

Contents

Invited Talks

Computer Aided Synthesis: A Game-Theoretic Approach.	3
<i>Véronique Bruyère</i>	
A Comprehensive Introduction to the Theory of Word-Representable Graphs	36
<i>Sergey Kitaev</i>	
Binomial Coefficients, Valuations, and Words	68
<i>Eric Rowland</i>	
Connecting Decidability and Complexity for MSO Logic.	75
<i>Michał Skrzypczak</i>	

Regular Papers

On Regular Expression Proof Complexity	83
<i>Simon Beier and Markus Holzer</i>	
Operational State Complexity and Decidability of Jumping Finite Automata	96
<i>Simon Beier, Markus Holzer, and Martin Kutrib</i>	
Equivalence of Symbolic Tree Transducers	109
<i>Vincent Hugot, Adrien Boiret, and Joachim Niehren</i>	
DFAs and PFAs with Long Shortest Synchronizing Word Length.	122
<i>Michiel de Bondt, Henk Don, and Hans Zantema</i>	
On the Mother of All Automata: The Position Automaton	134
<i>Sabine Broda, Markus Holzer, Eva Maia, Nelma Moreira, and Rogério Reis</i>	
Two-Way Two-Tape Automata.	147
<i>Olivier Carton, Léo Exibard, and Olivier Serre</i>	
Undecidability and Finite Automata.	160
<i>Jörg Endrullis, Jeffrey Shallit, and Tim Smith</i>	
On the Power of Permitting Semi-conditional Grammars	173
<i>Zsolt Gazdag and Krisztián Tichler</i>	

On the Interplay Between Babai and Černý's Conjectures	185
<i>François Gonze, Vladimir V. Gusev, Balázs Gerencsér, Raphaël M. Jungers, and Mikhail V. Volkov</i>	
Differences Between 2D Neighborhoods According to Real Time Computation	198
<i>Anael Grandjean</i>	
A Medvedev Characterization of Recognizable Tree Series.	210
<i>Luisa Herrmann</i>	
On the Descriptive Complexity of $\overline{\Sigma^*L}$	222
<i>Michal Hospodár, Galina Jirásková, and Peter Mlynářčík</i>	
Variations of Checking Stack Automata: Obtaining Unexpected Decidability Properties.	235
<i>Oscar H. Ibarra and Ian McQuillan</i>	
The Generalized Rank of Trace Languages.	247
<i>Michal Kunc and Jan Meitner</i>	
Two-Variable First Order Logic with Counting Quantifiers: Complexity Results	260
<i>Kamal Lodaya and A.V. Sreejith</i>	
Deleting Deterministic Restarting Automata with Two Windows.	272
<i>František Mráz and Friedrich Otto</i>	
Relative Prefix Distance Between Languages	284
<i>Timothy Ng, David Rappaport, and Kai Salomaa</i>	
On the Tree of Binary Cube-Free Words	296
<i>Elena A. Petrova and Arseny M. Shur</i>	
Limited Automata and Unary Languages	308
<i>Giovanni Pighizzini and Luca Prigioniero</i>	
A Characterization of Infinite LSP Words	320
<i>Gwenaél Richomme</i>	
On Computational Complexity of Set Automata	332
<i>Alexander A. Rubtsov and Mikhail N. Vyalyi</i>	
On the Number of Rich Words.	345
<i>Josef Rukavicka</i>	

One-Way Bounded-Error Probabilistic Pushdown Automata and Kolmogorov Complexity (Preliminary Report)	353
<i>Tomoyuki Yamakami</i>	
Classifying Non-periodic Sequences by Permutation Transducers	365
<i>Hans Zantema and Wieb Bosma</i>	
Author Index	379

Developments in Language Theory
21st International Conference, DLT 2017, Liège,
Belgium, August 7-11, 2017, Proceedings
Charlier, É.; Leroy, J.; Rigo, M. (Eds.)
2017, XXIII, 379 p. 79 illus., Softcover
ISBN: 978-3-319-62808-0
