1	Introduction	1
1.1	Context	1
1.2	Stellar Discs	4
1.3	Hamiltonian Dynamics	5
1.4	Overview	12
	References	14
2	Secular Diffusion	17
2.1	Introduction	17
2.2	Collisionless Dynamics	20
2.2.1	Evolution Equations	20
2.2.2	Matrix Method	22
2.2.3	Diffusion Coefficients and Statistical Average	24
2.3	Self-induced Collisional Dynamics	27
2.3.1	Evolution Equations	31
2.3.2	Fast Timescale Amplification	33
2.3.3	Estimating the Collision Operator	34
2.3.4	The Balescu-Lenard Equation	38
2.3.5	The Bare Case: The Landau Equation	41
2.3.6	The Multi-Component Case	41
2.3.7	H-Theorem	43
2.4	Conclusion	44
2.4.1	Future Works	45
	Appendix	46
	References	66
3	Razor-Thin Discs	69
3.1	Introduction	69
3.2	Angle-Action Coordinates and Epicyclic Approximation	71
3.3	The Razor-Thin WKB Basis	74

3.4	WKB Razor-Thin Amplification Eigenvalues	78
3.5	WKB Limit for the Collisionless Diffusion	82
3.6	WKB Limit for the Collisional Diffusion	86
3.7	Application to Radial Diffusion	90
3.7.1	A Razor-Thin Disc Model	90
3.7.2	Shot-Noise-Driven Radial Diffusion	96
3.7.3	Diffusion Timescale	103
3.7.4	Interpretation	104
3.8	Conclusion	107
3.8.1	Future Works	107
	References	110
4	Razor-Thin Discs and Swing Amplification	113
4.1	Introduction	113
4.2	Calculating the Balescu–Lenard Diffusion Flux	114
4.2.1	Calculating the Actions	115
4.2.2	The Basis Elements	116
4.2.3	Computing the Response Matrix	117
4.2.4	Sub-region Integration	118
4.2.5	Critical Resonant Lines	120
4.3	Application to Self-induced Radial Diffusion	122
4.3.1	Initial Diffusion Flux	122
4.3.2	Diffusion Timescale	125
4.3.3	Why Swing Amplification Matters	126
4.4	Comparisons with N -Body Simulations	129
4.4.1	A N -Body Implementation	129
4.4.2	Scaling with N	131
4.4.3	Scaling with ξ	135
4.4.4	Secular Phase Transitions	138
4.5	Conclusion	141
4.5.1	Future Works	144
	Appendix	145
	References	159
5	Thickened Discs	161
5.1	Introduction	161
5.2	Angle-Action Coordinates and Epicyclic Approximation	163
5.3	The Thickened WKB Basis	165
5.4	WKB Thick Amplification Eigenvalues	170
5.4.1	WKB Response Matrix	170
5.4.2	A Thickened Q Factor	173
5.5	WKB Limit for the Collisionless Diffusion	177
5.6	WKB Limit for the Collisional Diffusion	181
5.7	Application to Disc Thickening	184

5.7.1	A Thickened Disc Model	185
5.7.2	Shot-Noise-Driven Resonant Disc Thickening	190
5.7.3	Diffusion Timescale	195
5.7.4	Radial Migration	196
5.7.5	Thickening Induced by Bars	197
5.7.6	GMCs Triggered Thickening	201
5.8	Conclusion	204
5.8.1	Future Works	205
	Appendix	206
	References	218
6	Quasi-Keplerian Systems	221
6.1	Introduction	221
6.2	The Associated BBGKY Hierarchy	224
6.3	Degenerate Angle-Action Coordinates	228
6.4	Averaging the Evolution Equations	232
6.5	The Degenerate Balescu–Lenard Equation	236
6.5.1	The One-Component Balescu–Lenard Equation	238
6.5.2	The Multi-Component Balescu–Lenard Equation	242
6.6	Applications	244
6.6.1	Razor-Thin Axisymmetric Discs	244
6.6.2	Spherical Clusters	247
6.6.3	Relativistic Barrier Crossing	249
6.7	Conclusion	254
6.7.1	Future Works	256
	Appendix	257
	References	266
7	Conclusion	269
7.1	Overview	269
7.2	Outlook and Future Works	272
	References	274
