

Contents

Association Analysis

A Process for Exploring Employees' Relationships via Social Network and Sentiment Analysis	3
<i>Jeydels Barahona and Hung-Min Sun</i>	
Mining Relationship Between User Purposes and Product Features Towards Purpose-Oriented Recommendation	9
<i>Sopheaktra Yong and Yasuhito Asano</i>	
Finding Top-k Fuzzy Frequent Itemsets from Databases.	22
<i>Haifeng Li, Yue Wang, Ning Zhang, and Yuejin Zhang</i>	
Association Rule Mining in Healthcare Analytics	31
<i>S. Anand Hareendran and S.S. Vinod Chandra</i>	
Does Student's Diligence to Study Relate to His/Her Academic Performance?	40
<i>Toshiro Minami, Yoko Ohura, and Kensuke Baba</i>	
Correlation Analysis of Diesel Engine Performance Testing Data Based on Mixed-Copula Method.	48
<i>Zha Dongye, Qin Wei, Zhang Jie, and Zhuang Zilong</i>	

Clustering

Comparative Study of Apache Spark MLlib Clustering Algorithms	61
<i>Sasan Harifi, Ebrahim Byagowi, and Madjid Khalilian</i>	
L-DP: A Hybrid Density Peaks Clustering Method	74
<i>Mingjing Du and Shifei Ding</i>	

Prediction

Incremental Adaptive Time Series Prediction for Power Demand Forecasting	83
<i>Petra Vrabecová, Viera Rozínajová, and Anna Bou Ezzeddine</i>	
Food Sales Prediction with Meteorological Data — A Case Study of a Japanese Chain Supermarket	93
<i>Xin Liu and Ryutaro Ichise</i>	

Cascade Spatial Autoregression for Air Pollution Prediction	105
<i>Yangping Li, Xiaorui Wei, and Tianming Hu</i>	

Machine Learning Techniques for Prediction of Pre-fetched Objects in Handling Big Data Storage.	113
<i>Nur Syahela Hussien, Sarina Sulaiman, and Siti Mariyam Shamsuddin</i>	

Classification

Spectral-Spatial Mineral Classification of Lunar Surface Using Band Parameters with Active Learning.	127
<i>Sukanta Roy, Sujai Subbanna, Srinidhi Venkatesh Channagiri, Sharath R Raj, and Omkar S.N</i>	

R ² CEDM: A Rete-Based RFID Complex Event Detection Method	137
<i>Xiaoli Peng, Linjiang Zheng, and Ting Liao</i>	

Learning Analytics for SNS-Integrated Virtual Learning Environment	148
<i>Fang-Fang Chua, Chia-Ying Khor, and Su-Cheng Haw</i>	

LBP vs. LBP Variance for Texture Classification	156
<i>Gerald Schaefer and Niraj Doshi</i>	

A Decision Tree of Ignition Point for Simple Inflammable Chemical Compounds	165
<i>Ryoko Hayashi</i>	

Analyzing Consumption Behaviors of Pet Owners in a Veterinary Hospital	173
<i>Jo Ting Wei, Shih-Yen Lin, You-Zhen Yang, and Hsin-Hung Wu</i>	

Schedule and Sequence Analysis

Modeling Inter-country Connection from Geotagged News Reports: A Time-Series Analysis	183
<i>Yihong Yuan</i>	

Mining Sequential Patterns of Students' Access on Learning Management System	191
<i>Leonard K.M. Poon, Siu-Cheung Kong, Michael Y.W. Wong, and Thomas S.H. Yau</i>	

Design of a Dynamic Electricity Trade Scheduler Based on Genetic Algorithms.	199
<i>Junghoon Lee and Gyung-Leen Park</i>	

Increasing Coverage of Information Spreading in Social Networks with Supporting Seeding	209
<i>Jarosław Jankowski and Radosław Michalski</i>	

Big Data

B-Learning and Big Data: Use in Training an Engineering Course	221
<i>Leonardo Emiro Contreras Bravo, Jose Ignacio Rodriguez Molano, and Giovanni Mauricio Tarazona Bermudez</i>	
Mapping Knowledge Domain Research in Big Data: From 2006 to 2016. . . .	234
<i>Li Zeng, Zili Li, Tong Wu, and Lixin Yang</i>	
Template Based Industrial Big Data Information Extraction and Query System.	247
<i>Jie Wang, Yan Peng, Yun Lin, and Kang Wang</i>	
Finding the Typical Communication Black Hole in Big Data Environment. . .	255
<i>Jinbo Zhang, Shenda Hong, Yiyong Lin, Yanchao Mou, and Hongyan Li</i>	
A Solution for Mining Big Data Based on Distributed Data Streams and Its Classifying Algorithms	263
<i>Guojun Mao and Jiewei Qiao</i>	

Data Analysis

Design of a Quality-Aware Data Capture System	275
<i>R. Vasanth Kumar Mehta and Shubham Verma</i>	
Data Architecture for the Internet of Things and Industry 4.0	283
<i>José Ignacio Rodriguez Molano, Leonardo Emiro Contreras Bravo, and Eduyn Ramiro López Santana</i>	
Machine Learning in Data Lake for Combining Data Silos.	294
<i>Merlinda Wibowo, Sarina Sulaiman, and Siti Mariyam Shamsuddin</i>	
Development of 3D Earth Visualization for Taiwan Ocean Environment Demonstration	307
<i>Franco Lin, Wen-Yi Chang, Whey-Fone Tsai, and Chien-Chou Shih</i>	
Exploring Potential Use of Mobile Phone Data Resource to Analyze Inter-regional Travel Patterns in Japan	314
<i>Canh Xuan Do and Makoto Tsukai</i>	
REBUILD: Graph Embedding Based Method for User Social Role Identity on Mobile Communication Network	326
<i>Jinbo Zhang, Yipeng Chen, Shenda Hong, and Hongyan Li</i>	

Study a Join Query Strategy Over Data Stream Based on Sliding Windows	334
<i>Yang Sun, Lin Teng, Shoulin Yin, Jie Liu, and Hang Li</i>	

Data Mining

L2 Learners' Proficiency Evaluation Using Statistics Based on Relationship Among CEFR Rating Scales.	345
<i>Hajime Tsubaki</i>	
Research Hotspots and Trends in Data Mining: From 1993 to 2016	353
<i>Zili Li and Li Zeng</i>	
Proposal for a New Reduct Method for Decision Tables and an Improved STRIM	366
<i>Jiwei Fei, Tetsuro Saeki, and Yuichi Kato</i>	
Post-marketing Drug Safety Evaluation Using Data Mining Based on FAERS	379
<i>Rui Duan, Xinyuan Zhang, Jingcheng Du, Jing Huang, Cui Tao, and Yong Chen</i>	
Crowd Density Estimation from Few Radio-Frequency Tracking Devices: I. A Modelling Framework.	390
<i>Yenming J. Chen and Albert Jing-Fuh Yang</i>	

Text Mining

Mining Textual Reviews with Hierarchical Latent Tree Analysis.	401
<i>Leonard K.M. Poon, Chun Fai Leung, and Nevin L. Zhang</i>	
Extraction of Temporal Events from Clinical Text Using Semi-supervised Conditional Random Fields	409
<i>Gandhimathi Moharasan and Tu-Bao Ho</i>	
Characteristics of Language Usage in Inquires Asked to an Online Help Desk	422
<i>Haruka Adachi and Mikito Toda</i>	

Deep Learning

A Novel Diagnosis Method for SZ by Deep Neural Networks	433
<i>Chen Qiao, Yan Shi, Bin Li, and Tai An</i>	
A Novel Data-Driven Fault Diagnosis Method Based on Deep Learning	442
<i>Yuyan Zhang, Liang Gao, Xinyu Li, and Peigen Li</i>	

High Performance Computing

Simulated Precipitation and Reservoir Inflow in the Chao Phraya River Basin by Multi-model Ensemble CMIP3 and CMIP5	455
<i>Thannob Aribarg and Seree Supratid</i>	
An IDL-Based Parallel Model for Scientific Computations on Multi-core Computers	464
<i>Weili Kou, Lili Wei, Changxian Liang, Ning Lu, and Qiuhua Wang</i>	
Accelerating Redis with RDMA Over InfiniBand	472
<i>Wenhui Tang, Yutong Lu, Nong Xiao, Fang Liu, and Zhiguang Chen</i>	

Knowledge Base and its Framework

Application of Decision Trees in the Development of a Knowledge Base for a System of Support for Revitalization Processes	487
<i>Agnieszka Turek</i>	
ABC Metaheuristic Based Optimized Adaptation Planning Logic for Decision Making Intelligent Agents in Self Adaptive Software System	496
<i>Binu Rajan and Vinod Chandra</i>	
A Knowledge-Based Framework for Mitigating Hydro-Meteorological Disasters	505
<i>Pg. Hj. Asmali Pg. Badarudin, Thien Wan Au, and Somnuk Phon-Amnuaisuk</i>	

Fuzzy Control

Improved Stability and Stabilization Criteria for T-S Fuzzy Systems with Distributed Time-Delay.	517
<i>Qianqian Ma, Hongwei Xia, Guangcheng Ma, Yong Xia, and Chong Wang</i>	
Adaptive Neuro-Fuzzy Inference System: Overview, Strengths, Limitations, and Solutions	527
<i>Mohd Najib Mohd Salleh, Noureen Talpur, and Kashif Hussain</i>	
Acquisition of Knowledge in the Form of Fuzzy Rules for Cases Classification	536
<i>Tatiana Avdeenko and Ekaterina Makarova</i>	

Author Index	545
-------------------------------	-----

Data Mining and Big Data

Second International Conference, DMBD 2017,

Fukuoka, Japan, July 27 – August 1, 2017, Proceedings

Tan, Y.; Takagi, H.; Shi, Y. (Eds.)

2017, XV, 546 p. 210 illus., Softcover

ISBN: 978-3-319-61844-9
