Contents

1 Raw Materials and Sustainability Indicators 1
Elza Bontempi
1.1 Mineral Resources Consumption in Europe 1
1.2 Raw Materials and Sustainability 6
1.3 World Material Consumption 11
1.4 Embodied Energy and Carbon Footprint 18
References 26

2 Case Study of Raw Materials Substitution: Natural Fillers Substitution in Plastic Composites 29
Elza Bontempi
2.1 A New Sustainable Filler from Waste: COSMOS Technologies 30
2.2 Plastic Industry in Europe 40
2.3 Alternative Plastic Composites: Increased Sustainability by Substitution of Natural Fillers 43
2.4 A Substitute of Antimony, a Critical Raw Material 52
References 58

3 Case Study of Raw Materials Substitution: Activated Carbon Substitution for Wastewater Treatments 63
Alessandra Zanoletti and Elza Bontempi
3.1 Coal Fly Ash Reuse 64
3.2 Adsorption Properties of Coal Fly Ash 66
3.3 Thermal Regeneration of Porous Material 69
3.4 Advantages of Proposed Material 73
3.5 Sustainability of the Proposed Material 74
References 75

4 A New Approach to Evaluate the Sustainability of Raw Materials Substitution 79
Elza Bontempi
4.1 Introduction 80
4.2 Legal Framework 83
4.3 The SUB-RAW Index 86
4.4 Raw Materials Substitution Possibilities 89
4.4.1 Coal Fly Ash and Portland Cement 89
4.4.2 Coal Fly Ash and Activated Carbon 89
4.4.3 COSMOS and Natural Fillers 91
4.5 Considerations About the SUB-RAW Index 92
4.6 Conclusions 98
References 98
