

Contents

1	Introduction	1
2	Spaces of Functions on a Sphere	7
2.1	Spherical Harmonics	8
2.2	Geographical Coordinates Maps	17
2.3	Orthogonal Projections on H_n and Fractional Derivatives	20
2.4	Hilbert Spaces $\mathbb{H}^s$ on a Sphere	24
2.5	Space $C(S)$ of Continuous Functions on a Sphere	33
2.6	Some Estimates in the Norms of $L^p(S)$ and $L^p(0, T; \mathbb{X})$	39
3	Solvability of Vorticity Equation on a Sphere	43
3.1	Vortex Dynamics of Viscous Incompressible Fluid	46
3.2	Properties of Jacobian Determinant	47
3.3	Unique Solvability of a Non-Stationary Problem	50
3.4	Solvability of a Stationary Vorticity Equation	56
3.5	Asymptotic Behavior of Solutions	60
3.6	Global Asymptotic Stability of Barotropic Flows	64
3.7	Dimension of Vorticity Equation Attractor	72
3.7.1	Hausdorff Dimension of the Attractor for Stationary Forcing	73
3.7.2	Simple Quasi-Periodic Attractive Sets	74
3.7.3	Globally Asymptotically Stable Spiral Solution	75
4	Dynamics of Ideal Fluid on a Sphere	79
4.1	Conservation Laws	80
4.2	Triad Interaction Coefficients	85
4.3	Recurrence Formula for $K_{j\alpha\gamma}$	89
4.4	Solvability of Vorticity Equation for Ideal Fluid	90
4.5	Infinitely Differentiable Wave Solutions of Vorticity Equation	91
4.6	Modons on a Sphere	95
4.7	Distance Between Solutions	98
4.8	Euler Angles	107

5	Stability of Rossby-Haurwitz (RH) Waves	109
5.1	Conservation Laws for Arbitrary Perturbations to RH Wave	110
5.2	Invariant Sets, Quotient Space and Norm of Perturbations	114
5.3	A Hyperbolic Law for Perturbations from $\mathbf{M}_-^n$ and $\mathbf{M}_+^n$	115
5.4	Geometric Interpretation of Variations in the Perturbation Energy	117
5.5	Liapunov Instability of Non-Zonal RH Wave	119
5.6	Exponential Instability of RH Wave	122
5.7	Normal Mode Instability of Zonal RH Waves and LP Flows	127
6	Stability of Modons and Wu-Verkley Waves	135
6.1	Steady Wu-Verkley Waves and Modons	136
6.2	Conservation Law for Disturbances of WV Wave and Modon	139
6.3	Conditions for Exponential Instability of WV Waves and Modons	142
6.4	Bounds of Growth Rate and Orthogonality of Unstable Modes	146
6.5	Dipole Modons Moving Along the Same Latitudinal Circle	148
6.6	Liapunov Instability of Dipole Modons	153
7	Linear and Nonlinear Stability of Flows	157
7.1	Shear Flow Stability	158
7.2	Linear Stability of Zonal Flows	168
7.3	Nonlinear Stability	175
7.4	Instantaneous Evolution of Kinetic Energy of Perturbations	180
7.5	The First Mechanism of Generation of the Energy of Perturbation Near a Zonal Jet	182
7.6	Generalized Eliassen-Palm Flux and the Eigenvalue Problem Method	185
7.7	Numerical Example: Analysis of Climatic January Circulation	189
8	Numerical Study of Linear Stability	193
8.1	Method of Normal Modes	194
8.2	Spectrum of Linearized Operator for Viscous Fluid	197
8.3	One Estimate in Terms of the Graph Norm of Operator	201
8.4	Spectral Approximation	203
8.5	Rate of Convergence Estimates	205
8.6	Spectrum of Linearized Operator for Ideal Fluid	208
8.7	Stability Matrix in the Basis of Spherical Harmonics	212
8.8	Stationary States Having Block Diagonal Structure of Stability Matrix	215
8.9	Stability Matrix of a Legendre-Polynomial Flow	217
	References	221
	Index	237

Mathematical Problems of the Dynamics of
Incompressible Fluid on a Rotating Sphere

Skiba, Y.

2017, XII, 239 p. 34 illus., Hardcover

ISBN: 978-3-319-65411-9
