

Contents

Degree Associated Reconstruction Number of Biregular Bipartite Graphs Whose Degrees Differ by at Least Two	1
<i>A. Anu and S. Monikandan</i>	
1-Normal DRA for Insertion Languages.	10
<i>Abhisek Midya, Lakshmanan Kuppusamy, V.S. Sumitha, and Alok Kumar Pani</i>	
Formal Language Representation and Modelling Structures Underlying RNA Folding Process	20
<i>Anand Mahendran and Lakshmanan Kuppusamy</i>	
Homometric Number of a Graph and Some Related Concepts	30
<i>Anu V. and Aparna Lakshmanan S.</i>	
Forbidden Subgraphs of Bigraphs of Ferrers Dimension 2	38
<i>Ashok Kumar Das and Ritapa Chakraborty</i>	
Global Secure Domination in Graphs.	50
<i>S.V. Divya Rashmi, S. Arumugam, and A. Somasundaram</i>	
A Novel Reversible Data Hiding Method in Teleradiology to Maximize Data Capacity in Medical Images	55
<i>S. Fepslin Athish Mon, K. Suthendran, K. Arjun, and S. Arumugam</i>	
Indicated Coloring of Cartesian Product of Graphs	63
<i>P. Francis and S. Francis Raj</i>	
A Bi-level Security Mechanism for Efficient Protection on Graphs in Online Social Network.	69
<i>D. Franklin Vinod and V. Vasudevan</i>	
On Nearly Distance Magic Graphs	76
<i>Aloysius Godinho, T. Singh, and S. Arumugam</i>	
Evenly Partite Directed Bigraph Factorization of Wreath Product of Graphs. . . .	83
<i>P. Hemalatha</i>	
Minimum Layout of Circulant Graphs into Certain Height Balanced Trees. . .	90
<i>Jessie Abraham and Micheal Arockiaraj</i>	
Dissecting Power of Certain Matrix Languages.	98
<i>J. Julie, J. Baskar Babujee, and V. Masilamani</i>	

Degree Associated Reconstruction Number of Split Graphs with Regular Independent Set	106
<i>N. Kalai Mathi and S. Monikandan</i>	
Distance Antimagic Labelings of Graphs	113
<i>N. Kamatchi, G.R. Vijayakumar, A. Ramalakshmi, S. Nilavarasi, and S. Arumugam</i>	
Probabilistic Conjunctive Grammar	119
<i>K. Kanchan Devi and S. Arumugam</i>	
(1, 2)-Domination in Graphs.	128
<i>K. Kayathri and S. Vallirani</i>	
New Construction on SD-Prime Cordial Labeling	134
<i>A. Lourdusamy and F. Patrick</i>	
Dominator Coloring of Generalized Petersen Graphs	144
<i>J. Maria Jeyaseeli, Nazanin Movarraei, and S. Arumugam</i>	
Super Edge-Antimagic Gracefulness of Disconnected Graphs	152
<i>G. Marimuthu and P. Krishnaveni</i>	
Mixed Noise Elimination and Data Hiding for Secure Data Transmission. . . .	156
<i>P. Mohanakrishnan, K. Suthendran, S. Arumugam, and T. Panneerselvam</i>	
Analysis of Particle Swarm Optimization Based 2D FIR Filter for Reduction of Additive and Multiplicative Noise in Images	165
<i>V. Muneeswaran and M. Pallikonda Rajasekaran</i>	
Irregularity Strength of Corona of Two Graphs.	175
<i>K. Muthu Guru Packiam, T. Manimaran, and A. ThuraiSwamy</i>	
1-Distant Irregularity Strength of Graphs	182
<i>K. Muthu Guru Packiam, T. Manimaran, and A. ThuraiSwamy</i>	
Cloud Data Security Based on Data Partitions and Multiple Encryptions	191
<i>B. Muthulakshmi and M. Venkatesulu</i>	
Upper Majority Domination Number of a Graph.	197
<i>A. Muthuselvi and S. Arumugam</i>	
Super $(a, 3)$ -edge Antimagic Total Labeling for Union of Two Stars	203
<i>M. Nalliah and S. Arumugam</i>	
On Determinant of Laplacian Matrix and Signless Laplacian Matrix of a Simple Graph.	212
<i>Olayiwola Babarinsa and Hailiza Kamarulhaili</i>	

On the Complexity of Minimum Cardinality Maximal Uniquely Restricted Matching in Graphs	218
<i>B.S. Panda and Arti Pandey</i>	
Partial Grundy Coloring in Some Subclasses of Bipartite Graphs and Chordal Graphs	228
<i>B.S. Panda and Shaily Verma</i>	
On Prime Distance Labeling of Graphs	238
<i>A. Parthiban and N. Gnanamalar David</i>	
Dominator Colorings of Products of Graphs	242
<i>P. Paulraja and K. Raja Chandrasekar</i>	
Efficient Hybrid Approach for Compression of Multi Modal Medical Images	251
<i>B. Perumal, M. Pallikonda Rajasekaran, and T. Arun Prasath</i>	
The Median Problem on Symmetric Bipartite Graphs	262
<i>K. Pravas and A. Vijayakumar</i>	
Intuitionistic Fuzzy Automaton with Unique Membership and Unique Nonmembership Transitions	271
<i>K. Jency Priya and T. Rajaretnam</i>	
Independent 2-Point Set Domination in Graphs	281
<i>Purnima Gupta and Deepti Jain</i>	
On Graphs Whose Graphoidal Length Is Half of Its Size	289
<i>Purnima Gupta and Rajesh Singh</i>	
Point-Set Domination in Graphs. VIII: Perfect and Efficient PSD Sets	300
<i>Purnima Gupta, Alka, and Rajesh Singh</i>	
Graphoidal Length and Graphoidal Covering Number of a Graph	305
<i>Purnima Gupta, Rajesh Singh, and S. Arumugam</i>	
An Overview of the MapReduce Model	312
<i>S. Rajeswari, K. Suthendran, K. Rajakumar, and S. Arumugam</i>	
Identification of Salinity Stress Tolerant Proteins in Sorghum Bicolor Computational Approach	318
<i>S. Rajeswari, M. Indhumathy, A. Somasundaram, Neeru Sood, and S. Arumugam</i>	
On Total Roman Domination in Graphs	326
<i>P. Roushini Leely Pushpam and S. Padmapriya</i>	

Restrained Differential of a Graph.	332
<i>P. Roushini Leely Pushpam and D. Yokesh</i>	
The Distinguishing Number of Kronecker Product of Two Graphs	341
<i>Saeid Alikhani and Samaneh Soltani</i>	
Grammar Systems Based on Equal Matrix Rules and Alphabetic Flat Splicing.	347
<i>G. Samdanielthompson, N. Gnanamalar David, and K.G. Subramanian</i>	
3-Simple 2-Fold 5-Cycle Systems	357
<i>R. Sangeetha and A. Muthusamy</i>	
ANN-Based Bias Correction Algorithm for Precipitation in the Yarra River Basin, Australia	362
<i>P. Saravanan, C. Sivapragasam, M. Nitin, S. Balamurali, R.K. Ragul, S. Sundar Prakash, G. Selva Ganesan, and V. Vel Murugan</i>	
Some Diameter Notions of the Generalized Mycielskian of a Graph	371
<i>K.S. Savitha, M.R. Chithra, and A. Vijayakumar</i>	
On Minimization of Deterministic Automaton with Rough Output.	383
<i>B.K. Sharma, S. Sharan, and S.P. Tiwari</i>	
Statistical Approach to Trace the Source of Attack Based on the Variability in Data Flows	392
<i>T. Subburaj, K. Suthendran, and S. Arumugam</i>	
Independent Resolving Number of Convex Polytopes	401
<i>B. Suganya and S. Arumugam</i>	
Signed Cycle Domination in Planar Graphs	409
<i>M. Sundarakannan and S. Arumugam</i>	
An Optimization Algorithm for Task Scheduling in Cloud Computing Based on Multi-Purpose Cuckoo Seek Algorithm	415
<i>R. Sundarrajan and V. Vasudevan</i>	
P_3 -Factorization of Triangulated Cartesian Product of Complete Graph of Odd Order	425
<i>A. Tamil Elakkiya and A. Muthusamy</i>	
Further Progress on the Heredity of the Game Domination Number.	435
<i>Tijo James, Paul Dorbec, and Ambat Vijayakumar</i>	

Modeling of Dissolved Oxygen Using Genetic Programming Approach	445
<i>S. Vanitha, C. Sivapragasam, and N.V.N. Nampoothiri</i>	
A Stream Cipher for Real Time Applications	453
<i>M. Venkatesulu and M. Ravi</i>	
Erratum to: On Total Roman Domination in Graphs	E1
<i>P. Roushini Leely Pushpam and S. Padmapriya</i>	
Author Index	457

Theoretical Computer Science and Discrete
Mathematics

First International Conference, ICTCSDM 2016,
Krishnankoil, India, December 19-21, 2016, Revised
Selected Papers

Arumugam, S.; Bagga, J.; Beineke, L.W.; Panda, B.S.
(Eds.)

2017, XIII, 458 p. 122 illus., Softcover

ISBN: 978-3-319-64418-9
