

Contents

Part I Introduction to the CRISPR Revolution

1	Viral Vectors, Engineered Cells and the CRISPR Revolution	3
	James E. DiCarlo, Anurag Deeconda, and Stephen H. Tsang	
2	Combining Engineered Nucleases with Adeno-associated Viral Vectors for Therapeutic Gene Editing	29
	Benjamin E. Epstein and David V. Schaffer	

Part II CRISPR in Model Systems

3	From Reductionism to Holism: Toward a More Complete View of Development Through Genome Engineering	45
	Rebecca K. Delker and Richard S. Mann	
4	A Transgenic Core Facility’s Experience in Genome Editing Revolution	75
	Celvie L. Yuan and Yueh-Chiang Hu	
5	Genome Editing to Study Ca²⁺ Homeostasis in Zebrafish Cone Photoreceptors	91
	Susan E. Brockerhoff	
6	CRISPR: From Prokaryotic Immune Systems to Plant Genome Editing Tools	101
	Anindya Bandyopadhyay, Shamik Mazumdar, Xiaojia Yin, and William Paul Quick	

Part III The Future of CRISPR

7 Target Discovery for Precision Medicine Using High-Throughput Genome Engineering.	123
Xinyi Guo, Poonam Chitale, and Neville E. Sanjana	
8 CRISPR in the Retina: Evaluation of Future Potential	147
Galaxy Y. Cho, Sally Justus, Jesse D. Sengillo, and Stephen H. Tsang	
9 The Future of CRISPR Applications in the Lab, the Clinic and Society	157
Soren H. Hough and Ayokunmi Ajetunmobi	

Precision Medicine, CRISPR, and Genome Engineering
Moving from Association to Biology and Therapeutics

Tsang, S.H. (Ed.)

2017, IX, 178 p. 19 illus., 15 illus. in color., Hardcover

ISBN: 978-3-319-63903-1
