1	Introduction	1
	Tsuko Nakamura and Wayne Orchiston	
1.1	The International Emergence of Astrophysics	1
1.2	The Emergence of Astrophysics in Asia	17
	References	19
 Part I Japan		
2	The Development of Astronomy and Emergence of Astrophysics in Japan	25
	Tsuko Nakamura	
2.1	Introduction	25
2.2	Encounters with Western Astronomy	26
2.3	The Introduction of Western Modern Astronomy	28
2.4	The Move to Mitaka and the Dawn of Astrophysical Studies	41
2.5	The Rise of Astrophysics in Japan	47
	References	52
3	Hirayama Kiyotsugu: Discoverer of Asteroid Families	57
	Seiko Yoshida and Tsuko Nakamura	
3.1	Introduction	57
3.2	The Hirayama Families of Asteroids	58
3.3	Why could Hirayama Discover the Families of Asteroids?	62
3.4	Statistical Analysis of Latitude Observations	68
3.5	Hirayama's Other Scientific Work	71
3.6	Conclusion	78
	Appendices	79
	References	80

4 Japanese Studies of Asteroids Following the Discovery of the Hirayama Families	85
Tsuko Nakamura	
4.1 Introduction	85
4.2 Studies on the Dynamics of Asteroids	87
4.3 Early Astrophysical Observations of Asteroids	89
4.4 Impact Experiments	91
4.5 Efforts Towards the Exploration of Asteroids by Spacecraft	94
4.6 Antarctic Meteorites	98
4.7 The Discovery Race by Asteroid Hunters	100
4.8 Other Recent Studies	104
4.9 Summary and Conclusion	106
References	107
5 The National Astronomical Observatory of Japan and Post-war Japanese Optical Astronomy	111
Toshiyuki Tajima	
5.1 Introduction	111
5.2 Construction of Large Japanese Telescopes—Three Case Studies	115
5.3 Discussion of the Japanese Astronomical Community	122
References	127
6 The Early Development of Japanese Radio Astronomy	129
Wayne Orchiston and Masato Ishiguro	
6.1 Introduction	129
6.2 A Missed Opportunity: The Dellinger Effect and Solar Radio Emission	130
6.3 Early Developments in Japanese Solar Radio Astronomy	131
6.4 Galactic Radio Astronomy	142
6.5 Discussion	142
6.6 Concluding Remarks	145
References	146

Part II South Korea

7 The Development of Astronomy in Korea and the Emergence of Astrophysics in South Korea	151
Il-Seong Nha, Sarah L. Nha, and Wayne Orchiston	
7.1 Introduction: A Short History of Astronomical Exchanges Between China and Korea	151
7.2 Observatories	155
7.3 Observing Stations	162
7.4 Organization and Who's Who	164

7.5	The Instruments	178
7.6	Star Maps	183
7.7	Calendars and Almanacs	190
7.8	The Emergence of Astrophysics in South Korea	193
7.9	Applied Historical Astronomy	199
7.10	Concluding Remarks	204
	References	205

Part III China

8	The Development of Astronomy and Emergence of Astrophysics in China	213
	Xiaoyu Ning, Xiaochun Sun, Wayne Orchiston, and Tsuko Nakamura	
8.1	The Legacy of Ancient Chinese Astronomy	214
8.2	The Beginnings of Astrophysics in China	221
8.3	Progress in Astrophysics Under State Planning and Management	232
8.4	Conclusions	237
	References	238
9	The Early Development of Chinese Radio Astronomy: The Role of W.N. Christiansen	245
	Wang Shouguan	
9.1	Introduction	245
9.2	Recollections of the Shahe Experiment	245
9.3	The Making of the Miyun Meter Wave Aperture Synthesis Telescope	248
9.4	Prof Ke and the Chinese Academy of Sciences (CAS)	252
9.5	Concluding Remarks	252
	References	254

Part IV Taiwan

10	The Development of Astronomy and Emergence of Astrophysics in Taiwan	257
	Wing-Huen Ip	
10.1	Introduction	257
10.2	Local Developments	259
10.3	Hawaii	261
10.4	Chile	265
10.5	The Future	266
	References	267

Part V Thailand

11 The Development of Astronomy and Emergence of Astrophysics in Thailand	271
Boonrucksar Soonthornthum	
11.1 Introduction: Ancient Astronomy in the South-East Asian Region	271
11.2 Lanna Astronomy	272
11.3 History of Astronomy in Siam	274
11.4 The Recent Development of Astronomy in Thailand	280
11.5 The Development of NARIT	284
11.6 Concluding Remarks	289
References	290
12 King Rama IV and French Observations of the 18 August 1868 Total Solar Eclipse from Wah-koa, Siam	291
Wayne Orchiston and Darunee Lingling Orchiston	
12.1 Introduction	291
12.2 The 1868 Eclipse	292
12.3 Initial Planning	294
12.4 The Personnel	294
12.5 Instrumentation and Preparations	297
12.6 Establishing the Eclipse Camp	304
12.7 Observing the Eclipse	306
12.8 Discussion	310
12.9 Concluding Remarks	314
References	315
13 King Rama V and British Observations of the 6 April 1875 Total Solar Eclipse from the Chao Lai Peninsula, Siam	319
Busaba Hutawarakorn Kramer and Michael Kramer	
13.1 Introduction	319
13.2 The Plan for the British Expedition	320
13.3 The Journey	320
13.4 The Observatory	321
13.5 The Observations and Results	322
13.6 Conclusions	324
References	325

Part VI Indonesia

14 The Development of Astronomy and Emergence of Astrophysics in Indonesia	329
Bambang Hidayat, Hakim L. Malasan, and Emanuel Sungging Mumpuni	
14.1 Introduction: The Rise of Observational Astronomy in Indonesia	329

14.2	The Renaissance: An era of Exploration and the Beginning of Modern Astronomy	331
14.3	The Rise of Independent Science.	333
14.4	The Southern sky: The Need for It to be Explored	334
14.5	Pre-WWII Astrophysics at Bosscha Observatory	338
14.6	Astronomy and Higher Education	341
14.7	The Role of Dr. Purbosiswoyo.	342
14.8	The Schmidt Telescope and the Study of Galactic Structure.	343
14.9	Astronomy Cooperation within Asian Countries.	346
14.10	The Expanding Universe and the Study of Cosmology.	348
14.11	Near-Earth Astronomy: Solar-Terrestrial Relations and Space Weather.	348
14.12	Astronomy at Present, and Future Prospects	350
	References.	352
15	J.A.C. Oudemans' Observations of the 18 August 1868 and 12 December 1871 Total Solar Eclipses from the Dutch East Indies	357
	Emanuel Sungging Mumpuni, Wayne Orchiston, and Wolfgang Steinicke	
15.1	Introduction	357
15.2	J.A.C. Oudemans: A Biographical Sketch.	358
15.3	Oudemans' Observations of the Total Solar Eclipses of 1868 and 1871	360
15.4	Concluding Remarks	371
	References.	372
16	American Observations of the 16 May 1901 Total Solar Eclipse from Padang, Dutch East Indies	375
	John Pearson and Wayne Orchiston	
16.1	Introduction: Lick Observatory Solar Eclipse Expeditions	375
16.2	Coronal Science pre-1901	375
16.3	The 1901 Lick Expedition to Padang, Dutch East Indies	377
16.4	Discussion and Concluding Remarks	386
	References.	390
 Part VII Australia		
17	The Development of Astronomy and the Foundations of Astrophysics in Australia	395
	Wayne Orchiston, Barry A.J. Clark, David Frew, and Jenny Andropoulos	
17.1	Introduction	395
17.2	Scientific Astronomy in the Pre-Astrophysics Era.	396
17.3	The Genesis of Astrophysics in Australia	400
17.4	Explorations in Astrophysics by Australian Amateur Astronomers	436

17.5	Discussion	439
17.6	Concluding Remarks	440
	References.	443
18	The Beginnings of Australian Radio Astronomy	453
	Woodruff T. Sullivan III	
18.1	Introduction	453
18.2	The Radiophysics Laboratory during the Post-war Decade.	454
18.3	Early Solar Work	461
18.4	'Radio Stars'	474
18.5	Overview of RP's First Decade	480
18.6	The Second Decade and beyond	490
	References.	493
19	The Early Development of Australian Radio Astronomy: The Role of the CSIRO Division of Radiophysics Field Stations	497
	Wayne Orchiston and Bruce Slee	
19.1	Introduction	497
19.2	The Radiophysics Field Stations	498
19.3	Concluding Remarks	567
	References.	572
 Part VIII New Zealand		
20	The Development of Astronomy and Emergence of Astrophysics in New Zealand	581
	John Hearnshaw and Wayne Orchiston	
20.1	Introduction: New Zealand's Astronomical Heritage	581
20.2	Cook's Voyages and the Transit of Venus	581
20.3	Māori Astronomy.	583
20.4	The Transits of Venus of 1874 and 1882, and the Total Solar Eclipse of 1885	585
20.5	Notable Early Amateur Astronomers.	587
20.6	The First Professional Astronomers.	589
20.7	New Zealand Amateur Astronomers in the Twentieth Century . . .	590
20.8	Some Significant Early Telescopes in New Zealand	594
20.9	The Royal Astronomical Society of New Zealand and Other Regional Societies.	598
20.10	Carter and Auckland Stardome Observatories.	599
20.11	Astronomy in New Zealand Universities.	600
20.12	Mt. John University Observatory.	603
20.13	Other University of Canterbury Astronomy Initiatives	611
20.14	Radio Astronomy in New Zealand and the SKA.	614
20.15	The Future of New Zealand Astronomy	617
	References.	618

21 Alexander William Bickerton: New Zealand's First Astrophysicist?	623
Gerard F. Gilmore	
21.1 Introduction: The Early Years	623
21.2 The Canterbury University College Appointment	625
21.3 Bickerton's Partial Impact Theory	631
21.4 Discussion	635
21.5 Conclusion	638
References	638
22 New Zealand Astronomy and the 9 September 1885 Total Solar Eclipse	641
Wayne Orchiston and Glen Rowe	
22.1 Introduction	641
22.2 Coronal and Chromospheric Science Prior to the 1885 Eclipse	642
22.3 New Zealand Astronomy 1874–1885	646
22.4 The 1885 Total Solar Eclipse	651
22.5 Discussion	668
22.6 Concluding Remarks	670
References	670
23 The Early Development of New Zealand Radio Astronomy	675
Wayne Orchiston	
23.1 Introduction	675
23.2 Dr. Elizabeth Alexander and the Enigmatic 'Norfolk Island Effect'	675
23.3 Solar Radio Astronomy and the 'Canterbury Project'	682
23.4 Alan Maxwell and Solar Radio Astronomy at Auckland University College	683
23.5 Ivan Thomsen and the Relationship Between Radio Emission and Optical Features on the Sun	684
23.6 Robert Francis Joyce: New Zealand's First Amateur Radio Astronomer	685
23.7 John Bolton, Gordon Stanley, Bruce Slee and the Riddle of the 'Radio Stars'	687
23.8 Concluding Remarks	694
References	699

Part IX India

24 The Development of Modern Astronomy and Emergence of Astrophysics in India	705
Rajesh Kochhar and Wayne Orchiston	
24.1 Introduction	705
24.2 Madras Observatory (1787)	709
24.3 The Great Trigonometrical Survey of India	715

24.4	Madras Observatory in the Nineteenth Century	718
24.5	The Royal Observatory at Lucknow	725
24.6	Trivandrum Observatory (1837–1852)	728
24.7	Juggarow's Observatory, Vizagapatam (1840–Post 1911).	732
24.8	W.S. Jacob and Poona non-Observatory	736
24.9	Nineteenth Century Positional Astronomy: A Summary.	736
24.10	Solar Eclipses and Transit of Venus: The Advent of Physical Astronomy	737
24.11	Dehra Dun Observatory (1878–1925)	747
24.12	St Xavier's College Observatory, Calcutta (1879).	748
24.13	Takhtasinghji's Observatory, Poona (1888–1912).	749
24.14	Kodaikanal Observatory (1899).	752
24.15	Nizamiah Observatory (1901)	756
24.16	Indian Responses to the Development of Astronomy in the Subcontinent	758
	References.	763
25	British Observations of the 18 August 1868 Total Solar Eclipse from Guntoor, India	771
	Wayne Orchiston, Eun-Hee Lee, and Young-Sook Ahn	
25.1	Introduction	771
25.2	The 1868 Eclipse	772
25.3	Solar Studies, and Other Indian Observations of the 1868 Eclipse.	790
25.4	Concluding Remarks	791
	References.	792
26	American Observations of the 22 January 1898 Total Solar Eclipse from Jeur, India	795
	Wayne Orchiston and John Pearson	
26.1	Introduction	795
26.2	Coronal Science Pre-1898	795
26.3	The 1898 Lick Expedition to Jeur, India	798
26.4	Discussion	805
26.5	Concluding Remarks	810
	References.	812
