

Contents

1	Introduction	1
	References	14
2	Theory	17
2.1	Quantum Mechanical Picture of Fluorescence	17
2.1.1	Molecular Excitation and Emission	18
2.1.2	Single-Singlet and Singlet-Triplet Transitions	21
2.1.3	Franck-Condon Principle	23
2.1.4	Radiationless De-Excitation	24
2.1.5	Einstein's Coefficients and Spontaneous Emission Rate	25
2.2	Plane Waves and Maxwell's Equations	33
2.3	Fresnel's Equations	37
2.3.1	Total Internal Reflection	40
2.3.2	Thin Layers and Frustrated Internal Reflection	42
2.3.3	Fresnel's Equations for a Metal Surface	45
2.4	The Oscillating Dipole	46
2.4.1	Dipole in a Homogeneous Environment	46
2.4.2	Dipole on a Planar Dielectric Interface	57
2.4.3	Dipole on a Metal Surface	65
	References	74
3	Single-Molecule Metal-Induced Energy Transfer (smMIET)	75
3.1	Experimental Setups	75
3.1.1	MicroTime 200 Setup	75
3.1.2	Wide-Field Setup for Defocused Imaging	77
3.2	Proof of Principle Experiments	77
3.2.1	Substrate Preparation	77
3.2.2	Results	78
3.2.3	Discussion and Outlook	84
	References	85

4	Single-Molecule Transition Dipole Imaging	87
4.1	Radially Polarized Laser Excitation	88
4.1.1	Excitation Patterns	91
4.1.2	Experimental Setup	94
4.1.3	Single-Molecule Excitation Images	99
4.1.4	Pattern Matching	104
4.1.5	Multidimensional Emitters	108
4.2	smMIET with Radially Polarized Excitation	110
4.2.1	Methods	111
4.2.2	Results and Discussion	113
4.3	Defocused Imaging	116
4.3.1	Theory	117
4.3.2	Experimental Setup	121
4.3.3	Pattern Matching and Lateral Localization	123
4.3.4	Multidimensional Emitters	128
4.4	Excitation-Emission Transition Dipole Imaging	131
4.4.1	Experimental Setup and Methods	132
4.4.2	Results	133
4.4.3	Discussion and Outlook	140
4.5	Transition Dipole Imaging of Carbon Nanodots	141
	References	143
5	Discussion and Outlook	145
5.1	MIET on Metal Thin Films	145
5.2	SmMIET for Structural Biology	149
5.3	Dynamics Using MIET—DynaMIET	153
5.4	Ongoing Experiments	157
	References	158
6	Conclusion	159
	References	160
	Glossary	161
	Curriculum Vitae	163

Single-Molecule Metal-Induced Energy Transfer

From Basics to Applications

Karedla, N.

2017, XVIII, 166 p. 96 illus., 34 illus. in color., Hardcover

ISBN: 978-3-319-60536-4
