-60413-8
