
Contents

1 Common Bean: Economic Importance and Relevance to Biological Science Research	1
James R. Myers and Ken Kmiecik	
2 Domestication and Crop History	21
Valerio Di Vittori, Elisa Bellucci, Elena Bitocchi, Domenico Rau, Monica Rodriguez, Maria Leonarda Murgia, Laura Nanni, Giovanna Attene and Roberto Papa	
3 Cytogenetics and Comparative Analysis of <i>Phaseolus</i> Species	57
Artur Fonsêca and Andrea Pedrosa-Harand	
4 Genetic Mapping and QTL Analysis in Common Bean	69
Ana M. González, Fernando J. Yuste-Lisbona, Antonia Fernández-Lozano, Rafael Lozano and Marta Santalla	
5 Requirement of Whole-Genome Sequencing.	109
Martha Rendón-Anaya and Alfredo Herrera-Estrella	
6 Common Bean Genomes: Mining New Knowledge of a Major Societal Crop	129
Phillip E. McClean and Bodo Raatz	
7 Organelle Genomes in <i>Phaseolus</i> Beans and Their Use in Evolutionary Studies	147
Maria I. Chacón Sánchez	
8 Phytic Acid Biosynthesis and Transport in <i>Phaseolus vulgaris</i>: Exploitation of New Genomic Resources	167
Eleonora Cominelli, Gregorio Orozco-Arroyo and Francesca Sparvoli	
9 What Is Present at Common Bean Subtelomeres? Large Resistance Gene Clusters, Knobs and <i>Khipu</i> Satellite DNA	187
Manon M. S. Richard, Vincent Thareau, Nicolas W. G. Chen, Chouaib Meziadi, Stéphanie Pflieger and Valérie Geffroy	

10 Comparison of Gene Families: Seed Storage and Other Seed Proteins	201
Jaya Joshi, Sudhakar Pandurangan, Marwan Diapari and Frédéric Marsolais	
11 A Comparison of Phenylpropanoid Pathway Gene Families in Common Bean. Focus on P450 and C4H Genes	219
Yarmilla Reinprecht, Gregory E. Perry and K. Peter Pauls	
12 Phylogenomics: The Evolution of Common Bean as Seen from the Perspective of All of Its Genes	263
Salvador Capella-Gutiérrez, Anna Vlasova and Toni Gabaldón	
13 Prospects: The Importance of Common Bean as a Model Crop	289
Marcelino Pérez de la Vega, Marta Santalla and Frédéric Marsolais	

The Common Bean Genome
