

Contents

1	Introduction	1
1.1	Historical Introduction	1
1.2	Motivation	3
1.2.1	Sr_2RuO_4 as an Odd-parity Superconductor	3
1.2.2	Sr_2RuO_4 as a Topological Superconductor	4
1.2.3	Sr_2RuO_4 as a Weakly Coupled Superconductor	6
1.2.4	Sr_2RuO_4 as a Multi-band Superconductor	6
1.3	Open Questions About Sr_2RuO_4	7
1.3.1	Gap Anisotropy	9
1.3.2	Chiral or Helical	10
1.4	Outline	14
	References	15
2	Weak Coupling Theory	19
2.1	Introduction	19
2.2	Multi-orbital Hubbard Model	21
2.3	Pseudo-spin Basis	23
2.3.1	Pseudo-spin and Crystal Symmetries	26
2.3.2	Superconducting Order Parameter in Pseudo-Spin Basis	27
2.4	Linear Response	28
2.4.1	Field Theory Formalism	29
2.5	Bethe-Salpeter Equation	32
2.5.1	Frequency Dependence	34
2.5.2	Solution of the Linearised Gap Equation	36
2.6	Calculation of the Effective Interaction	37
2.6.1	Pseudo-spin Dependence	39
2.7	Generalized BCS Formalism	43
2.7.1	Singlet	45
2.7.2	Triplet	47
2.7.3	Specific Heat Jump	49

2.8	Conclusion	50
2.8.1	Range of Validity	51
	References.	51
3	Application to Sr_2RuO_4	53
3.1	Introduction	53
3.2	Model.	54
3.2.1	Tight-Binding	54
3.2.2	Interactions	57
3.3	Weak Coupling Analysis	59
3.3.1	Degenerate Case	61
3.4	Results	62
3.4.1	Gap Anisotropy and Chiral Versus Helical	62
3.4.2	Pairing Eigenvalue	66
3.4.3	Impact of Spin-Orbit Coupling	67
3.5	Conclusion	68
	References.	69
4	Edge Currents	71
4.1	Introduction	71
4.2	Chern Number	71
4.2.1	Single-Band Spinless Case	72
4.2.2	Multi-band Spinful Case	73
4.2.3	The Case of Sr_2RuO_4	74
4.2.4	Source of Anisotropy	76
4.2.5	Change to Orbital Basis	78
4.3	Implications for Experiments	80
4.3.1	Charge Currents–Ginzburg-Landau	80
4.3.2	Charge Currents–Bogolyubov-De Gennes	81
4.4	Conclusion	86
	References.	86
5	Strain	89
5.1	Introduction	89
5.2	Model.	91
5.3	Results	96
5.3.1	Chiral Case	97
5.3.2	Helical Case	101
5.4	Conclusion	103
	References.	103
6	Conclusion	105
	References.	108

Weak-Coupling Theory of Topological Superconductivity

The Case of Strontium Ruthenate

Scaffidi, Th.

2017, XVIII, 108 p. 33 illus., 12 illus. in color., Hardcover

ISBN: 978-3-319-62866-0
