Contents

The Multiple Dimensions of Mean-Payoff Games (Extended Abstract) 1
Laurent Doyen

Adding Dense-Timed Stack to Integer Reset Timed Automata 9
Devendra Bhave and Shibashis Guha

Space-Efficient Fragments of Higher-Order Fixpoint Logic 26
Florian Bruse, Martin Lange, and Etienne Lozes

Refinement of Trace Abstraction for Real-Time Programs 42
Franck Cassez, Peter Gjøl Jensen, and Kim Guldstrand Larsen

An Abstract Machine for Asynchronous Programs with Closures and Priority Queues 59
Davide Ancona, Giorgio Delzanno, Luca Franceschini, Maurizio Leotta, Enrico Prampolini, Marina Ribaudo, and Filippo Ricca

Copyful Streaming String Transducers 75
Emmanuel Filiot and Pierre-Alain Reynier

Model Checking CTL over Restricted Classes of Automatic Structures 87
Norbert Hundeshagen and Martin Lange

Topological Characterisation of Multi-buffer Simulation 101
Milka Hutagalung

Distributed Control Synthesis Using Euler's Method 118
A. Le Coënt, J. Alexandre dit Sandretto, A. Chapoutot, L. Fribourg, F. De Vuyst, and L. Chamoin

Reachability Problem for Polynomial Iteration Is PSPACE-complete 132
Reino Niskanen

Probabilistic Timed Automata with Clock-Dependent Probabilities 144
Jeremy Sproston

Stubborn Sets with Frozen Actions 160
Antti Valmari

Parameterized Graph Connectivity and Polynomial-Time Sub-Linear-Space Short Reductions (Preliminary Report) 176
Tomoyuki Yamakami
