1	Introduction	1
1.1	Scope	1
1.2	Research Concepts and Hypotheses	3
1.3	Aims and Objectives.	4
1.4	Contribution of the Research	5
1.5	Conclusion	5
	References.	6
2	Review of Literature: Melt Electrospinning	9
2.1	Introduction	9
2.2	Electrospinning	9
2.2.1	Types of Electrospinning.	10
2.2.2	Jet Trajectory.	12
2.3	Research on Melt Electrospinning	26
2.3.1	Equipment Used	26
2.3.2	Polymers Used	27
2.4	Fibre Diameter and Influencing Factors	28
2.4.1	Effects of Molecular Weight/MFI	29
2.4.2	Effect of Viscosity.	29
2.4.3	Effect of Applied Voltage	29
2.4.4	Effect of Collector Distance and Type.	30
2.4.5	Effect of Flow Rate	30
2.4.6	Effect of Spinneret Size.	31
2.4.7	Effect of Temperature	31
2.4.8	Effect of Ambient Parameters	31
2.4.9	Effect of Electrical Conductivity	32
2.4.10	Other Parameters	32
2.5	Surface Morphology	32
2.6	Properties of Melt Electrospun Fibres.	33
2.6.1	Mechanical Properties	33

2.6.2	Thermal Properties	34
2.6.3	Crystalline Properties.	34
2.6.4	Other Properties.	35
2.7	Conclusion	36
	References.	36
3	Experimental: Melt Electrospinning.	41
3.1	Introduction	41
3.2	Materials.	41
3.2.1	Material Synthesis	42
3.2.2	Material Preparation	43
3.3	Melt Electrospinning Apparatus	44
3.4	Additives	47
3.5	Annealing	47
3.6	Characterisation	48
3.6.1	SEM	48
3.6.2	Optical Microscopy	48
3.6.3	EDX	48
3.6.4	NMR.	49
3.6.5	FTIR	49
3.6.6	DSC	49
3.6.7	TGA	50
3.6.8	Molecular Weight or Intrinsic Viscosity	50
3.6.9	XRD	50
3.6.10	Shear Viscosity	51
3.6.11	Electrical Conductivity	52
3.6.12	Mechanical Characterisation	52
3.6.13	Surface Wettability	53
3.7	Conclusion	53
	References.	53
4	Results and Discussion: Melt Electrospinning.	55
4.1	Initial Experiments with Pure Polymers	55
4.1.1	Establishing the Processing Parameters	55
4.1.2	Initial Results: Effect of Polymer MFI.	59
4.1.3	Effect of Viscosity.	61
4.1.4	Effect of Melt Flow Rate.	63
4.1.5	Other Observations	64
4.1.6	Effect of Die Size and Shape.	65
4.2	Experiments with Additives	70
4.2.1	Effect of Additives on Fibre Diameter.	71
4.3	Characterisation	84
4.3.1	Elemental Composition Analysis by Energy Dispersive X-ray (EDX)	84

4.3.2	Nuclear Magnetic Resonance (NMR) Results	87
4.3.3	Fourier Transform Infrared (FTIR) Results	88
4.3.4	Differential Scanning Calorimetry (DSC) Results	89
4.3.5	Thermo Gravimetric Analysis (TGA) Results	96
4.3.6	Molecular Weight or Intrinsic Viscosity	96
4.3.7	X-ray Diffraction (XRD) Results	97
4.3.8	Mechanical Property	99
4.3.9	Hydrophobic Properties	100
4.4	Washing of the Additives	101
4.5	Conclusion	103
	References.	103
5	Conclusions: Melt Electrospinning	107
5.1	Conclusions	107
	References.	109
6	Review of Literature: Meltblowing	111
6.1	Meltblowing	111
6.1.1	Equipment	111
6.1.2	Fibre Diameter and Influencing Factors	112
6.1.3	Properties of Meltblown Fibres	115
6.2	Conclusion	116
	References.	116
7	Experimental: Meltblowing	119
7.1	Introduction	119
7.2	Materials	119
7.3	Meltblowing Apparatus	120
7.4	Annealing	123
7.5	Characterisation	123
7.5.1	Optical Microscopy	123
7.5.2	SEM	123
7.5.3	NMR	124
7.5.4	FTIR	124
7.5.5	DSC	124
7.5.6	TGA	125
7.5.7	Molecular Weight or Intrinsic Viscosity	125
7.5.8	XRD	125
7.5.9	Shear Viscosity	126
7.5.10	Mechanical Characterisation	127
7.5.11	Surface Wettability	128
7.6	Conclusion	129
	References.	129

8	Results and Discussion: Meltblowing	131
8.1	Initial Experiments with Pure Polymers	131
8.1.1	Initial Results	131
8.2	Effect of Fluids	132
8.2.1	Process of Fibre Formation with Fluid Injection	133
8.2.2	Collection Pattern of Fibres	134
8.2.3	Mechanism of Fibre Formation	136
8.2.4	Morphology and Diameter of Fibres	139
8.3	Characterisation	144
8.3.1	NMR Results	145
8.3.2	FTIR Results	146
8.3.3	DSC Results	147
8.3.4	TGA	149
8.3.5	Molecular Weight or Intrinsic Viscosity	149
8.3.6	XRD Results	150
8.3.7	Mechanical Properties	152
8.3.8	Hydrophobic Properties	156
8.4	Processing Difficulties with 2000 MFI PP	158
8.5	Conclusion	158
	References	159
9	Conclusions: Meltblowing	161
9.1	Conclusions	161
	References	163
10	Comparison of Results and Future Suggestions	165
10.1	Results of the Study	165
10.2	Comparison of Results for the Fabrication of Nanofibres	166
10.2.1	Differences in the Process of Fibre Formation	166
10.2.2	Differences in the Material Performance	166
10.2.3	Differences in the Fibre Properties	167
10.3	Future Suggestions	168
10.4	Publications	169
10.4.1	Journal Publications	169
10.4.2	Conference Publications	169
10.4.3	Book Chapter	170

Polypropylene Nanofibers

Melt Electrospinning Versus Meltblowing

Nayak, R.

2017, XIV, 190 p. 105 illus., 70 illus. in color., Hardcover

ISBN: 978-3-319-61457-1
