

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Equilibrium Supercooled Liquid Versus Metastable Glasses	1
1.2	The Glassy Slowdown	4
1.2.1	The Calorimetric Glass Transition	5
1.2.2	Fragility and the Vogel-Fulcher-Tammann Law	7
1.2.3	Two-Step Relaxation	8
1.2.4	Real Space: The Cage	12
1.2.5	Real Space: Cooperativity	14
	References	17
<b>2</b>	<b>From Supercooled Liquids to RFOT</b>	19
2.1	The Random First Order Theory of the Glass Transition	19
2.1.1	The Foundations of RFOT	21
2.1.2	Dynamics: MCT and Goldstein's Picture	23
2.1.3	Complexity: Kauzmann's Paradox	28
2.1.4	Summary of RFOT: For $T_{MCT}$ to $T_K$	32
2.1.5	Beyond Mean Field: Scaling and the Mosaic	35
2.2	Other Approaches	38
2.2.1	Dynamic Facilitation Theory	39
2.2.2	Frustration Limited Domains	41
	References	44
<b>3</b>	<b>Metastable Glasses</b>	49
3.1	Thermodynamics and Aging	49
3.1.1	Protocol Dependence	51
3.1.2	Ultrastable Glasses	53
3.1.3	The Jamming Transition	56
3.1.4	Theoretical Approaches to Aging	59
3.2	Driven Dynamics and Rheology	66
3.2.1	Athermal Startup Shear Protocols	69

3.2.2	The Yielding Transition . . . . .	72
3.2.3	Theoretical Approaches. . . . .	74
	References. . . . .	78
<b>4</b>	<b>The State Following Construction . . . . .</b>	<b>85</b>
4.1	The Real Replica Method. . . . .	85
4.1.1	Quenching: The Threshold . . . . .	88
4.1.2	Annealing: Isocomplexity . . . . .	88
4.1.3	Summary. . . . .	89
4.2	The Two-Replica Franz-Parisi Potential . . . . .	89
4.3	Beyond Two Replicas: The Replica Chain and Pseudodynamics. . . . .	93
	References. . . . .	96
<b>5</b>	<b>The Replica Symmetric Ansatz . . . . .</b>	<b>99</b>
5.1	Computation of the FP Potential. . . . .	99
5.1.1	Perturbations . . . . .	100
5.1.2	The Replicated Entropy and the RS <i>Ansatz</i> . . . . .	101
5.1.3	Final Result for the Entropy of the Glassy State. . . . .	104
5.1.4	Saddle Point Equations . . . . .	105
5.1.5	Physical Observables. . . . .	106
5.2	Stability of the RS Ansatz . . . . .	108
5.2.1	The Unstable Mode. . . . .	109
5.3	Results . . . . .	111
5.3.1	Special Limits. . . . .	112
5.3.2	Compression-Decompression. . . . .	114
5.3.3	Shear Strain. . . . .	119
5.4	Discussion . . . . .	121
5.4.1	The Gardner Transition. . . . .	122
	References. . . . .	123
<b>6</b>	<b>The Full Replica Symmetry Breaking Ansatz . . . . .</b>	<b>127</b>
6.1	The Potential . . . . .	127
6.1.1	The fRSB Parametrization. . . . .	128
6.1.2	Expression of the Potential and the Observables. . . . .	129
6.2	Results . . . . .	131
6.2.1	Phase Diagrams and MSDs. . . . .	131
6.2.2	Critical Slowing Down . . . . .	134
6.2.3	Fluctuations. . . . .	137
6.2.4	Shear Moduli . . . . .	138
6.3	Discussion . . . . .	139
6.3.1	Yielding Within the fRSB Ansatz. . . . .	140
	References. . . . .	142

<b>7</b>	<b>Numerics in the Mari-Kurchan Model</b>	145
7.1	Model	145
7.2	Results	147
7.2.1	Isocomplexity	147
7.2.2	State Following and the Gardner Transition	148
	References.	156
<b>8</b>	<b>Conclusions</b>	159
8.1	Summary of Main Predictions	159
8.2	Strengths and Weaknesses of Our Approach	160
8.2.1	The Current Status of RFOT.	161
8.3	Proposals for Further Research	163
8.3.1	The Gardner Transition in Shear	163
8.3.2	State Following in AQS Protocols	163
8.3.3	Avalanches	164
8.3.4	Yielding	165
8.3.5	Non-linear Rheology	166
	References.	166
	<b>Appendix A: The Infinite-<math>d</math> Solution of Hard Spheres</b>	169
	<b>Appendix B: Computation of the Replicated Entropy in the RS Ansatz</b>	173
	<b>Appendix C: Computation of the Replicon Mode</b>	181
	<b>Appendix D: Computation of the Replicated Entropy in the fRSB Ansatz</b>	189
	<b>Appendix E: Variational Equations in the fRSB Ansatz</b>	201

Metastable Glassy States Under External Perturbations  
Monitoring the Effects of Compression and Shear-strain  
Rainone, C.

2017, XVII, 209 p. 45 illus., 23 illus. in color., Hardcover  
ISBN: 978-3-319-60422-0
