

Contents

Invited Paper

Groups and Crowds: Behaviour Analysis of People Aggregations	3
<i>Sadegh Mohammadi, Francesco Setti, Alessandro Perina, Marco Cristani, and Vittorio Murino</i>	

Computer Graphics Theory and Applications

Real-Time Contour Image Vectorization on GPU	35
<i>Xiaoliang Xiong, Jie Feng, and Bingfeng Zhou</i>	
Screen Space Curvature and Ambient Occlusion	51
<i>Martin Prantl, Libor Váša, and Ivana Kolingerová</i>	
Multi-Class Error-Diffusion with Blue-Noise Property and Its Application . . .	72
<i>Xiaoliang Xiong, Haoli Fan, Jie Feng, Zhihong Liu, and Bingfeng Zhou</i>	
Copula Eigenfaces with Attributes: Semiparametric Principal Component Analysis for a Combined Color, Shape and Attribute Model.	95
<i>Bernhard Egger, Dinu Kaufmann, Sandro Schönborn, Volker Roth, and Thomas Vetter</i>	
Representing Shapes of 2D Point Sets by Straight Outlines	113
<i>Dirk Feldmann and Melanie Pohl</i>	
Sketching 2D Character Animation Using a Data-Assisted Interface	135
<i>Priyanka Patel, Heena Gupta, and Parag Chaudhuri</i>	
Skin Deformation Methods for Interactive Character Animation	153
<i>Nadine Abu Rumman and Marco Fratarcangeli</i>	
Appealing Avatars from 3D Body Scans: Perceptual Effects of Stylization . . .	175
<i>Reuben Fleming, Betty J. Mohler, Javier Romero, Michael J. Black, and Martin Breidt</i>	

Information Visualization Theory and Applications

On the Visualization of Hierarchical Relations and Tree Structures with TagSpheres	199
<i>Stefan Jänicke and Gerik Scheuermann</i>	

Visual Analysis of Character and Plot Information Extracted from Narrative Text.	220
<i>Markus John, Steffen Lohmann, Steffen Koch, Michael Wörner, and Thomas Ertl</i>	
Visual Querying of Semantically Enriched Movement Data	242
<i>Florian Haag, Robert Krüger, and Thomas Ertl</i>	
Correlation Coordinate Plots: Efficient Layouts for Correlation Tasks	264
<i>Hoa Nguyen and Paul Rosen</i>	
Analysis and Comparison of Feature-Based Patterns in Urban Street Networks	287
<i>Lin Shao, Sebastian Mittelstädt, Ran Goldblatt, Itzhak Omer, Peter Bak, and Tobias Schreck</i>	
Swarm-Based Edge Bundling Applied to Flow Mapping	310
<i>Evgheni Polisciuc and Penousal Machado</i>	
Computer Vision Theory and Applications	
Relative Pose Estimation from Straight Lines Using Optical Flow-Based Line Matching and Parallel Line Clustering	329
<i>Naja von Schmude, Pierre Lothe, Jonas Witt, and Bernd Jähne</i>	
A Detailed Description of Direct Stereo Visual Odometry Based on Lines . . .	353
<i>Thomas Holzmann, Friedrich Fraundorfer, and Horst Bischof</i>	
Consumer-Level Virtual Reality Motion Capture.	374
<i>Catarina Runa Miranda and Verónica Costa Orvalho</i>	
Ground-Truth Tracking Data Generation Using Rotating Real-World Objects.	395
<i>Zoltán Puzsai and Levente Hajder</i>	
The Sliced Pineapple Grid Feature for Predicting Grasping Affordances. . . .	418
<i>Mikkel Tang Thomsen, Dirk Kraft, and Norbert Krüger</i>	
Extending Guided Image Filtering for High-Dimensional Signals	439
<i>Shu Fujita and Norishige Fukushima</i>	
Exemplar-Based Image Inpainting Using an Affine Invariant Similarity Measure	454
<i>Vadim Fedorov, Pablo Arias, Gabriele Facciolo, and Coloma Ballester</i>	

Real-Time Visual Odometry by Patch Tracking Using GPU-Based Perspective Calibration	475
<i>Rafael F.V. Saracchini, Carlos A. Catalina, Rodrigo Minetto, and Jorge Stolfi</i>	
Adaptive Non-local Means Using Weight Thresholding	493
<i>Asif Khan and Mahmoud R. El-Sakka</i>	
How Good Can a Face Identifier Be Without Learning?	515
<i>Yang Zhong, Anders Hedman, and Haibo Li</i>	
Object Tracking Guided by Segmentation Reliability Measures and Local Features	534
<i>Cristian M. Orellana and Marcos D. Zuniga</i>	
Affordance Origami: Unfolding Agent Models for Hierarchical Affordance Prediction	555
<i>Viktor Seib, Malte Knauf, and Dietrich Paulus</i>	
From Occlusion to Global Depth Order, a Monocular Approach	575
<i>Babak Rezaeirowshan, Coloma Ballester, and Gloria Haro</i>	
Infinite, Sparse 3D Modelling Volumes	593
<i>Eugen Funk and Anko Börner</i>	
Author Index	607

Computer Vision, Imaging and Computer Graphics
Theory and Applications

11th International Joint Conference, VISIGRAPP 2016,
Rome, Italy, February 27 – 29, 2016, Revised Selected
Papers

Braz, J.; Magnenat-Thalmann, N.; Richard, P.; Linsen, L.;
Telea, A.; Battiato, S.; Imai, F. (Eds.)

2017, XXI, 608 p. 319 illus., Softcover

ISBN: 978-3-319-64869-9
