|----------|---------------------------------------------------------------------|-----------|
| <b>1</b> | <b>Introduction</b>                                                 | <b>1</b>  |
| 1.1      | Algebraic Approach to Quantum Field Theory on Curved Spacetimes     | 2         |
| 1.2      | States with Good Physical Properties                                | 5         |
| 1.3      | Bulk to Boundary Correspondence and Construction of Hadamard States | 7         |
|          | References                                                          | 9         |
| <b>2</b> | <b>General Geometric Setup</b>                                      | <b>11</b> |
| 2.1      | Globally Hyperbolic Spacetimes                                      | 11        |
| 2.2      | Spacetimes with Distinguished Light-Like 3-Surfaces                 | 14        |
| 2.2.1    | Asymptotically Flat Spacetimes                                      | 15        |
| 2.2.2    | A Compound Example: Schwarzschild Spacetime                         | 16        |
| 2.2.3    | Asymptotic Symmetries: The Bondi-Metzner-Sachs Group                | 20        |
| 2.2.4    | Expanding Universes with Cosmological Horizon                       | 24        |
| 2.2.5    | The Cosmological-Horizon Symmetry Group                             | 27        |
|          | References                                                          | 32        |
| <b>3</b> | <b>Quantum Fields in Spacetimes with Null Surfaces</b>              | <b>35</b> |
| 3.1      | Algebra of Observables in Globally Hyperbolic Spacetimes            | 35        |
| 3.2      | Observables on Null Infinity                                        | 42        |
| 3.3      | The Bulk-to-Boundary Algebra Injection                              | 45        |
| 3.3.1    | Asymptotically Flat Spacetimes                                      | 46        |
| 3.3.2    | Cosmological Spacetimes                                             | 49        |
| 3.3.3    | The Case of Schwarzschild Spacetime                                 | 53        |
|          | References                                                          | 55        |
| <b>4</b> | <b>Boundary-Induced Hadamard States</b>                             | <b>57</b> |
| 4.1      | Algebraic States and the Hadamard Condition                         | 57        |
| 4.1.1    | Algebraic States, GNS Construction, and All That                    | 58        |

|          |                                                                             |           |
|----------|-----------------------------------------------------------------------------|-----------|
| 4.1.2    | Hadamard States                                                             | 63        |
| 4.1.3    | Natural Gaussian States for the Boundary Algebra                            | 71        |
| 4.2      | The Bulk-to-Boundary Correspondence for States                              | 74        |
| 4.2.1    | Asymptotically Flat Spacetimes                                              | 74        |
| 4.2.2    | Cosmological Spacetimes                                                     | 76        |
| 4.2.3    | The Unruh State on Schwarzschild Spacetime                                  | 78        |
| 4.3      | Some Further Applications                                                   | 85        |
| 4.3.1    | Asymptotic Vacua and Scattering States                                      | 85        |
| 4.3.2    | Applications to Cosmology                                                   | 87        |
| 4.3.3    | Hadamard States and Hawking Radiation                                       | 91        |
|          | References                                                                  | 94        |
| <b>5</b> | <b>Wick Polynomials and Extended Observables Algebras</b>                   | <b>97</b> |
| 5.1      | Extended Algebra of Fields                                                  | 97        |
| 5.2      | Extension of the Algebra on the Boundary                                    | 100       |
| 5.3      | Interplay Between Algebras and States on $\mathcal{D}$ and on $\mathcal{C}$ | 103       |
|          | References                                                                  | 105       |

Hadamard States from Light-like Hypersurfaces

Dappiaggi, C.; Moretti, V.; Pinamonti, N.

2017, VIII, 106 p. 2 illus., Softcover

ISBN: 978-3-319-64342-7
