 - 3.1 Fundamentals 21
 - 3.2 Table Values 23
 - 3.3 Memory-Less Property 24

3.4	Poisson Relation	25
3.5	Sample Data	26
3.6	Parameter Estimate from Sample Data	26
3.7	Parameter Estimate When No Data	27
3.8	Summary	29
4	Erlang	31
4.1	Introduction	31
4.2	Fundamentals	31
4.3	Tables	32
4.4	Sample Data	35
4.5	Parameter Estimates When Sample Data	35
4.6	Parameter Estimates When No Data	36
4.7	Summary	37
5	Gamma	39
5.1	Introduction	39
5.2	Fundamentals	39
5.3	Gamma Function	40
5.4	Cumulative Probability	40
5.5	Estimating the Cumulative Probability	42
5.6	Sample Data	44
5.7	Parameter Estimates When Sample Data	44
5.8	Parameter Estimate When No Data	45
5.9	Summary	47
6	Beta	49
6.1	Introduction	49
6.2	Fundamentals	50
6.3	Standard Beta	50
6.4	Beta Has Many Shapes	51
6.5	Sample Data	53
6.6	Parameter Estimates When Sample Data	53
6.7	Regression Estimate of the Mean from the Mode	55
6.8	Parameter Estimates When No Data	56
6.9	Summary	57
7	Weibull	59
7.1	Introduction	59
7.2	Fundamentals	59
7.3	Standard Weibull	60
7.4	Sample Data	62
7.5	Parameter Estimate of γ When Sample Data	62
7.6	Parameter Estimate of (k_1, k_2) When Sample Data	63
7.7	Parameter Estimate When No Data	66
7.8	Summary	68

8	Normal	69
8.1	Introduction	69
8.2	Fundamentals	69
8.3	Standard Normal	70
8.4	Hastings Approximations	71
8.5	Tables of the Standard Normal	72
8.6	Sample Data	74
8.7	Parameter Estimates When Sample Data	74
8.8	Parameter Estimates When No Data	75
8.9	Summary	76
9	Lognormal	77
9.1	Introduction	77
9.2	Fundamentals	77
9.3	Lognormal Mode	78
9.4	Lognormal Median	78
9.5	Sample Data	79
9.6	Parameter Estimates When Sample Data	81
9.7	Parameter Estimates When No Data	82
9.8	Summary	84
10	Left Truncated Normal	85
10.1	Introduction	85
10.2	Fundamentals	85
10.3	Standard Normal	86
10.4	Left-Truncated Normal	86
10.5	Cumulative Probability of t	87
10.6	Sample Data	91
10.7	Parameter Estimates When Sample Data	91
10.8	LTN in Inventory Control	93
10.9	Distribution Center in Auto Industry	94
10.10	Dealer, Retailer or Store	95
10.11	Summary	95
11	Right Truncated Normal	97
11.1	Introduction	97
11.2	Fundamentals	97
11.3	Standard Normal	98
11.4	Right-Truncated Normal	98
11.5	Cumulative Probability of k	99
11.6	Mean and Standard Deviation of t	100
11.7	Spread Ratio of RTN	100
11.8	Table Values	100
11.9	Sample Data	103

11.10	Parameter Estimates When Sample Data	104
11.11	Estimate δ When RTN	104
11.12	Estimate the α -Percent-Point of x	105
11.13	Summary	106
12	Triangular	107
12.1	Introduction	107
12.2	Fundamentals	107
12.3	Standard Triangular	107
12.4	Triangular	108
12.5	Table Values on y	110
12.6	Deriving $x\alpha = \alpha$ -Percent-Point on x	111
12.7	Parameter Estimates When No Data	112
12.8	Summary	112
13	Discrete Uniform	113
13.1	Introduction	113
13.2	Fundamentals	113
13.3	Lexis Ratio	114
13.4	Sample Data	115
13.5	Parameter Estimates When Sample Data	115
13.6	Parameter Estimates When No Data	116
13.7	Summary	117
14	Binomial	119
14.1	Introduction	119
14.2	Fundamentals	119
14.3	Lexis Ratio	120
14.4	Normal Approximation	121
14.5	Poisson Approximation	122
14.6	Sample Data	125
14.7	Parameter Estimates with Sample Data	125
14.8	Parameter Estimates When No Data	125
14.9	Summary	126
15	Geometric	127
15.1	Introduction	127
15.2	Fundamentals	127
15.3	Number of Failures	128
15.4	Sample Data	128
15.5	Parameter Estimate with Sample Data	128
15.6	Number of Trials	129
15.7	Sample Data	131
15.8	Parameter Estimate with Sample Data	131
15.9	Parameter Estimate When No Sample Data	131

15.10	Lexis Ratio	132
15.11	Memory Less Property	133
15.12	Summary	133
16	Pascal	135
16.1	Introduction	135
16.2	Fundamentals	135
16.3	Number of Failures	136
16.4	Parameter Estimate When Sample Data	136
16.5	Parameter Estimate When No Data	137
16.6	Number of Trials	138
16.7	Lexis Ratio	139
16.8	Parameter Estimate When Sample Data	139
16.9	Summary	141
17	Poisson	143
17.1	Introduction	143
17.2	Fundamentals	143
17.3	Lexis Ratio	144
17.4	Parameter Estimate When Sample Data	144
17.5	Parameter Estimate When No Data	144
17.6	Exponential Connection	145
17.7	Poisson with Multi Units	146
17.8	Summary	148
18	Hyper Geometric	149
18.1	Introduction	149
18.2	Fundamentals	149
18.3	Parameter Estimate When Sample Data	150
18.4	Binomial Estimate	150
18.5	Summary	152
19	Bivariate Normal	153
19.1	Introduction	153
19.2	Fundamentals	153
19.3	Bivariate Normal	154
19.4	Marginal Distributions	154
19.5	Conditional Distribution	155
19.6	Bivariate Standard Normal	155
19.7	Marginal Distribution	155
19.8	Conditional Distributions	156
19.9	Approximation to the Cumulative Joint Probability	156
19.10	Statistical Tables	163
19.11	Summary	163

20 Bivariate Lognormal 165

 20.1 Introduction 165

 20.2 Fundamentals 165

 20.3 Cumulative Probability 167

 20.4 Summary 169
