

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	The Goal: Classical Statistical Mechanics as a Black Box Tool	1
1.2	Nested Sampling in Bayesian Statistics and in Statistical Mechanics	3
1.3	Outline of the Thesis	4
1.4	A History of Nested Sampling	5
	References	6
<b>2</b>	<b>A Primer in Probability</b>	<b>7</b>
 <b>Part I Statistical and Thermal Physics</b>		
<b>3</b>	<b>Introduction</b>	<b>13</b>
3.1	Phase Space	13
3.2	Classical and Statistical Mechanics	13
3.3	Hamilton's Equations of Motion	14
3.4	Statistical Equilibrium	14
3.5	Correlation Lengths and Statistically Independent Subsystems	15
3.6	Fluctuations	15
<b>4</b>	<b>Phase Space Probability Distributions for Various External Conditions</b>	<b>19</b>
4.1	Isolated Systems: Fixed $N$ , $E$ and $V$	19
4.1.1	Distributions for $U$ , $K$	20
4.1.2	Principle of Equal Equilibrium Probability	22
4.2	Systems That Exchange Energy with the Universe: Fixed $N$ , $T$ , and $V$	22
4.3	Systems That Exchange Both Energy and Volume with the Universe: Fixed $N$ , $T$ , and $P$	25

4.3.1	Microscopic Enthalpy . . . . .	27
4.4	Systems That Exchange Energy and Particles with the Universe: Fixed $V$ , $T$ , and $\mu$ . . . . .	29
4.5	Entropy. . . . .	30
<b>5</b>	<b>Relating Probability Density Functions to the Behaviour of Systems . . . . .</b>	<b>31</b>
5.1	Phase Transitions . . . . .	31
5.2	The Equation of State. . . . .	32
5.3	Phase Diagrams . . . . .	32
5.4	Thermodynamic Potentials . . . . .	34
5.5	Signatures of Phase Transitions . . . . .	34
5.6	Finite Size Simulations. . . . .	36
5.7	Periodic Boundary Conditions . . . . .	36
5.8	Fractional Coordinates and Fully Flexible Simulation Cells . . . .	37
	References. . . . .	38
 <b>Part II Nested Sampling</b>		
<b>6</b>	<b>The Strategy of Nested Sampling . . . . .</b>	<b>43</b>
	References. . . . .	46
<b>7</b>	<b>An Introduction to Nested Sampling . . . . .</b>	<b>47</b>
7.1	The Nested Sampling Method . . . . .	48
7.1.1	A Graphical Introduction to the Nested Sampling Procedure . . . . .	48
7.1.2	The Nested Sampling Algorithm in Detail. . . . .	48
7.1.3	Nested Sampling as a Microcanonical Cooling Algorithm . . . . .	52
7.1.4	Initialisation of Nested Sampling. . . . .	52
7.2	Calculating the Partition Function and Other Quantities. . . . .	53
7.3	Generating New Samples: Markov Chain Monte Carlo . . . . .	55
7.4	Multimodal Potentials. . . . .	56
7.5	Error Propagation in Nested Sampling . . . . .	58
7.6	Conclusion . . . . .	59
	References. . . . .	59
<b>8</b>	<b>Nested Sampling for Materials . . . . .</b>	<b>61</b>
8.1	Introduction . . . . .	61
8.2	Fixed Volume or Fixed Pressure?. . . . .	61
8.3	Nested Sampling at Fixed Pressure. . . . .	62
8.4	Minimum Cell Height Criterion . . . . .	65
8.5	MCMC Exploration in the Fully Flexible Cell Formulation at Fixed Pressure . . . . .	68
8.6	Initialising Nested Sampling at Fixed Pressure. . . . .	74

8.7	Partition Function and Thermodynamic Variables. . . . .	75
8.8	Lennard-Jonesium. . . . .	77
8.8.1	Simulation Details. . . . .	77
8.8.2	Results. . . . .	79
8.9	A Binary Lennard-Jonesium Alloy. . . . .	85
8.9.1	Simulation Details. . . . .	87
8.9.2	Results. . . . .	87
8.10	NPB Embedded Atom Model for Aluminium. . . . .	89
8.11	Comparison to Parallel Tempering. . . . .	91
8.12	Summary. . . . .	93
8.13	Further Work. . . . .	94
	References. . . . .	95
<b>9</b>	<b>Equations of State. . . . .</b>	<b>97</b>
9.1	Introduction. . . . .	97
9.2	Algorithmic Details. . . . .	98
9.2.1	Generating Posterior Samples. . . . .	98
9.2.2	Bayesian Model Selection over a Mixtures of Gaussians. . . . .	98
9.2.3	Partitioning Gaussians into Non-overlapping Sets. . . . .	100
9.2.4	Calculating the Mean of the Dominant Partition. . . . .	102
9.2.5	Equation of State for Lennard-Jonesium. . . . .	103
9.3	Further Work. . . . .	103
	References. . . . .	104
<b>10</b>	<b>Parallelising Nested Sampling. . . . .</b>	<b>105</b>
10.1	Introduction. . . . .	105
10.2	Parallelising over the Number of Iterations. . . . .	105
10.3	Parallelising Within Each Iteration. . . . .	107
10.3.1	Details of Our Implementation. . . . .	108
10.4	Summary. . . . .	109
10.5	Further Work. . . . .	110
	References. . . . .	110
 <b>Part III Molecular Dynamics Nested Sampling</b>		
<b>11</b>	<b>Introduction. . . . .</b>	<b>113</b>
11.1	Hamiltonian Monte Carlo for the Canonical Distribution. . . . .	114
11.1.1	The Canonical Distribution, Revisited. . . . .	114
11.1.2	Why Hamiltonian Dynamics? . . . . .	114
11.1.3	Hamiltonian Monte Carlo Sampling Step. . . . .	115
	References. . . . .	116

<b>12</b>	<b>Hamiltonian Monte Carlo for Nested Sampling</b>	117
12.1	Galilean Monte Carlo	117
12.2	Molecular Dynamics Nested Sampling in the Total Hamiltonian	118
12.3	Nested Sampling in the Total Hamiltonian at Fixed $N$ and $P$	120
12.3.1	MTK Dynamics	121
12.3.2	Choice of $W_{\text{MTK}}$	122
12.3.3	Hamiltonian Monte Carlo Scheme	123
12.3.4	Initialisation	124
12.3.5	HMC Acceptance Rate	125
12.3.6	Thermal Distributions	128
12.3.7	Comparison of MDNS with MCMC	129
12.4	Summary	131
12.5	Further Work	131
	References	132
 <b>Part IV Conclusion</b>		
<b>13</b>	<b>Summary and Further Work</b>	135
13.1	Summary	135
13.2	Further Work	136
