## Part I Fourier Series and the Discrete Fourier Transform

<b>1</b>	<b>Introduction</b> .....	<b>3</b>
<b>2</b>	<b>Formulation of Fourier Series</b> .....	<b>11</b>
<b>3</b>	<b>Fourier Coefficients and Their Properties</b> .....	<b>17</b>
<b>4</b>	<b>Convolution and Parseval's Equality</b> .....	<b>23</b>
<b>5</b>	<b>Fejér Means of Fourier Series. Uniqueness of the Fourier Series.</b> ....	<b>27</b>
<b>6</b>	<b>The Riemann–Lebesgue Lemma</b> .....	<b>33</b>
<b>7</b>	<b>The Fourier Series of a Square-Integrable Function. The Riesz–Fischer Theorem.</b> .....	<b>37</b>
<b>8</b>	<b>Besov and Hölder Spaces</b> .....	<b>45</b>
<b>9</b>	<b>Absolute convergence. Bernstein and Peetre Theorems.</b> .....	<b>53</b>
<b>10</b>	<b>Dirichlet Kernel. Pointwise and Uniform Convergence.</b> .....	<b>59</b>
<b>11</b>	<b>Formulation of the Discrete Fourier Transform and Its Properties.</b> ...	<b>77</b>
<b>12</b>	<b>Connection Between the Discrete Fourier Transform and the Fourier Transform.</b> .....	<b>85</b>
<b>13</b>	<b>Some Applications of the Discrete Fourier Transform.</b> .....	<b>93</b>
<b>14</b>	<b>Applications to Solving Some Model Equations</b> .....	<b>99</b>
14.1	The One-Dimensional Heat Equation .....	99
14.2	The One-Dimensional Wave Equation .....	113
14.3	The Laplace Equation in a Rectangle and in a Disk .....	121

## Part II Fourier Transform and Distributions

<b>15 Introduction</b> .....	131
<b>16 The Fourier Transform in Schwartz Space</b> .....	133
<b>17 The Fourier Transform in <math>L^p(\mathbb{R}^n)</math>, <math>1 \leq p \leq 2</math></b> .....	143
<b>18 Tempered Distributions</b> .....	153
<b>19 Convolutions in <math>S</math> and <math>S'</math></b> .....	167
<b>20 Sobolev spaces</b> .....	175
20.1 Sobolev spaces on bounded domains .....	188
<b>21 Homogeneous Distributions</b> .....	193
<b>22 Fundamental Solution of the Helmholtz Operator</b> .....	207
<b>23 Estimates for the Laplacian and Hamiltonian</b> .....	217

## Part III Operator Theory and Integral Equations

<b>24 Introduction</b> .....	247
<b>25 Inner Product Spaces and Hilbert Spaces</b> .....	249
<b>26 Symmetric Operators in Hilbert Spaces</b> .....	261
<b>27 John von Neumann's spectral theorem</b> .....	279
<b>28 Spectra of Self-Adjoint Operators</b> .....	295
<b>29 Quadratic Forms. Friedrichs Extension.</b> .....	313
<b>30 Elliptic Differential Operators</b> .....	319
<b>31 Spectral Functions</b> .....	331
<b>32 The Schrödinger Operator</b> .....	335
<b>33 The Magnetic Schrödinger Operator</b> .....	349
<b>34 Integral Operators with Weak Singularities. Integral Equations     of the First and Second Kinds.</b> .....	359
<b>35 Volterra and Singular Integral Equations</b> .....	371
<b>36 Approximate Methods</b> .....	379

## Part IV Partial Differential Equations

<b>37 Introduction</b> .....	393
<b>38 Local Existence Theory</b> .....	405

<b>39 The Laplace Operator</b> .....	421
<b>40 The Dirichlet and Neumann Problems</b> .....	437
<b>41 Layer Potentials</b> .....	451
<b>42 Elliptic Boundary Value Problems</b> .....	471
<b>43 The Direct Scattering Problem for the Helmholtz Equation</b> .....	485
<b>44 Some Inverse Scattering Problems for the Schrödinger Operator</b> ....	493
<b>45 The Heat Operator</b> .....	507
<b>46 The Wave Operator</b> .....	517
<b>References</b> .....	529
<b>Index</b> .....	531

Fourier Series, Fourier Transform and Their Applications  
to Mathematical Physics

Serov, V.

2017, XI, 534 p. 4 illus., Hardcover

ISBN: 978-3-319-65261-0
