Part I Dynamical Systems and Numerical Schemes

1	Lyapunov Stability and Dynamical Systems	3
1.1	Lyapunov Stability	3
1.2	Autonomous Dynamical Systems	6
1.3	Invariant Sets	7
1.4	Limit Sets	8
1.5	Attractors	9
2	One Step Numerical Schemes	11
2.1	Discretisation Error	12
2.2	General One Step Schemes	13
2.2.1	Taylor Schemes	14
2.2.2	Schemes Derived by Integral Approximations	16
2.3	Orders of Local and Global Convergence	21
2.4	Consistency	23
2.5	Numerical Instability	25
2.6	Steady States of Numerical Schemes	27

Part II Steady States Under Discretisation

3	Linear Systems	35
3.1	Linear ODE in \mathbb{R}^1	36
3.2	Linear ODE in \mathbb{C}^1	37
3.3	The General Linear Case	38
4	Lyapunov Functions	41
4.1	Linear Systems Revisited	43
4.2	Application: The Linear Euler Scheme	44
4.3	Application: The Nonlinear Euler Scheme	45

5	Dissipative Systems with Steady States	49
6	Saddle Points Under Discretisation	55
6.1	Saddle Points and the Euler Scheme	60
6.1.1	A Nonlinear Example	61
6.1.2	Shadowing	63
6.2	General Case: Beyn's Theorem	64
Part III Autonomous Attractors Under Discretisation		
7	Dissipative Systems with Attractors	69
7.1	Euler Scheme Dynamics	70
7.2	Convergence of the Numerical Attractors	73
8	Lyapunov Functions for Attractors	77
8.1	Lyapunov Stability of Sets	80
8.2	Yoshizawa's Theorem	81
9	Discretisation of an Attractor: General Case	83
Part IV Nonautonomous Limit Sets Under Discretisation		
10	Dissipative Nonautonomous Systems	91
10.1	Nonautonomous Omega Limit Sets	92
10.2	Asymptotic Invariance	93
10.2.1	Asymptotic Positive Invariance	94
10.2.2	Asymptotic Negative Invariance	95
11	Discretisation of Nonautonomous Limit Sets	99
11.1	The Implicit Euler Scheme	100
11.2	Upper Semi Continuous Convergence of the Numerical Omega Limit Sets	101
12	Variable Step Size Discretisation of Autonomous Attractors	105
12.1	Variable Time Step Limit Sets	106
12.2	Upper Semi Continuous Convergence of the Numerical Omega Limit Sets	107
13	Discretisation of a Uniform Pullback Attractor	111
Notes		119
