1	Introduction	1
	References.	2
2	Continuous Time Methodology and Mathematical Models in Search of Optimum Investment Strategy in Thermal Plants and Combined Heat and Power Plants	3
2.1	Introduction	3
2.2	Continuous Time Methodology in Search of an Optimum Investment Strategy in Heat Sources	5
2.2.1	Continuous Time Mathematical Model in Search of an Optimum Investment Strategy in Combined Heat and Electricity Sources	7
2.2.2	Methodology of Analyzing the Impact of Technical and Economic Parameters on the Specific Cost of Heat Production	18
2.3	Conclusions	29
	References.	30
3	Continuous Time Methodology and Mathematical Model for Analysis of Technical and Economic Effectiveness of Modernizing a Thermal Plant and Combined Heat and Power Plant	33
3.1	Introduction	33
3.2	Continuous Time Methodology of the Analysis of Technical and Economic Effectiveness of Modernizing Thermal Plants and Combined Heat and Power Plants	34
3.2.1	Continuous Time Mathematical Model for the Analysis of Technical and Economic Effectiveness of Modernizing Thermal Plant and Combined Heat and Power Plant.	35
3.3	Selection of Optimum Technology of Modernizing Combined Heat and Power Plant.	41

3.3.1	Unlimited Number of Solutions	43
3.4	Incremental Methodology of Analyzing the Economic Effectiveness of Modernizing Heat and Electricity Sources	49
3.5	Conclusions	53
	References.	53
4	Continuous Time Methodology and Mathematical Models for the Analysis of the Market Value of Thermal Plant and Heat and Power Plant and the Value of the Market Supplied by Them	55
4.1	Introduction	55
4.2	Continuous Time Methodology for Analysis of Market Value of Thermal Plant and Combined Heat and Power Plant and Value of the Market Supplied by Them not Accounting for Investment in Modernization	56
4.2.1	Continuous Time Mathematical Models for Analysis and Valuation of the Market Value of Thermal Plant and Combined Heat and Power Plant and Value of Heat and Electricity Market Supplied by Them	57
4.3	Continuous Time Methodology for Analysis of the Market Value of Thermal Plant and Combined Heat and Power Plant and Value of the Market Supplied by Them Accounting for the Investment in Modernization	60
4.3.1	Continuous Time Mathematical Models for Analysis and Valuation of the Market Value of Modernized Thermal Plant and Combined Heat and Power Plant and Value of the Market Supplied by Them Accounting for the Investment in Modernization	62
4.4	Results of Exemplary Calculations	68
4.4.1	Market Value of 370 MW Condensing Type Power Unit and Value of the Electricity Market Supplied by It	70
4.4.2	Market Value of 370 MW Power Unit Adapted to Combined Cycle and Value of the Electricity Market Supplied by It	77
4.4.3	Conclusions.	78
	References.	90
5	Summary and Final Conclusions	91
	Index	95

Investment Strategy in Heating and CHP

Mathematical Models

Bartnik, R.; Buryń, Z.; A.Hnydiuk-Stefan, V.P.

2017, XII, 96 p. 35 illus., 30 illus. in color., Softcover

ISBN: 978-3-319-61023-8
