

Contents

Commutation and Beyond: Extended Abstract	1
<i>Štěpán Holub</i>	
Church-Rosser Systems, Codes with Bounded Synchronization Delay and Local Rees Extensions	6
<i>Volker Diekert and Lukas Fleischer</i>	
Overpals, Underlaps, and Underpals	17
<i>Aayush Rajasekaran, Narad Rampersad, and Jeffrey Shallit</i>	
On Some Interesting Ternary Formulas	30
<i>Pascal Ochem and Matthieu Rosenfeld</i>	
Minimal Forbidden Factors of Circular Words	36
<i>Gabriele Fici, Antonio Restivo, and Laura Rizzo</i>	
A de Bruijn Sequence Construction by Concatenating Cycles of the Complemented Cycling Register	49
<i>Daniel Gabric and Joe Sawada</i>	
On Words with the Zero Palindromic Defect	59
<i>Edita Pelantová and Štěpán Starosta</i>	
Equations Enforcing Repetitions Under Permutations.	72
<i>Joel D. Day, Pamela Fleischmann, Florin Manea, and Dirk Nowotka</i>	
Matching Lexicographic and Conjugation Orders on the Conjugation Class of a Special Sturmian Morphism	85
<i>David Clampitt and Thomas Noll</i>	
More on the Dynamics of the Symbolic Square Root Map (Extended Abstract).	97
<i>Jarkko Peltomäki and Markus Whiteland</i>	
Study of Christoffel Classes: Normal Form and Periodicity	109
<i>Mélodie Lapointe</i>	
On Arithmetic Index in the Generalized Thue-Morse Word	121
<i>Olga G. Parshina</i>	
Abelian Complexity of Thue-Morse Word over a Ternary Alphabet	132
<i>Idrissa Kaboré and Boucaré Kientéga</i>	

A Set of Sequences of Complexity $2n + 1$	144
<i>J. Cassaigne, S. Labbé, and J. Leroy</i>	
The Word Entropy and How to Compute It	157
<i>Sébastien Ferenczi, Christian Mauduit, and Carlos Gustavo Moreira</i>	
First Steps in the Algorithmic Reconstruction of Digital Convex Sets	164
<i>Paolo Dulio, Andrea Frosini, Simone Rinaldi, Lama Tarsissi, and Laurent Vuillon</i>	
Variants Around the Bresenham Method	177
<i>J.-P. Borel</i>	
Combinatorics of Cyclic Shifts in Plactic, Hypoplactic, Sylvester, and Related Monoids.	190
<i>Alan J. Cain and António Malheiro</i>	
Palindromic Length in Free Monoids and Free Groups	203
<i>Aleksi Saarela</i>	
Invariance: A Theoretical Approach for Coding Sets of Words Modulo Literal (Anti)Morphisms.	214
<i>Jean Néraud and Carla Selmi</i>	
Burrows-Wheeler Transform and Run-Length Encoding	228
<i>Sabrina Mantaci, Antonio Restivo, Giovanna Rosone, and Marinella Sciortino</i>	
A Permutation on Words in a Two Letter Alphabet.	240
<i>Niccolò Castronuovo, Robert Cori, and Sébastien Labbé</i>	
Symmetric Dyck Paths and Hooley's Δ -Function	252
<i>José Manuel Rodríguez Caballero</i>	
Author Index	263

Combinatorics on Words

11th International Conference, WORDS 2017, Montréal,

QC, Canada, September 11-15, 2017, Proceedings

Brlek, S.; Dolce, F.; Reutenauer, C.; Vandomme, É.

(Eds.)

2017, XX, 263 p. 55 illus., Softcover

ISBN: 978-3-319-66395-1
