

Contents

1	Introduction	1
1.1	The AdS_5/CFT_4 and AdS_4/CFT_3 Correspondences	3
1.2	Integrable Systems in AdS/CFT	7
1.3	Quantization of Strings in AdS/CFT	9
1.4	Perturbation Theory for Sigma-Models	13
1.4.1	Two-Dimensional Fluctuation Operators	15
1.4.2	String Effective Action Beyond the Next-to-Leading Order	18
1.5	Lattice Field Theory for the $AdS_5 \times S^5$ String Sigma-Model	19
1.6	Plan of the Thesis	21
	References	22
2	Superstring Actions in $AdS_5 \times S^5$ and $AdS_4 \times \mathbb{CP}^3$ Spaces	33
2.1	Supercoset Construction of the String Action in $AdS_5 \times S^5$	33
2.1.1	String Sigma-Model for Coset Spaces and κ -Symmetry	34
2.1.2	Classical Integrability of the Supercoset Model	37
2.1.3	The $AdS_5 \times S^5$ String Action in the AdS Light-Cone Gauge	38
2.2	The $AdS_4 \times \mathbb{CP}^3$ String Action in the AdS Light-Cone Gauge	43
	References	48
3	Geometric Properties of Semiclassically Quantized Strings	51
3.1	Geometry of the $AdS_5 \times S^5$ Space	52
3.2	The Minimal-Surface Equations	54
3.3	Bosonic Fluctuations	56
3.3.1	The Bosonic Lagrangian	56
3.3.2	The Normal Bundle	62
3.3.3	Mass Matrix and Sum Rules	63

3.4	Fermionic Fluctuations	65
3.4.1	The Kinetic Term	67
3.4.2	The Flux Term	68
3.4.3	Mass Matrix and Sum Rule.	69
3.5	Quantum Divergences.	70
3.5.1	Regularization of the Classical Action	71
3.5.2	One-Loop Divergences	71
	References.	74
4	“Exact” Semiclassical Quantization of Folded Spinning Strings . . .	77
4.1	Fluctuation Spectrum for the Folded Strings.	79
4.1.1	Landau-Lifshitz Effective Action for the (J_1, J_2) -String.	80
4.1.2	Bosonic Action for the (S, J) -String	82
4.2	Bosonic One-Loop Partition Functions.	85
4.2.1	One-Loop Energy for the (J_1, J_2) -String	85
4.2.2	One-Loop Energy for the (S, J) -String	90
	References.	93
5	Towards Precision Holography for Latitude Wilson Loops	95
5.1	Review of Supersymmetric Wilson Loops in $\mathcal{N} = 4$ SYM	96
5.2	Localization of DGRT Wilson Loops on S^2	98
5.2.1	1/2-BPS Circular Wilson Loop.	100
5.2.2	1/4-BPS Latitude Wilson Loops.	102
5.3	Semiclassical Strings for Latitude Wilson Loops	103
5.4	Classical Solution	105
5.5	One-Loop Fluctuation Determinants	108
5.5.1	Bosonic Sector	109
5.5.2	Fermionic Sector.	112
5.6	One-Loop Partition Functions.	116
5.6.1	The Circular Loop.	119
5.6.2	Ratio Between Latitude and Circular Loop	119
5.7	Comparison with Recent Developments	122
5.8	Unresolved Subtleties in Sigma-Model Perturbation Theory	124
	References.	125
6	Light-Like Cusp Anomaly and the Interpolating Function in ABJM	129
6.1	The Null Cusp Vacuum and Fluctuation Lagrangian	133
6.2	Cusp Anomaly at One Loop.	135
6.3	Cusp Anomaly at Two Loops.	137
6.3.1	Bosonic Sector	137
6.3.2	Fermionic Sector.	139
6.3.3	Comparison with the $AdS_5 \times S^5$ Scaling Function at Two Loops	142
	References.	143

7	$AdS_5 \times S^5$ Superstring on the Lattice	147
7.1	The Cusp Anomaly of $\mathcal{N} = 4$ SYM and the Light-Like Limit	149
7.2	The Continuum Action and Its Symmetries	151
7.2.1	The Action in the AdS Light-Cone Gauge	151
7.2.2	The Mass Spectrum	153
7.2.3	Global Symmetries of the Action	155
7.3	Linearization of the Anti-commuting Scalars Interactions	156
7.4	Discretization and Lattice Perturbation Theory	158
7.4.1	Wilson-Like Term for Free Fermions	158
7.4.2	Promoting the Wilson-Like Term to the Interacting Case	161
7.5	Continuum Limit	162
7.6	Measuring the Observables	164
7.6.1	The $\langle Xx^* \rangle$ Correlator	164
7.6.2	The Bosonic Action and the Scaling Function	166
7.6.3	The Pfaffian Phase	170
7.7	New Insight into the Pfaffian Phase	173
	References	174
8	Conclusion and Outlook	177
8.1	Summary of the Main Results	177
8.2	Future Directions	179
	References	182

Perturbative and Non-perturbative Approaches to
String Sigma-Models in AdS/CFT

Vescovi, E.

2017, XIII, 239 p. 32 illus., 18 illus. in color., Hardcover

ISBN: 978-3-319-63419-7
