

Contents

1	Introduction	1
1.1	Book Overview	1
1.1.1	Case Studies	2
1.2	Who This Book Is For	3
	References	4
2	Natural Interaction for Medical Simulation and Training	5
2.1	Introduction	5
2.2	Applications for Medical Simulation and Training	9
2.2.1	Medical Simulation Systems	9
2.2.2	Immersive Interactive Environments (IVEs) and Serious Gaming	10
2.3	Natural Interaction Applications	12
2.3.1	Interaction Techniques and Devices	12
2.3.2	Virtual Reality: New Perspectives	14
	References	15
3	Computer Vision for Natural Interfaces	19
3.1	Introduction	19
3.2	Hand Pose Recognition	24
3.2.1	Hand Representation	24
3.2.2	Hand Status Recognition	25
3.3	Long-Term Re-identification	26
3.3.1	Cumulated Observed Model	27
3.3.2	Super-Resolved Face Model	28
3.3.3	Re-identification Based on Face Geometry	30
3.3.4	Re-identification Based on Body Part Geometry	30
3.3.5	Joint Face-Body Re-identification	31

3.4	Experimental Results	31
3.4.1	Datasets	31
3.5	Conclusions	38
	References	38
4	Case Studies: BLSD and Surgical Checklist	41
4.1	Introduction	41
4.2	BLSD-S Simulator Prototype	43
4.2.1	The BLSD Procedure	45
4.2.2	The Scenario	47
4.2.3	The System	48
4.2.4	Gesture Recognition Module	52
4.2.5	Session Configuration Tool	54
4.2.6	Assessment of Trainee Learning	55
4.2.7	Heuristic Assessment of the BLSD-S Virtual Environment	57
4.2.8	Usability Testing	58
4.2.9	Improving Immersivity and Naturalness of Interaction of the BLSD-S	59
4.3	SSC (Surgical Safety Checklist) Simulator Prototype	66
4.3.1	Surgical Checklist	68
4.3.2	The System	73
4.3.3	Interaction Detection	74
4.3.4	Game Status Controller	76
4.3.5	Implementation Details	76
4.3.6	Classification and Initial Assessment of the SSC-S Prototype	77
4.3.7	Long-Term Re-identification for the SSC-S	78
	References	79
5	Conclusions	81
