Contents

Part I Introduction

1 Introduction 3
1.1 Modeling and Simulation 3
1.1.1 What Is Model? 4
1.1.2 What Is System? 5
1.1.3 What Is Simulation? 6
1.1.4 Model to Simulate and Model to Build 7
1.1.5 Simulation Engineering 8
1.1.6 Time and Change 9
1.2 Distributed Simulation 10
1.2.1 SIMNET 12
1.2.2 DIS Protocol 12
1.2.3 Aggregate Level Simulation Protocol 13
1.3 High Level Architecture 13
1.4 Tools 15
1.4.1 SimGe 16
1.4.2 RACoN. 16
1.5 Introduction to Case Studies 17
1.5.1 Strait Traffic Monitoring Simulation 17
1.5.2 Maritime Border Surveillance Using Unmanned Surface Vehicles 19
1.6 Book Outline 22
1.6.1 Summary of Chapters 22
1.6.2 Typeface Conventions 23
1.7 Summary 24
1.8 Questions for Review 24
References 25

2 High Level Architecture 29
2.1 Prelude 29
2.1.1 What Is HLA? 30

2.2 Basic Components . . . 31
2.2.1 Federate and Federation . . . 32
2.2.2 Runtime Infrastructure . . . 33
2.3 HLA Rules . . . 34
2.3.1 Federation Rules . . . 34
2.3.2 Federate Rules . . . 35
2.4 HLA Data Model and Data Communication . . . 36
2.4.1 HLA Data Communication Pattern . . . 36
2.4.2 Object Exchange: Publish/Subscribe Pattern . . . 38
2.4.3 Data: Objects, Interactions, and HLA Classes . . . 39
2.4.4 Object Model Template . . . 42
2.4.5 HLA Object Models . . . 44
2.4.6 Object Model Modularity . . . 45
2.5 Interface Specification . . . 46
2.5.1 Federation Management . . . 50
2.5.2 Declaration Management . . . 54
2.5.3 Object Management . . . 59
2.5.4 Ownership Management . . . 60
2.5.5 Data Distribution Management . . . 62
2.5.6 Time Management . . . 64
2.6 Full Life Cycle of a Federation Execution . . . 68
2.6.1 Initialization . . . 71
2.6.2 Operation . . . 71
2.6.3 Termination . . . 71
2.7 Example Federation Deployment . . . 72
2.8 Federation and Federate States . . . 72
2.8.1 Federation Execution States . . . 73
2.8.2 Federate States . . . 73
2.9 Summary . . . 74
2.10 Questions for Review . . . 75
References . . . 77

3 Federation Development At-A-Glance . . . 79
3.1 Process Model . . . 79
3.2 Federation Development and Guidelines . . . 81
3.2.1 Federation Design . . . 81
3.2.2 Federate Design . . . 87
3.2.3 Federate Implementation . . . 89
3.2.4 Target Platform . . . 89
3.2.5 Integration with Local Simulations/Games . . . 89
3.3 Implementation Steps . . . 91
3.4 Summary . . . 92
3.5 Questions for Review . . . 92
References . . . 93

Part II Object Model Development

4 Introduction to Object Model Development 97
4.1 SimGe Overview 97
4.2 Managing SimGe Projects 98
4.2.1 The Main User Interface 98
4.2.2 Creating a Project 100
4.2.3 Loading a Project 100
4.2.4 Saving and Closing a Project 102
4.2.5 Project Start Page 102
4.2.6 Project Settings 102
4.2.7 Options 103
4.3 Federation Architecture Modeling 104
4.3.1 Creating a FAM 105
4.3.2 Federation Structure 106
4.4 Summary 108
4.5 Questions for Review 108
References 109

5 Object Model Construction 111
5.1 Overview 111
5.2 Creating a Federation Object Model from Scratch 112
5.3 Loading an Existing SimGe Object Model 112
5.4 Removing Object Model 113
5.5 Importing a FED/FDD File 113
5.6 Exporting the FED/FDD Files 114
5.7 Object Model Editor 115
5.7.1 OME Toolbar 115
5.8 Table Editor 116
5.8.1 Object Model Identification 118
5.8.2 Objects 121
5.8.3 Interactions 122
5.8.4 Attributes 123
5.8.5 Parameters 125
5.8.6 Dimensions 125
5.8.7 Time Representations 128
5.8.8 User-Supplied Tags 128
5.8.9 Synchronization 128
5.8.10 Case Study: Synchronization 129
5.8.11 Transportations 129
5.8.12 Update Rates 131
5.8.13 Switches 131
5.8.14 Data Types 133
5.8.15 Case Study: Data Types 140
5.8.16 Notes 141

5.8.17 Interface Specification Services 141
5.8.18 OMT 1.3 Support 142
5.9 Textual View 143
5.9.1 Textual View for FED and FDD Files 143
5.10 Validating the FDD File 144
5.11 MOM Integration 145
5.12 OM Explorer 146
5.12.1 Functionality for Traverse 147
5.12.2 Functionality for Modification 149
5.13 Report Generator 149
5.14 Summary 150
5.15 Questions for Review 151
References 152

Part III Federate Application Development

6 Code Generation 157
6.1 Overview 157
6.2 User Interface 158
6.2.1 Code Explorer 159
6.2.2 Code Viewer 159
6.3 Architectural Style 159
6.3.1 Code Generation for Object Model 162
6.3.2 Code Generation for Federate 163
6.3.3 Code Generation for Data Type 163
6.3.4 Code Generation for MOM 164
6.4 Code Generator Configuration 164
6.4.1 General Settings 165
6.4.2 Callback Settings 165
6.4.3 Runtime Settings 165
6.5 Summary 167
References 168

7 Federate Application Development Based on Layered Architecture 169
7.1 Federate Application Architecture 169
7.1.1 Presentation Layer 170
7.1.2 Simulation Layer 170
7.1.3 Communication Layer 171
7.1.4 Integration of Layers 171
7.1.5 Encapsulation of Simulation Local Data Structures 172
7.1.6 The Federation Foundation Library 174

7.2 Development Environment Configuration 174
7.2.1 Prerequisites 175
7.2.2 Operating Environment Configuration 175
7.2.3 IDE Configuration 177
7.3 Case Study: Running the STMS Federation 179
7.3.1 User Interface 179
7.4 Summary 180
References 181

8 Federate Implementation: Basics 183
8.1 Case Study: Federate Architecture 183
8.2 The Basics 184
8.2.1 Namespace 184
8.2.2 RACoN Methods 184
8.2.3 Creating the Simulation Manager 185
8.2.4 Creating the Federate Class 186
8.3 Implementing the Simulation Object Model 188
8.3.1 Defining an Object Class and Its Attributes 190
8.3.2 Defining an Interaction Class and Its Parameters 191
8.3.3 Connecting SOM and Federate 191
8.4 Calls and Callbacks 192
8.4.1 Events 192
8.4.2 Event Handling 193
8.4.3 Tracing the RTI 193
8.5 Federation Management 196
8.5.1 Federation Execution Creation 196
8.5.2 Joining the Federation Execution 197
8.5.3 High-Level Method for Initialization 198
8.5.4 Finalization of Federation Execution 198
8.5.5 Connection Lost 199
8.6 Declaration Management 200
8.7 Object Management 201
8.7.1 Implementing Simulation Objects 201
8.7.2 Registering Objects 203
8.7.3 Updating the HLA Object Attributes 204
8.7.4 Discovering Objects 206
8.7.5 Reflecting the Attribute Values 207
8.7.6 Request an Update for Attribute Values 208
8.7.7 Deleting and Removing an Object Instance 209
8.7.8 Sending an Interaction 210
8.7.9 Receiving an Interaction 210
8.8 Main Simulation Loop 212
8.8.1 Console Applications 213
8.8.2 Windows Forms Applications 213

8.8.3 Windows Presentation Foundation (WPF) Applications . . . 213
8.9 Parameter and Attribute Marshaling/Unmarshaling . . . 214
8.9.1 Supported Data Types . . . 215
8.10 Summary . . . 215
8.11 Questions for Review . . . 216
References . . . 217

Part IV Advanced Topics

9 Federate Implementation: Advanced . . . 221
9.1 Time Management . . . 221
9.1.1 Time-Regulating Federates . . . 221
9.1.2 Time-Constrained Federates . . . 224
9.1.3 Time Advancement . . . 224
9.1.4 Queries . . . 227
9.1.5 Changing Preferred Order Types . . . 229
9.1.6 Sending and Receiving TSO Messages . . . 229
9.1.7 Message Retraction . . . 231
9.2 Federation Synchronization . . . 231
9.3 Federation Save-and-Restore . . . 235
9.4 Data Distribution Management . . . 238
9.4.1 Case Study 1: STMS . . . 238
9.4.2 Creating Regions . . . 241
9.4.3 Subscribing an Object Class with Regions . . . 242
9.4.4 Registering an Object Instance with Regions . . . 243
9.4.5 Associating Regions for Updates . . . 243
9.4.6 Case Study 2: Extended Chat Application . . . 244
9.4.7 Subscribing Interactions with Regions . . . 246
9.4.8 Sending and Receiving Interactions Using Regions . . . 246
9.5 Ownership Management . . . 247
9.5.1 Ownership Management Services . . . 247
9.5.2 Pull Strategy . . . 248
9.5.3 Push Strategy . . . 249
9.5.4 Case Study: Transferring Tracks Among Traffic Stations . . . 251
9.5.5 Querying the Ownership . . . 252
9.5.6 Problems in OwM of HLA 1.3 . . . 253
9.6 Handling Multiple Federation Executions . . . 253
9.7 One Federate Application, Multiple Federates . . . 255
9.8 Summary . . . 257
9.9 Questions for Review . . . 258
References . . . 259

10 Integration of Agents into HLA 261
10.1 Agent-Based Simulation 261
10.1.1 A Cognitive Agent Architecture 262
10.2 Integration of Agents into HLA-Based Simulations. 264
10.2.1 Architectural Approaches. 264
10.2.2 A Concrete Architecture 266
10.2.3 Using HLA as Agent Communication Medium 267
10.3 Summary 270
References 271

11 A Complete Case Study 273
11.1 Prelude 273
11.1.1 Simulation Environment 274
11.2 Naval Simulation 275
11.2.1 Virtual Environment 275
11.3 Agent-Based Simulation 277
11.3.1 Goal Reasoning 278
11.3.2 Agent Manager 279
11.3.3 USV Agent 280
11.4 Object Model. 282
11.5 Federation Structure 286
11.6 Deployment and Execution 287
11.7 Federate Application with Intensive Graphics. 287
11.8 Main Simulation Loop 290
11.9 Graphics API Integration. 291
11.10 Summary 292
11.11 Questions for Review 292
References 292

Appendix A: SimGe Installation and Remarks 295
