

Contents

1	Introduction	1
1.1	Global Cosmological Model: Some Elements	1
1.2	Cosmological Chronology: Some Key Moments	5
1.3	Focus on Two Questions	9
	References	11
2	Tools	13
2.1	Electromagnetism	14
2.2	Magneto-Fluid Dynamics	16
2.3	Thermodynamics	20
2.4	Gravitation	22
2.5	Self-gravitating Magnetized Structures	23
	References	24
 Part I Generation of Cosmological Magnetic Fields		
3	Magnetogenesis by Photoionization	27
3.1	Magnetic Fields and Their Generation	27
3.1.1	Magnetic Fields in the Universe	27
3.1.2	Brief Overview of Magnetogenesis Models in Cosmology and Astrophysics	31
3.2	Intergalactic Magnetogenesis by Photoionization from the First Luminous Sources	36
3.2.1	Intuitively	37
3.2.2	Formally	38
3.2.3	Exploring \vec{B}_{global}	44
	References	49

4	Magnetogenesis Throughout the Epoch of Reionization	53
4.1	Procedure	53
4.2	Around One Source	55
4.2.1	One Cloud	55
4.2.2	Distribution of Clouds	56
4.3	Magnetic Energy Density Generated in the IGM	58
4.3.1	Ionization of the IGM	59
4.3.2	Distribution of Sources	61
	References	63
5	Numerical Approach	65
5.1	Realistic Shape of Strömgren Spheres	65
5.2	Statistical Properties	67
	References	68

Part II Gravitational Fragmentation of the Cosmic Web

6	Equilibrium States of Cosmic Walls and Filaments	71
6.1	Governing Equations	71
6.2	Uniform External Gravitational Acceleration	73
6.2.1	Density	74
6.2.2	Gravitational potential and acceleration	75
6.3	Self-gravitating Baryonic Structures	75
6.3.1	Density	76
6.3.2	Gravitational potential and acceleration	78
6.3.3	Extent of the structure	78
6.4	Baryonic Structures Embedded in Dark Matter	80
	References	83
7	Spectral Theory	85
7.1	Generalities	87
7.1.1	Governing Equations	87
7.1.2	Stability: Intuitively	98
7.1.3	Stability: Formally	100
7.2	Ideal MHD	107
7.2.1	Vector Eigenvalue Problem	107
7.2.2	Wave Equation	109
7.2.3	Spectrum	111
7.2.4	Stability Analysis	115
7.3	Gravitation	116
7.3.1	Vector Eigenvalue Problem	116
7.3.2	Cowling Versus Jeans	118
	References	120

8	Stability of Cosmic Walls	123
8.1	In the Cowling Approximation	123
8.1.1	Vector Eigenvalue Problem	124
8.1.2	Wave Equation	124
8.1.3	Spectrum	127
8.1.4	Local Analysis: WKB Dispersion Relations	133
8.2	Wave Equation Formulation	136
8.2.1	Wave Equation	136
8.2.2	A New Singular Frequency ω_G^2	140
8.2.3	The Three Important (inverse) Length Scales: k_ρ , k_J and k_y	142
8.2.4	Rewriting the Wave Equation Simply	144
8.2.5	Ordering of the Length Scales in the Slab	146
8.2.6	Local Analysis: Generalizing WKB Dispersion Relations	148
8.3	Matrix Formulation	152
8.3.1	Matrix Formulation	152
8.3.2	Solutions	154
8.3.3	Revisiting and Completing the Analysis of the Exponential Atmosphere	156
	References	167
9	Further Ongoing Works	169
9.1	Stability of Cosmic Filaments	169
9.2	Buoyancy: g-Modes and Convection	172
9.3	Refining the Question and the Approach	174
	References	177
10	Prospects	179
	References	186

Baryonic Processes in the Large-Scale Structuring of
the Universe

Durrive, J.-B.

2017, XIII, 187 p. 29 illus., 23 illus. in color., Hardcover

ISBN: 978-3-319-61880-7
