

# Contents

- 1 Legacy of Beaver–Human Interaction ..... 1**
  - 1.1 Decimation of the Beaver..... 1
  - 1.2 The Landscape that Beavers Inhabited..... 2
  - 1.3 Recovery of the Beaver ..... 4
  - 1.4 The Kabetogama Peninsula: A Beaver Timeline..... 4
  - References ..... 10
- 2 Ecosystem Engineers: Beaver Ponds ..... 13**
  - 2.1 Kabetogama Peninsula: A Beaver Paradise..... 13
    - 2.1.1 Why Do Beavers Build Dams? ..... 14
    - 2.1.2 What Makes the Kabetogama Peninsula Such a Suitable Landscape for Beaver Ponds?..... 15
  - 2.2 Beaver Dam Characteristics ..... 19
    - 2.2.1 Dam Construction Materials ..... 19
    - 2.2.2 Beaver Dams on Streams ..... 20
    - 2.2.3 Lake Outlet Beaver Dams ..... 22
    - 2.2.4 Beaver Dams in Peatlands..... 24
    - 2.2.5 Beaver Dam Persistence..... 27
    - 2.2.6 Large Beaver Dams..... 27
    - 2.2.7 Unusual Beaver Dams..... 29
  - 2.3 Beaver Pond Characteristics..... 31
    - 2.3.1 Beaver Impoundments, Pond Sites, and Clusters ..... 31
    - 2.3.2 Influence of Geomorphology on Pond Shape and Boundaries ..... 33
    - 2.3.3 Pond Site Optimization ..... 36
  - 2.4 Vegetation Alteration by Beaver Dams ..... 38
    - 2.4.1 Cover Types of Beaver Impoundments ..... 38
    - 2.4.2 Beaver Meadows ..... 40
    - 2.4.3 Vegetation of Active Versus Inactive Beaver Pond Sites ..... 42

2.4.4	Changes in Beaver Population Alter Beaver Impoundment Cover Types .....	42
2.5	Beaver Excavation .....	44
2.6	Conclusions .....	45
	References .....	46
<b>3</b>	<b>Altering the Water Cycle .....</b>	<b>51</b>
3.1	Introduction .....	52
3.2	Precipitation .....	54
3.2.1	Rainfall and Snowfall .....	54
3.2.2	Why Is Snowpack So Important? .....	58
3.3	Evapotranspiration .....	58
3.3.1	Potential Evapotranspiration Versus Water Balance Unknown Term .....	62
3.3.2	Chamber ET .....	63
3.3.3	Effect of Evapotranspiration on Groundwater .....	68
3.3.4	Effect of Evapotranspiration on Stream Water Inflow .....	69
3.3.5	Effect of Evapotranspiration on Pond Levels .....	70
3.4	Water Storage in Residual Ponds .....	73
3.4.1	Estimating Pond Water Storage .....	73
3.4.2	Seasonal Water Level Change in Residual Ponds .....	73
3.5	Groundwater Fluxes .....	77
3.6	Lateral Runoff .....	80
3.7	Stream Inflow and Outflow .....	83
3.8	Conclusions .....	86
	References .....	86
<b>4</b>	<b>Beaver Loggers: Beaver Herbivory Alters Forest Structure .....</b>	<b>91</b>
4.1	Introduction .....	91
4.2	Why Cut Wood? .....	92
4.3	Beaver Morticulture and the Fate of Beaver-Cut Wood .....	93
4.4	Forage Selectivity .....	94
4.5	Beavers and Plant Metabolites .....	98
4.6	Central Place Foraging .....	100
4.7	Beaver Silviculture: How Does Beaver Logging Affect the Remnant Forest? .....	101
4.8	Beaver Browse on the Kabetogama Peninsula .....	104
4.8.1	Characteristics of the Riparian Forest .....	106
4.8.2	Browsed Stems .....	110
4.8.3	Effect of Browsing on Residual Forest: Field Study .....	110
4.8.4	Effect of Browsing on Residual Forest: GIS Study .....	112
4.9	Conclusions .....	113
	References .....	114

<b>5</b>	<b>Soils of Beaver Meadows .....</b>	<b>117</b>
5.1	Parent Material .....	117
5.1.1	Bedrock .....	118
5.1.2	Glacial Till (Drift) .....	119
5.1.3	Glaciofluvial Deposits .....	121
5.1.4	Glaciolacustrine Deposits .....	122
5.1.5	Alluvium and Colluvium .....	122
5.1.6	Organic Matter .....	124
5.2	Particle Size Distribution of Beaver Meadow Soils .....	125
5.3	Field Study of Beaver Meadow Soil Profiles .....	127
5.3.1	Histosol .....	128
5.3.2	Argiaquoll .....	129
5.3.3	Other Mineral Soils .....	129
5.4	Beaver Ponds and Meadows on Soil Surveys .....	132
5.5	Conclusions .....	134
	References .....	135
<b>6</b>	<b>Vegetation of Beaver Impoundments .....</b>	<b>137</b>
6.1	Beaver Meadow Plant Species .....	138
6.1.1	Bluejoint Grass .....	138
6.1.2	Lake Sedge .....	141
6.1.3	<i>Scirpus cyperinus</i> .....	142
6.1.4	<i>Rubus idaeus</i> .....	143
6.1.5	Cattail Is Notably Absent from Beaver Meadows .....	144
6.2	Plant Communities of Kabetogama Beaver Meadows Field Study .....	144
6.2.1	Wet Groups: A, B, C .....	144
6.2.2	<i>Calamagrostis</i> Core: Group G .....	146
6.2.3	Upland Edge Groups: D, E, F, H .....	147
6.2.4	Beaver Meadow Diversity and Succession .....	147
6.3	Plant Communities of All Kabetogama Beaver Ponds and Meadows GIS Analysis .....	149
6.4	Nutrient Availability in Grass and Sedge Beaver Meadows .....	153
6.5	Vertical Biomass Allocation, Light Extinction, and Nitrogen in Plant Canopies .....	155
6.5.1	Greenhouse Study: Vertical Distribution of Canopy Nitrogen Concentration .....	156
6.5.2	Field Study: Light Interception .....	163
6.5.3	Combining the Light Interception and Greenhouse Studies .....	164
6.6	Field Fertilization Experiments .....	168
6.6.1	Effect of Fertilization on Biomass .....	168
6.6.2	Effect of Fertilization on Species Composition .....	170
6.7	Mouse Wars: How Voles Keep Trees Out of Beaver Meadows .....	172
6.8	Conclusions .....	172
	References .....	173

<b>7 The Biogeochemistry of Boreal Beaver Ponds.....</b>	<b>177</b>
7.1 Atmospheric Inputs and Outputs.....	177
7.2 Chemical Changes Along Moisture Gradients.....	179
7.3 Processes Behind the Observed Chemical Trends .....	180
7.3.1 Oxidation-Reduction Reactions.....	180
7.3.2 Accumulation of Ammonium .....	181
7.3.3 Carbonate Dissolution.....	183
7.3.4 Sedimentation .....	183
7.3.5 Biotic Uptake and Mineralization.....	184
7.4 The Importance of Geologic Setting.....	184
7.5 Soil Nutrient Ecotones .....	187
7.6 Net Nutrient Retention .....	189
7.7 Watershed Modeling of Nutrient Fluxes .....	191
7.8 Conclusions.....	197
References .....	198
<b>8 Beaver Ponds and the Carbon Cycle.....</b>	<b>201</b>
8.1 Components of the Carbon Cycle .....	201
8.2 Carbon in Ponds .....	202
8.3 Carbon Uptake and Storage by Vascular Plants Associated with Beaver Ponds.....	203
8.4 Plant Litter and Decomposition .....	204
8.5 Deadwood .....	205
8.6 Transfer of Plant Biomass to the Soil.....	206
8.7 Carbon Storage Within Beaver Meadow Soils.....	208
8.8 Laboratory Soil Carbon Mineralization .....	213
8.9 Field Measurements of Trace Gas Fluxes from Beaver Meadows and Ponds.....	214
8.10 Extrapolating Methane Fluxes to the Landscape .....	217
8.11 Conclusions.....	218
References .....	219
<b>9 Fish Assemblages in a Beaver-Influenced Successional     Landscape .....</b>	<b>223</b>
9.1 Sampling Fish Assemblages Across a Successional Landscape.....	224
9.2 Spatial Variation in Fish Assemblages Across a Beaver-Influenced Successional Landscape.....	229
9.3 A Hierarchical Model of Fish Assemblages in Landscapes Influenced by Beaver.....	233
9.4 Conclusions.....	236
References .....	236

<b>10</b>	<b>Beavers as Engineers of Wildlife Habitat .....</b>	<b>239</b>
10.1	Introduction.....	240
10.2	Mammals.....	241
10.2.1	Moose and White-Tailed Deer .....	241
10.2.2	Gray Wolves .....	249
10.2.3	Other Mammals.....	251
10.3	Birds.....	254
10.3.1	Passerines and Woodpeckers.....	254
10.3.2	Swans, Geese, and Ducks.....	255
10.3.3	Great Blue Herons and Other Waterbirds.....	260
10.3.4	Osprey and Other Birds of Prey .....	262
10.4	Amphibians and Reptiles .....	264
10.5	Beaver Lodges and Dams as Wildlife Habitat .....	265
10.6	Conclusions.....	265
	References.....	267
